Operating Indicators by Function	283

February 21, 2014

To the Citizens of Texas, Governor Perry and Members of the 83rd Texas Legislature:

The Comprehensive Annual Financial Report (CAFR) of the state of Texas for the fiscal year ended Aug. 31, 2013, is submitted herewith. Responsibility for both the accuracy of the data presented, as well as the completeness and fairness of the presentation, rests with the office of the Texas Comptroller of Public Accounts. To the best of my knowledge, the information presented is accurate in all material respects, and all disclosures necessary for a reasonable understanding of the state's financial activities are included.

The reporting approach established by the Governmental Accounting Standards Board (GASB) was utilized. The state also voluntarily follows the recommendations of the Government Finance Officers Association (GFOA) of the United States and Canada for the contents of government financial reports and participates in the GFOA's review program for the Certificate of Achievement for Excellence in Financial Reporting. The state auditor performed an audit, in accordance

with generally accepted auditing standards, of the state's general-purpose financial statements. His opinion is presented in this report preceding the financial statements.

The state auditor contracted with KPMG to perform portions of the federal audit procedures necessary to meet the requirements of the federal Single Audit Act Amendments of 1996 and related Office of Management and Budget (OMB) Circular A-133. The federal portion of the Statewide Single Audit Report for the fiscal year ended Aug. 31, 2013, with the opinion expressed by KPMG, will be issued separately.

Profile of the Government

This report includes financial statements for the state of Texas reporting entity. Criteria for determining the reporting entity and presentation of the related financial data are established by GASB. The criteria include legal standing and financial accountability.

Other organizations that would cause the financial statements to be misleading or incomplete if they were excluded are also included in the reporting entity.

Details on the financial reporting entity is provided in Note 1 of the notes to the financial statements. A brief summary of the nature of significant component units and their relationship to the state of Texas is provided in Note 19.

All activities generally considered part of the state of Texas are included in this report. These activities provide a range of services in the areas of education; health and human services; public safety and corrections; transportation; natural resources and recreation; regulation; general government; employee benefits; and teacher retirement state contributions.

The management discussion and analysis (MD&A) in the financial section provides an overview of the state's financial activities, addressing both governmental and business-type activities reported in the government-wide financial statements.

Accounting System and Budgetary Controls

The state's internal accounting controls provide reasonable assurance regarding the safeguarding of assets against loss from unauthorized use or disposal and the reliability of financial records for preparing financial statements. The concept of reasonable assurance recognizes that the cost of a control should not exceed the resulting benefit.

Budgetary control is exercised through expenditure budgets for each agency. These budgets are entered into the statewide accounting system after the General Appropriations Act becomes law. The General Appropriations Act becomes law after passage by the Legislature, certification by my office that the amounts appropriated are within the estimated collections, and the signing of the bill by the governor. Controls are maintained first at the agency level, with additional control at the fund and appropriation level to ensure expenditures do not exceed authorized limits. Further detail on budgetary accounting for the state is found in the required supplementary information other than MD&A section.

Economic Outlook

Texas possesses advantages – relatively low living costs, an attractive business climate, a central Sunbelt location, and a balanced mix of industries – that have enabled it to grow faster than the nation for many years. These advantages remain and will allow the state to outperform the nation over the next two years. Despite the headwinds presented by a still-recovering national economy and by continuing international financial and economic challenges, the Texas economy, as measured by real gross state product, is projected to grow by 3.6 percent in calendar 2014 and by a further 3.5 percent in 2015.

Texas personal income is expected to increase by 3.7 percent in calendar 2013 and is projected to continue to increase over the next two years by 4.4 percent in 2014 and by 4.6 percent in 2015. Underlying this income growth is the expanding Texas population. Recent estimates by the U.S. Bureau of the Census show that eight of the nation's 15 most rapidly growing large incorporated cities are in Texas. Texas' population will grow by roughly 448,000 per year over the next two years, to average 27.5 million in 2015.

The Texas unemployment rate is expected to improve over the next two years. Job growth will outpace growth in the labor force, allowing the projected unemployment rate to decline from an estimated average of 6.5 percent in calendar 2013 to 6 percent in 2014 and 5.9 percent in 2015.

Total Texas nonfarm employment is expected to grow at an annual rate of 2.7 percent in calendar 2013. In 2014, employment growth is projected to slow to 2.1 percent, with goods producing employment growing by 2.3 percent and service providing sectors growing by 2.1 percent. In 2015 growth is expected to again be 2.1 percent, with goods producing and service providing industries growing by 2.5 and 2.1 percent, respectively.

Financial Policies

Fiscal soundness is an unwavering principle that guides the financial policies of the state. The Texas Constitution supports responsible governance by mandating several limitations on the budgeting process. In addition to the certification process requiring passage of a balanced budget in Article III, Section 49a, budget growth and indebtedness are also limited. According to Article VIII, Section 22, appropriations from state tax revenue not dedicated by the Texas Constitution cannot grow faster than state economic growth estimated by the Legislative Budget Board. Payments required for debt cannot exceed 5 percent of the previous three-year average of non-dedicated general revenue as provided in Article III, Section 49j.

The economic stabilization fund (ESF), commonly called "the rainy day fund," authorized in 1988 by the Texas Constitution, Article III, Section 49g, is yet another example of prudent governance. The Comp-

troller may transfer ESF amounts to the general revenue fund to prevent or eliminate temporary cash deficiencies. Any amounts transferred to general revenue shall be returned to the ESF as soon as practicable, but no later than Aug. 31 of each odd-numbered year. The Legislature may appropriate, by a three-fifths vote of the members present in each house, amounts in the ESF for spending that does not exceed the amount of any unanticipated deficit or revenue decline during a biennium. The Legislature may also appropriate any amount from the ESF for any purpose only if approved by at least two-thirds of the members present in each house. The ESF shall receive a transfer, not later than the 90th day of each biennium, from the general revenue fund for one-half of any unencumbered positive balance remaining in the general revenue fund on the last day of the preceding biennium. The ESF also receives transfers, not later than the 90th day of each fiscal year, from the general revenue fund for 75 percent of the prior fiscal year oil and natural gas production taxes that exceeds the amount of these collections in fiscal 1987. The balance in the fund as of Aug. 31, 2013, was \$6.2 billion. The ESF is also discussed in Note 13.

Major Initiatives

The Comptroller's office provides a variety of resources and tools to help Texans better understand economic issues, including financial transparency and accountability in local and state government and reports on emerging issues of vital importance to taxpayers and business owners.

Financial Allocation Study for Texas

In response to a legislative directive to "identify school districts and campuses that use resource allocation practices that contribute to high academic achievement and cost-effective operations," the Comptroller's office created the *Financial Allocation Study for Texas* (FAST) [www.fastexas.org] to measure how spending in every Texas public school district and campus translates to student academic progress.

In its development of FAST, the Comptroller's research team evaluated academic performance and financial data to identify school districts and campuses that produce high academic achievement while maintaining cost-effective operations. Doing so not only helps taxpayers see how spending and academic performance are associated, but also helps school districts identify methods to optimize academic and financial performance.

The 2013 FAST results were released in December 2013 and a new reporting tool was released in February 2014.

Texas in 2014

Texas has enjoyed remarkable growth and economic expansion in recent years, but success inevitably brings challenges. For 2014, the Comptroller's office has a series of reports slated that examine issues vital to the Texas economy.

The first of these reports, released in January 2014, examines the state's persistent water shortages. The report provides context for understanding the state's water needs and recommends that the Texas Legislature establish a prize framework to reward those who develop proven and new, cheap sources of drinking water. The report concludes that Texas, in order to continue to

support its rapidly growing population, must find costeffective supplements to its reservoirs and aquifers.

A report examining the Texas workforce is also in development. Given the aging of the Texas workforce, for instance, businesses will likely be required to replace retiring employees with younger workers who lack needed skills and education. Without improvements toward educational attainment rates, particularly among the state's growing minority populations, Texas' economic competitiveness could decline.

Also scheduled for 2014 is a report studying student loan debt and its implications for the Texas economy. Years of tuition increases are threatening to place higher education beyond the reach of many Texans which could cost them hundreds of thousands of dollars in income over a lifetime while also reducing the state's global competitiveness.

Texas Transparency

Built upon the philosophy that since taxpayers pay for government and deserve to know how the government spends its money, the Comptroller's office promotes financial transparency and accountability at all levels of government.

The agency's award-winning *TexasTransparency.org* website serves as a one-stop portal for government transparency tools, information and data. As of 2014, the Comptroller's entire array of transparency tools and data sets is accessible through a reorganized and retooled Texas Transparency experience which includes expanded data on local debt as well as streamlined features.

In support of local transparency initiatives, the Comptroller's Leadership Circle recognizes local gov-

ernments across Texas that are striving to meet a high standard for financial transparency online. The program spotlights agencies that open their books to the public and provide a clear picture of spending in user-friendly formats.

The Comptroller's Open Data Center offers taxpayers access to machine-readable data sets on statewide contracts and bidders' lists, oil and gas industry data, tax receipts and more. The Texas Economic Data for Growth and Expansion Data Center provides an array of economic development data, including population, employment, income, and poverty figures.

In 2013, the agency unveiled *TelltheTruthTexas.org* which serves as a repository for all available information on local government finances in Texas, including existing and proposed debt of cities, counties, school and hospital districts and hundreds of special-purpose districts throughout Texas.

The Comptroller's Where the Money Goes online tool allows taxpayers to search the state check register and track state agency spending. The Monthly State Revenue Watch (www.window.state.tx.us/finances/revenueWatch) presents net state revenue collections by month of collection and revenue source, and provides side-by-side comparisons to prior year collections.

Addressing Critical Concerns

The 83rd Legislature sought solutions to issues of critical concern to Texans, including:

- Sufficient water supplies
- Providing adequate medical and educational opportunities to an underserved population
- Transportation funding

Water: A Critical Natural Resource

The 2011 drought was especially catastrophic for Texas; fires claimed six lives and agricultural losses totaled billions of dollars. These losses made a deep and continuing impact on the way in which Texans think about the value – and the scarcity – of water.

Texas' drought cycles combined with the state's growing population have resulted in an increasingly unquenchable demand for water. The Texas Water Development Board (TWDB) reported that in 2010, irrigation accounted for 56 percent of Texas' water use, followed by municipal use at 27 percent. By 2060, however, municipal water use is expected to become the largest, at 38.3 percent, of all water use, followed closely by irrigation at 38.1 percent.

Texas aquifers, however, contain about 2.7 billion acre-feet of brackish groundwater, which, if converted to fresh water, could maintain Texas' current consumption levels for about 150 years. Nearly all of Earth's water is salt water. Accordingly, desalination may prove to be an important component of solutions to water shortages. Due to its geographic location, Texas is uniquely positioned to take advantage of advancements in desalination.

In recognition of Texas' increasingly severe water problems, the 83rd Legislature made sweeping changes to Texas' administration of water projects. The new legislation alters the makeup of the TWDB and will provide additional state funding for water infrastructure projects and a system to prioritize them.

The agency's *Texas Water Report: Going Deeper For The Solution*, released in 2014 at www.TxWaterReport.org, revisits the effects of recent drought conditions, examines research-driven approaches for augmenting Texas' water supply and proposes practical answers for the state's growing thirst.

Rio Grande Valley to Benefit from Higher Education Consolidation

Residents of South Texas will soon gain a new research university and medical school planned for the Rio Grande Valley (Valley). The new facility will address the needs of a medically and educationally underserved Valley population while providing higher-paying jobs in South Texas.

The University of Texas at Brownsville, the University of Texas-Pan American and the Regional Academic Health Center are being consolidated into a single, general academic teaching institution and medical school within the University of Texas System.

The new research university and medical school will feature:

- Academic campuses in Cameron and Hidalgo counties
- An academic center in Starr County
- The Lower Rio Grande Valley Regional Academic Health Center facilities
- A University of Texas Health Science Center-South Texas
- A Center for Border Economic and Enterprise Development
- A Texas Academy for Mathematics and Science

Transportation:

Can You Get There From Here?

According to the Texas Department of Transportation, Texas' population over the past 25 years has increased 57 percent while state road capacity grew by only 8 percent. As a result, the state transportation system has been unable to meet growing population demands.

According to the Texas Department of Motor Vehicles, more than 23 million vehicles are registered in Texas. The Texas State Historical Association's Texas Almanac reports that Texas leads the nation in total road and street mileage with 300,000 miles.

State officials face the challenge of providing increased capacity, infrastructure repairs and controls for traffic congestion while meeting state and federal air pollution standards.

The 83rd Legislature voted to allow, beginning in fiscal 2015, one-half of the general revenue normally transferred to the ESF to instead be allocated to the state highway fund in support of construction and maintenance of public, non-tolled roads. This proposed constitutional amendment comes up for voter approval in November 2014.

Awards and Acknowledgments

Certificate of Achievement

The Government Finance Officers Association (GFOA) of the United States and Canada awarded a Certificate of Achievement for Excellence in Financial Reporting to the state of Texas for its Comprehensive Annual Financial Report for the fiscal year ended Aug. 31, 2012. The Certificate of Achievement is a prestigious national award that recognizes conformance with the highest standards for preparation of state and local government financial reports.

In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized Comprehensive Annual Financial Report whose contents conform to program standards. Such reports must satisfy both generally

accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. The state of Texas has received a Certificate of Achievement for the last 23 years (fiscal years ended August 1990 through 2012). We believe our current report continues to conform to the Certificate of Achievement Program requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

I will continue to maintain a highly qualified and professional staff to make this certification possible.

Acknowledgments

The preparation of this report requires the collective efforts of literally hundreds of financial personnel throughout state government, including the dedicated management and staff of the Comptroller's Financial Reporting section and Fiscal Management Division; the chief financial officers, chief accountants and staff at each agency; and the management and staff of the State Auditor's Office. I sincerely appreciate the dedicated efforts of all these individuals who continue to strive for improvements that will make Texas a national leader in quality financial reporting.

Sincerely,
Susan Combs

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate discretely presented component units and remaining fund information of the State of Texas, as of and for the year ended August 31, 2013, and the related notes to the financial statements, which collectively comprise the State's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these consolidated financial statements based on our audits. We did not audit the financial statements of the following entities:

- The University of Texas System, a component of the State of Texas, which constitutes 70
 percent of the assets of Colleges and Universities, a major enterprise fund. The
 University of Texas System also constitutes 53 percent of the assets of the business-type
 activities.
- The Texas Lottery Commission, a component of the State of Texas, whose Lottery Fund is a major enterprise fund that constitutes 17 percent of the operating revenues of the business-type activities.

The statements listed above were audited by other auditors whose reports thereon have been furnished to us, and our opinion, insofar as it relates to the amounts included for these entities, is based solely on the reports of the other auditors. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

SAO Report No. 14-327

Robert E. Johnson Building 1501 N. Congress Avenue Austin. Texas 78701

P.O. Box 12067 Austin. Texas 78711-2067

> Phone: (512) 936-9500

> Fax: (512) 936-9400

Internet: www.sao.state.tx.us An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, based on our audits and the reports of other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate discretely presented component unit and remaining fund information of the State of Texas, as of August 31, 2013, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Emphasis of Matter

Economic Stabilization Fund

As discussed in Note 13 on pages 128 and 129, the economic stabilization fund balance was \$6.2 billion as reported in the governmental fund financial statements as unassigned fund balance as of August 31, 2013. That amount consisted of cash and cash equivalents.

Investments with Values that Are Not Readily Determined

As discussed in Note 3, the financial statements include certain investments valued at approximately \$64 billion as of August 31, 2013, whose fair values have been estimated by management in the absence of readily determinable fair values.

Our opinions are not modified with respect to these matters.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, the budgetary comparison schedule, the modified approach to reporting infrastructure assets, and the schedules of funding progress, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the consolidated financial statements that collectively comprise the State's financial statements. The combining financial statements and schedules, introductory section, and statistical section, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining financial statements and schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic consolidated financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic consolidated financial statements or to the basic consolidated financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining financial statements and schedules are fairly stated, in all material respects, in relation to the basic consolidated financial statements as a whole.

The introductory section and the statistical section have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, we will issue a separate report on our consideration of the State's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the State's internal control over financial reporting and compliance.

John Keel, CPA State Auditor

February 21, 2014

Management's Discussion and Analysis

The following is a discussion and analysis of the state of Texas' financial performance for the fiscal year ended Aug. 31, 2013. Use this section in conjunction with the state's basic financial statements. Comparative data is available and presented for this 2013 report.

Highlights

Government-wide

Net Position

The assets and deferred outflows of resources of the state of Texas exceeded its liabilities and deferred inflows of resources by \$158.6 billion as of Aug. 31, 2013, an increase of \$10.1 billion or 6.8 percent from fiscal 2012. The majority of the increase is primarily due to an increase of \$4.6 billion in unrestricted net position. The net position is comprised of \$74.4 billion in capital assets, net of related debt, \$65.5 billion in restricted, and \$18.7 billion in unrestricted.

Fund Level

Governmental Funds

As of Aug. 31, 2013, the state's governmental funds reported a combined ending fund balance of \$51.5 billion, an increase of \$7.3 billion or 16.6 percent from fiscal 2012, primarily due to an increase in taxes revenues. The state reported a positive unassigned fund balance of \$7.3 billion in fiscal 2013.

Proprietary Funds

The proprietary funds reported a net position of \$48.9 billion as of Aug. 31, 2013, an increase of \$2.1 billion or 4.5 percent from fiscal 2012, due to a combination of continued interest and investment income and a decrease in unemployment benefit payments.

Long-Term Debt

The state's total bonds outstanding increased by \$3 billion or 7.8 percent during fiscal 2013. This amount represents the net difference between net issuances, payments and refunding of outstanding bond debt. During fiscal 2013, the state issued bonds totaling \$6 billion. More detailed information regarding the government-wide, fund level and long-term debt activities can be found in the debt administration section of this management's discussion and analysis (MD&A).

Overview of the Financial Statements

The focus of this report is on reporting for the state as a whole and on the major individual funds. The report presents a more comprehensive view of the state's financial activities and makes it easier to compare the performance of Texas state government to that of other governments.

The Financial Section of this annual report presents the state's financial position and activities in four parts:

- MD&A (this part)
- The basic financial statements
- Required supplementary information other than MD&A
- Other supplementary information presenting combining statements and schedules

The report also includes statistical and economic data.

The basic financial statements include governmentwide financial statements, fund financial statements and notes to financial statements, which provide more detailed information to supplement the basic financial statements.

Reporting on the State as a Whole

The government-wide financial statements are designed to present an overall picture of the financial position of the state. These statements consist of the

statement of net position and the statement of activities, which are prepared using the economic resources measurement focus and the accrual basis of accounting. This means that all the current year's revenues and expenses are included, regardless of when cash is received or paid, producing a view of financial position similar to that presented by most private sector companies.

The statement of net position combines and consolidates the government's current financial resources with capital assets and long-term obligations. This statement includes all of the government's assets, deferred outflows of resources, liabilities and deferred inflows of resources.

Net position represents one measure of the state's financial health.

Other indicators of the state's financial health include the condition of its roads and highways (infrastructure) and economic trends affecting the state's future tax revenues.

The statement of activities focuses on both the gross and net cost of various activities (governmental, business-type and component units). These costs are paid by the state's general taxes and other revenues. This statement summarizes the cost of providing (or the subsidy provided by) specific government services and includes all current year revenues and expenses.

The government-wide statement of net position and the statement of activities divide the state's activities into the following three types.

Governmental Activities

The state's basic services are reported here, including general government; education; employee benefits; teacher retirement state contributions; health and human services; public safety and corrections; transportation; natural resources and recreation; and regulatory services. Taxes, fees and federal grants finance most of these activities.

Business-Type Activities

Activities for which the state charges a fee to customers to pay most or all of the costs of certain services it provides are reported as business-type activities. The state's institutions of higher education are included as business-type activities.

Component Units

Component units are legally separate organizations for which the state is either financially accountable or the nature and significance of their relationship with the state is such that exclusion would cause the state's financial statements to be misleading or incomplete. The state has 34 discretely presented component units. Financial information for these entities is presented separately in the supplemental statements and in the notes.

Reporting on the State's Most Significant Funds

Fund financial statements provide additional detail about the state's financial position and activities. Some information presented in the fund financial statements differs from the government-wide financial statements due to the perspective and basis of accounting used. Funds are presented on the fund-level statements as major or nonmajor based on criteria set by the Governmental Accounting Standards Board (GASB).

A fund is a separate accounting entity with a selfbalancing set of accounts. The state uses funds to keep track of sources of funding and spending related to specific activities.

Governmental Funds

A majority of the state's activity is reported in governmental funds. Reporting of these funds focuses on the flow of money into and out of the funds and amounts remaining at fiscal year-end for future spending.

Governmental funds are accounted for using the modified accrual basis of accounting, which measures

cash and other assets that can be readily converted to cash. The governmental fund financial statements provide a detailed short-term view of the state's general governmental operations and the basic services it provides. This information helps determine the level of resources available for the state's programs. The reconciliations following the fund financial statements explain the differences between the governmental activities column reported on the government-wide statement of net position and the government-wide statement of activities, and the governmental funds reported on the fund financial statements. The general fund, state highway fund and permanent school fund are reported as major governmental funds.

Proprietary Funds

When the state charges customers for services it provides, these activities are generally reported in proprietary funds. Services provided to outside (non-governmental) customers are reported in enterprise funds, a component of proprietary funds, and are accounted for using the economic resources measurement focus and the accrual basis of accounting. These are the same business-type activities reported in the government-wide financial statements, but are reported here to provide information at the fund level.

The employees life, accident and health insurance benefits fund is reported as an internal service fund and provides services on a cost reimbursement basis to other agencies of the financial reporting entity.

Colleges and universities, the unemployment trust fund and the lottery fund are reported as major proprietary funds.

Reporting on the State's Fiduciary Responsibilities

The state is the trustee or fiduciary for six defined benefit plans and one defined contribution plan. It is also responsible for other assets that can be used only for trust beneficiaries. All state fiduciary activities are reported in separate statements of fiduciary net position and changes in fiduciary net position. The activities are reported separately from other financial activities because the state cannot use the assets to finance its operations. The state's fiduciary responsibilities include ensuring that the assets reported in these funds are used for their intended purposes.

Financial Analysis of the State as a Whole

Net Position

Total assets of the state as of Aug. 31, 2013, were \$238.5 billion, an increase of \$7.1 billion or 3.1 percent. Total liabilities as of Aug. 31, 2013, were \$75 billion, a decrease of \$8.6 billion or 10.3 percent. Net position was affected by a number of factors. Cash and cash equivalents decreased by \$2.4 billion from fiscal 2012 and noncurrent investments increased by \$2.7 billion. Net capital assets increased by \$5 billion. The major components of this increase were additions to the state's highway system and college and university building and building improvement projects. Current liabilities decreased by \$12.8 billion, as \$9.8 billion in tax and revenue anticipation notes issued in the latter part of fiscal 2012 were retired. There was a decrease in unearned revenue of \$3.7 billion as well. The state's bonded indebtedness was \$40.8 billion, which included new issuances of \$6 billion in state bonds to finance new construction, housing, water conservation and other projects. Approximately \$3.3 billion in bonded debt was retired or refunded. Net position was \$158.6 billion in fiscal 2013, an increase of \$10 billion or 6.8 percent. Of the state's net position, \$74.4 billion was invested in capital assets, net of related debt, while \$65.5 billion was restricted by the state constitution or other legal requirements and was not available to finance day-to-day operations of the state. Unrestricted net position was \$18.7 billion. The majority of the net position increase is primarily due to an increase of \$4.6 billion in unrestricted net position.

Changes in Net Position

The state's net position as of Aug. 31, 2013, increased by \$10.1 billion. The state earned program revenues of \$80.5 billion and general revenues of \$51.1 billion, for total revenues of \$131.6 billion, an increase of \$1.6 billion or 1.3 percent from fiscal 2012. The major components of this increase were taxes revenues, which had an increase of \$3.8 billion and charges for services, with an increase of \$1.5 billion. Federal revenues decreased \$1.7 billion and interest and investment income decreased \$1.8 billion. These decreases offset \$3.8 billion gains in taxes revenues.

The expenses of the state were \$121.4 billion, an increase of \$878.3 million or 0.7 percent. The expense fluctuations in governmental activities are largely attributable to transportation services which increased \$900 million. In business-type activities there was a \$1.2 billion increase in education services which was offset by a decrease in health and human services of \$1.3 billion.

Further discussion of results for changes in the state's financial condition follows in the analysis of the state's funds. Operating grants and contributions decreased while tax collections increased, mostly due to the sales tax.

Governmental Activities

The governmental activities program revenue was \$51 billion, including charges for services of \$8.1 billion, operating grants and contributions of \$42.9 billion and capital grants and contributions of \$31.2 million. The largest change, a \$646.1 million increase, was for charges for services. Taxes had increases of \$3.8 billion from general revenue sources, with the largest increase in sales tax revenue.

Net Cost (Income) of the State's Governmental Activities

For the Fiscal Year Ended August 31, 2013 (Amounts in Thousands)

	Total Cost of Services	Net Cost (Income) of Services

Total	\$ 31,658,032	\$ 2,142,017

Governmental activities expenses were \$89.8 billion. All functions of governmental activities in the government-wide statement of activities have a net cost, except the regulatory services functions, which report slight surpluses. The education function and the health and human services function account for 78.2 percent of governmental activities expenses and 76.5 percent of the net cost. The tax collections of the state provide the primary source of funding, which when added to program revenues, support payment for governmental services.

Business-Type Activities

Business-type activities generated program revenue of \$29.5 billion, including charges for services of \$19.8 billion, operating grants and contributions of \$9.3 billion and capital grants and contributions of \$350.9 million. The total expenses for business-type activities were \$31.7 billion. The largest changes occurred in education, with a \$1.2 billion increase for colleges and universities, and in the health and human services function, where there was a decrease of \$1.3 billion in health and human services. There was a total gain from the government's business-type activities of \$2.2 billion in comparison to the prior year's gain of \$4.7 billion.

Financial Analysis of the State's Funds

Governmental Funds

As of Aug. 31, 2013, governmental funds reported fund balances of \$51.5 billion. The general fund reported a positive \$15 billion fund balance.

General Fund

The fund balance for the general fund as of Aug. 31, 2013, was \$15 billion, an increase of \$6.2 billion from fiscal 2012, mostly due to an increase in taxes revenues. The state constitution, state statute, and federal rule or bond covenants constrains \$6.4 billion. Included

in this is \$6.2 billion in the economic stabilization fund, commonly called "the rainy day fund." The unassigned fund balance was \$8 billion. Contributing to the higher balance was a decrease of \$1.5 billion in spending for education.

State Highway Fund

The fund balance for the state highway fund as of Aug. 31, 2013, was \$100.2 million, a decrease of \$752.8 million from \$852.9 million as of Aug. 31, 2012. Cash and cash equivalents decreased \$404.4 million as highway reconstruction and maintenance costs increased by \$800.4 million.

Permanent School Fund

The fund balance for the permanent school fund (PSF) as of Aug. 31, 2013, totaled \$30.6 billion, an increase of \$1.8 billion since Aug. 31, 2012. This increase was primarily attributable to an increase in valuation of investments of \$1.8 billion. Value in the fund provided \$1.3 billion in transfers to provide funding for public education. The PSF also supports the state's public school system through a bond guarantee program, where the PSF is pledged to guarantee bonds issued by Texas school districts, enhancing their credit rating. As of Aug. 31, 2013, a total of \$55.2 billion in school district bond issues were guaranteed.

Proprietary Funds

Proprietary funds reported net position of \$48.9 billion as of Aug. 31, 2013, an increase of \$2.1 billion from fiscal 2012. The state's public colleges and universities hold 89.8 percent of the reported net position in proprietary funds.

Colleges and Universities

Colleges and universities' net position as of Aug. 31, 2013, totaled \$43.9 billion, an increase of \$1.2 billion from Aug. 31, 2012. There were increases of

\$763.4 million and \$1.3 billion for both operating revenues and operating expenses, respectively, with an overall increase of \$509.6 million in operating loss.

Nonoperating interest and investment income of \$1.9 billion in fiscal 2013 accounted for most of the \$3 billion in total nonoperating revenues over expenses.

Stable market conditions produced positive investment returns. The permanent university fund increased its net assets by \$1.4 billion. Mineral income from the fund's land possessions decreased \$98 million. This endowment fund contributes to the support of 24 institutions in the University of Texas System and the Texas A&M University System.

Unemployment Trust Fund

The unemployment trust fund reports activity related to the administration of statewide unemployment benefits in proprietary funds. The funds reported a net position of \$677.3 million as of Aug. 31, 2013, an increase of \$647.9 million from \$29.3 million as of Aug. 31, 2012. During fiscal 2013, unemployment taxes collected decreased \$145.1 million from \$2.9 billion in 2012 and federal contributions decreased \$1.3 billion from \$2.7 billion in 2012. Benefit payments dropped \$1.2 billion as the unemployment rate dropped to 6.4 percent from 7.3 percent in 2012.

Lottery Fund

The Texas Lottery Commission operates on-line and instant ticket lottery games to generate revenue for the state's foundation school fund. The lottery fund had a net position of \$58.5 million as of Aug. 31, 2013, as compared to \$149.1 million at the end of fiscal 2012. Lottery collections for the fiscal year ended Aug. 31, 2013, totaled \$4.4 billion, an increase of \$185.2 million from fiscal 2012. Distributions to state agencies totaled \$1.2 billion for fiscal 2013 compared to \$1.1 billion for 2012, an increase of 5.1 percent.

The lottery fund's short and long-term investments approximated \$887 million. The lottery fund's liabilities include amounts owed to the state's foundation school fund for August accrued sales for fiscal 2013, and for investment purchases, vendor payables and prize payment obligations.

Fiduciary Funds

Fiduciary funds reported \$159.6 billion in net position as of Aug. 31, 2013, an increase of \$8 billion from \$151.6 billion in fiscal 2012, a 5.3 percent increase.

Pension and Other Employee Benefit Trust Funds

Total net position for pension and other employee benefit trust funds was \$142 billion, an increase of \$6.9 billion from the \$135.1 billion reported in fiscal 2012. The majority of plan assets are held as investments for the pension funds. Additions from all sources increased \$2.9 billion from fiscal 2012, while benefit payments increased \$589.6 million. Increases in additions are due primarily to more favorable conditions in the financial markets and legislative increases to state contributions. The return for investments for the state's two largest pension systems, the Teacher Retirement System of Texas, was 9 percent and 10.1 percent, respectively, compared to the previous year's returns of 7.6 and 8.2 percent.

External Investment Trust Fund

The Texas Treasury Safekeeping Trust Company administers and invests funds belonging to state and local entities as well as provides direct access to services of the Federal Reserve System. The Treasury Safekeeping Trust Fund (Trust Fund) is the only external invest-

ment trust fund of the state. The Trust Fund reported a total net position of \$14.5 billion in fiscal 2013, an increase of \$941.1 million from fiscal 2012. The increase in net position is due to increase in participant investments by local government entities.

Private-Purpose Trust Funds

Total net position for private-purpose trust funds was \$3.1 billion in fiscal 2013, an increase of \$201.9 million from fiscal 2012. Additions from all sources of \$611.7 million exceeded total deductions of \$409.8 million. The net increase of \$201.9 million is an increase of 145.5 percent from the net increase of \$82.2 million in fiscal 2012.

Budgetary Highlights

Variances for the General Fund

The differences from original and final revenue budgets are due to both economic and legislative reasons.

Budget mechanisms allow budget revisions for certain revenues when collections exceed the original budget. Accordingly, major revisions were made to both total revenues and expenditures for a net change of \$10.6 billion.

There was a negative \$6.9 billion variance between the actual and final budget revenues. The largest negative revenue variances occurred with taxes and federal revenues, reporting \$3.2 billion and \$2.2 billion differences, respectively.

The largest negative expenditure variances related to the health and human services function and the education function.

Capital Assets and Debt Administration

Capital Assets

As of Aug. 31, 2013, the state had \$107.8 billion in net capital assets. This total represents an increase of \$3.5 billion in infrastructure capital assets or 5.7 percent from fiscal 2012. Included in this amount are additions to the state's highway system of \$3.1 billion by the Texas Department of Transportation (TxDOT). Institutions of higher education also added \$639.5 million to buildings and building improvements.

To ensure future availability of essential services and to finance highway capital improvements, TxDOT made commitments for construction contracts, comprehensive development agreements and pass-through toll agreements totaling an estimated \$27.6 billion. These commitments extend beyond the end of the fiscal year and represent future costs to the state. This amount is not recognized as a liability because the terms of the contracts or agreements were not met and benefits were not received as of the end of fiscal 2013.

Note 2 provides detail about the state's capital assets and Note 15 details the state's significant commitments related to future capital expenditures.

Infrastructure Assets

The value of the state's infrastructure assets is included in the governmental activities column of the government-wide statement of net position.

The state accounts for its system of roads and high-ways using the modified approach. TxDOT developed a system of management, the Texas Maintenance Assessment Program (TxMAP), designed to maintain the service delivery potential of the state's roads and highways to near perpetuity.

The state's policy is to maintain its interstate highways at a condition level of 80 percent, its non-interstate highways (farm-to-market and other road systems) at a condition level of 75 percent and its Central Texas Turnpike System at a condition level of 80 percent. The condition assessment results for fiscal 2013 reflect condition levels of 80.3 percent (82 percent in fiscal 2012) for the interstate system, 77.4 percent (77.7 percent for fiscal 2012) for the non-interstate system and 85.1 percent (86.2 percent for fiscal 2012) for the Central Texas Turnpike System.

In fiscal 2013, the estimated maintenance expenditures required to maintain the highway system at or above the adopted condition levels for interstate highways were \$277.8 million, \$2.6 billion for the non-interstate system and \$14 million for the Central

Texas Turnpike System. Actual expenditures were \$304 million for the interstate system, \$2.1 billion for the non-interstate system and \$13.1 million for the Central Texas Turnpike System. Additional information on the state's road and highway infrastructure is presented in the financial section's required supplementary information other than MD&A.

Debt Administration

The state of Texas issues both general obligation bonds and revenue bonds. Each series of revenue bonds is backed by the pledged revenue source and restricted funds specified in the bond resolution. Most revenue bonds are designed to be self-supporting from a primary revenue source related to the program financed.

The state's general obligation bond issues were rated Aaa by Moody's Investors Service, AAA by Standard & Poor's and AAA by Fitch Ratings as of August 2013. During fiscal 2013, Texas' state agencies and institutions of higher education issued \$6 billion in state bonds to finance new construction, transportation, housing, water conservation and treatment, and other projects. General obligation debt accounted for \$1.7 billion of state bonds issued in fiscal 2013. This debt, which can only be authorized by a constitutional amendment, carries the full faith and credit of the state. The remaining \$4.3 billion is due to new issuances of revenue bonds, which are serviced by the revenue flows of individual entity projects. Bonds retired during the year were composed of \$488.4 million in general obligation bonds and \$877.2 million in revenue bonds. Also, \$196.7 million in general obligation bonds and \$1.7 billion in

revenue bonds were refunded. The total outstanding general obligation debt of the state after new issuances, retirements and refundings as of Aug. 31, 2013, was \$15.8 billion. This represents an increase of \$1.2 billion or 8.4 percent from fiscal 2012. An additional \$16.2 billion of general obligation bonds were authorized but are unissued. Total revenue bonds outstanding were \$25.1 billion, which is an increase of \$1.8 billion or 7.5 percent from fiscal 2012. The net increase of \$1.8 billion for revenue bonds includes issuances of \$2.9 billion for the Grand Parkway Transportation Corporation, a blended component unit of TxDOT. Note 5 discloses the details on the state's long-term liabilities and Note 6 provides detailed information on the state's bonded indebtedness.

Economic Condition

In 2013 the Texas economy continued its post-recession expansion, adding 274,200 nonfarm jobs over the 12 month period ending November 2013, an increase of 2.5 percent. Private sector employment grew by 2.8 percent, while government employment (federal, state and local combined) grew by 0.8 percent. In addition to adding more jobs than any state over the 12 month period, Texas had the lowest unemployment rate among the 10 most populous states as of November 2013. The comparatively vibrant economic conditions during a slow national recovery have resulted in an influx of new residents into Texas, adding an estimated 169,000 net new residents during the year. Even with the growing labor force, the Texas economy produced sufficient jobs to allow the unemployment rate to fall

August 31, 2013 and 2012 (Amounts in Thousands)

Governmental Activities		Business-Type Activities		Total Primar	y Government
2013	2012	2013	2012	2013	2012
\$ 12,089,019	\$ 11,314,325	\$ 3,669,914	\$ 3,229,549	\$ 15,758,933	\$ 14,543,874

from 6.3 percent in November 2012 to 6.1 percent in November 2013. The Texas unemployment rate has remained below the national rate since January 2007 and is expected to continue to do so.

Personal income in Texas grew by 4.9 percent from the third quarter of 2012 to the third quarter of 2013, according to the U.S. Bureau of Economic Analysis. This was the fifth highest rate of growth among all states, exceeded only by the less-populated states of North and South Dakota, Delaware and Utah. Personal income growth for the nation as a whole was 3.6 percent over this period.

Contacting the State's Financial Management

This financial report is designed to provide the state's citizens, taxpayers, customers, investors and creditors with a general overview of the state's finances and to demonstrate the state's accountability for the money it receives. If you have questions about this report or need additional financial information, contact the Financial Reporting section of the Texas Comptroller of Public Accounts at 111 E. 17th Street, Austin, Texas 78774.

The accompanying notes to the financial statements are an integral part of this statement.

Reconciliation of the Governmental Funds Balance Sheet to the Statement of Net Position

August 31, 2013 (Amounts in Thousands)

Total Fund Balance – Go	vernmental Funds
-------------------------	------------------

\$ 51,492,773

Amounts reported for governmental activities in the statement of net position are different because:

Capital assets less accumulated depreciation and amortization are included in the statement of net position. (Note 2)

Capital Assets – Non-Depreciable or Non-Amortizable	\$ 69,972,515
Capital Assets – Depreciable or Amortizable, Net	12,187,255

Deferred charges for unamortized bond issuance cost are not current financial resources and are not reported in the funds.

32,103

82,159,770

Some of the state's revenues will be collected after year-end but are not available soon enough to pay current year's expenditures and therefore are deferred in the funds.

1,213,340

Deferred revenues reported in the governmental funds related to the up-front payments received via the service concession arrangements (SCAs) are reported as deferred inflows of resources in the statement of net postion in accordance with GASB 60.

3,245,415

Deferred inflows of resources are reported in the statement of net position to reflect the unamortized up-front payments received and capital assets acquired in connection with the SCAs. (Note 27)

(5,254,633)

Long-term liabilities applicable to the state's governmental activities are not due and payable in the current period and accordingly are not reported in the funds. These liabilities, however, are included in the statement of net position. (Note 5 and Note 9)

Claims and Judgments	(128,283)	
Capital Lease Obligations	(2,388)	
Employees' Compensable Leave	(735,628)	
Notes and Loans Payable	(1,527,847)	
General Obligation Bonds Payable	(12,089,019)	
Revenue Bonds Payable	(4,099,579)	
Pollution Remediation Obligation	(229,047)	
Net Pension Obligation	(4,295,392)	
		(23,107,183) *

^{*} current portion = \$1,385,449 and noncurrent portion = \$21,721,734

Interest payable applicable to the state's governmental activities are not due and payable in the current period and accordingly are not reported in the funds. These liabilities, however, are included in the statement of net position.

(366,137)

The internal service fund is used by management to charge the costs of employees life, accident and health insurance benefits fund to individual funds. Since governmental activities are the predominant activities of internal service funds, the assets and liabilities of the internal service funds are included in governmental activities in the statement of net position.

325,412

The accompanying notes to the financial statements are an integral part of this statement.

Reconciliation of the Governmental Funds Statement of Revenues, Expenditures and Changes in Fund Balances to the Statement of Activities

For the Fiscal Year Ended August 31, 2013 (Amounts in Thousands)

Net Change in Fund Balances

\$ 7.347.194

Amounts reported for governmental activities in the statement of activities are different because:

Governmental funds report capital outlays as expenditures. In the statement of activities, however, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. The amount by which capital outlay exceeds depreciation in the current period is:

Capital Outlay	\$ 3,510,995
Depreciation Expense (Note 2)	(966,544)
Amortization Expense (Note 2)	(41,338)

2,503,113

The effect of various miscellaneous transactions involving capital assets (i.e., sales and trade-ins) is to decrease net position.

(16,848)

Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the funds.

(1,674,298)

The internal service fund is used by management to charge the costs of the employees life, accident and health insurance benefits fund to individual funds. The adjustments for the internal service fund "close" the fund by allocating these amounts to participating governmental activities.

40,598

Bond proceeds provide current financial resources to governmental funds, but increase long-term liabilities in the statement of net position. Repayment of long-term debt consumes current financial resources and is an expenditure in the governmental funds, but reduces long-term liabilities in the statement of net position.

Bonds and Notes Issued	(1,240,957)
Premiums on Bond Proceeds	(199,554)
Increase in Obligations Under Capital Leases	(822)
Repayment of Bond and Capital Lease Principal	819,736

Some expenses reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds.

754,302

(621,597)

Transfers of capital assets are not reported in the governmental funds. In addition, resource flows between fiduciary funds and governmental funds are converted to revenues or expenses on the statement of activities.

Capital Asset Transfers	(229,468)
Increase in Revenues	27
Increase in Expenses	(26,047)
Net Change in Transfers	26,020

(229,468)

Change in Net Position of Governmental Activities

\$ 8,102,996

Note 1

Summary of Significant Accounting Policies

BASIS OF PRESENTATION

The accompanying financial statements of the state of Texas were prepared in conformance with generally accepted accounting principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB). The state implemented five GASB statements in fiscal 2013.

GASB Statement No. 60, Accounting and Financial Reporting for Service Concession Arrangements, addresses the issues related to service concession arrangements (SCAs). As used in this statement, an SCA is an arrangement between the transferor (a government) and an operator (governmental or nongovernmental) in which the transferor conveys to an operator the right and related obligation to provide services through the use of infrastructure or another public asset (a facility) in exchange for significant consideration and the operator collects and is compensated by fees from third parties.

GASB Statement No. 61, *The Financial Reporting Entity*, amends Statement No. 14, *The Financial Reporting Entity* and Statement No. 34, *Basic Financial Statements — and Management's Discussion and Analysis — for State and Local Governments*. This statement modifies certain requirements for inclusion of component units in the financial reporting entity by adding the benefit or burden requirement relationship between the primary government and an outside organization. The statement clarifies and amends the criteria in determining whether an outside organization should be included as a component unit because it would be "misleading to exclude" from the primary government's financial statements. The statement also amends the criteria for reporting blended component units.

GASB Statement No. 62, Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 FASB and AICPA Pronouncements, incorporates certain accounting and financial reporting guidance issued on or before Nov. 30, 1989, into GASB's authoritative literature from the following that does not contradict or conflict with GASB pronouncements:

- Financial Accounting Standards Board (FASB) Statements and Interpretations
- Accounting Principles Board Opinions
- Accounting Research Bulletins of the American Institute of Certified Public Accountants'
 (AICPA) Committee on Accounting Procedure

This statement supersedes GASB Statement No. 20, Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities that Use Proprietary Fund Accounting, eliminating the election for enterprise funds and business-type activities to apply after Nov. 30, 1989, FASB statements and interpretations that do not conflict with or contradict GASB pronouncements. However, governments can apply guidance from FASB pronouncements issued after Nov. 30, 1989 that do not conflict with or contradict GASB pronouncements as "other accounting literature." Generally, the provisions of GASB 62 are required to be applied retroactively.

GASB Statement No. 63, Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources and Net Position, amends GASB Statement No. 34, Basic Financial Statements – and Management's Discussion and Analysis – for State and Local Governments, by providing guidance for reporting deferred outflows of resources, deferred inflows of resources and net position in a statement of financial position.

GASB Statement No. 69, Government Combinations and Disposals of Government Operations, was implemented in fiscal 2013 earlier than scheduled due to Texas A&M University's acquisition of the Texas Wesleyan University Law School. This statement establishes

accounting and financial reporting standards related to disposals of government operations and government combinations referred to as mergers, acquisitions and transfer of operations. The statement requires the use of carrying values to measure the assets and liabilities in a government merger when there is no exchange of significant consideration. In government acquisitions when there is an exchange of significant consideration, this statement requires measurement of assets acquired and liabilities assumed generally to be based on their acquisition values. For transfer of operations that do not constitute entire legally separate entities and where no significant consideration is exchanged, this statement requires the use of carrying values to measure the assets and liabilities.

FINANCIAL REPORTING ENTITY

For financial reporting purposes, the state of Texas includes all funds, agencies, boards, commissions, authorities, institutions of higher education and other organizations that comprise its legal entity. The reporting entity also includes legally separate organizations for which the state is financially accountable and any other organizations that would cause the financial statements to be misleading or incomplete if they were excluded. All activities considered part of the state are included. These activities provide a range of services in the areas of:

- General government
- Education
- Employee benefits
- Teacher retirement state contributions
- Health and human services
- Public safety and corrections
- Transportation
- Natural resources and recreation
- Regulatory services

The reporting entity for the state is in accordance with the criteria established by GASB. Note 19 provides

a listing and brief summary of the component units and their relationship to the state of Texas. These financial statements present the balances and activities of the state of Texas (the primary government) and its component units.

The state's public school districts and junior and community colleges are excluded from the reporting entity. The state is not financially accountable for these entities. They are legally separate entities that are fiscally independent of the state. This independence warrants their exclusion from the financial statements.

FINANCIAL REPORTING STRUCTURE

The basic financial statements include government-wide financial statements and fund financial statements. The reporting model based on GASB Statement No. 34, Basic Financial Statements – and Management's Discussion and Analysis – for State and Local Governments, focuses on the state as a whole in the government-wide financial statements and major individual funds in the fund financial statements.

Government-wide Financial Statements

The government-wide financial statements (statement of net position and statement of activities) display information about the state as a whole and the change in aggregate financial position resulting from the activities of the fiscal period, except for its fiduciary activities. These statements include separate columns for the governmental and business-type activities of the state (including its blended component units), and its discretely presented component units. In the statement of net position, both the governmental and business-type activities columns are presented on a consolidated basis by column using an economic resources measurement focus and an accrual basis of accounting, which incorporates noncurrent investments, capital assets, and long-term debt and obligations.

The statement of activities reflects both the gross and net cost per functional category (public safety and corrections, transportation, etc.), which is supported by general government revenues (sales and use taxes, franchise taxes, etc.). In the statement of activities, program revenues are netted against program expenses, including depreciation and amortization, to present the net cost of each program. Program revenues are directly associated with the function or with a business-type activity. Internally dedicated resources are reported as general revenues rather than program revenues. Certain general government administrative overhead expenses are charged to the various functions of the state. These charges are paid from applicable funding sources and are reflected as direct expenses.

Program revenues include charges for services; operating grants and contributions; and capital grants and contributions. Charges for services include special assessments and payments made by parties outside of the state's citizenry if that money is restricted to a particular program. Operating grants include operating-specific and discretionary (either operating or capital) grants while capital grants reflect capital-specific grants. Multipurpose grants that provide financing for more than one program are reported as program revenue if the amounts restricted to each program are specifically identifiable. Multipurpose grants that do not provide for specific identification of the programs and amounts are reported as general revenues.

Fiduciary funds are presented in the fund financial statements by type (pension and other employee benefit trust, external investment trust, private-purpose trust and agency). The assets of fiduciary funds are held for the benefit of others and cannot be used to address activities or obligations of the government. They are therefore not incorporated into the government-wide financial statements.

Fund Financial Statements

The fund financial statements are presented after the government-wide financial statements. They display information about major funds individually and in the aggregate for governmental and proprietary funds. In governmental and fiduciary funds, assets and liabilities are presented in order of relative liquidity. In proprietary funds, assets and liabilities are presented in a classified format that distinguishes between all current and noncurrent assets and liabilities. Current assets in the classified format are those considered available for appropriation and expenditure. Examples of expendable financial resources include cash, various receivables and short-term investments not restricted for specific purposes. All other assets are considered noncurrent. Current liabilities are obligations to be paid within the next fiscal year. Examples include payables and the current portion of long-term liabilities.

The major governmental funds in the fund financial statements are presented on a current financial resources measurement focus and modified accrual basis of accounting. This presentation is deemed most appropriate to demonstrate compliance with legal and covenant requirements, the source and use of financial resources, and how the state's actual results of activities conform to the budget. A reconciliation between the governmental fund financial statements and the governmental activities column of the government-wide financial statements is presented since a different measurement focus and basis of accounting is used. The reconciliation explains the adjustments required to convert the fund-based financial statements.

The state uses funds to report its financial position and the results of its operations. Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain government functions or activities. A fund is a separate accounting entity with a self-balancing set

of accounts. State transactions are recorded in the fund types described below.

Governmental Fund Types

Governmental funds focus on the sources and uses of funds. Included in the governmental fund financial statements are general, special revenue, debt service, capital projects and permanent funds. The general fund is the principal operating fund used to account for most of the state's general activities. It accounts for all financial resources except those accounted for in other funds. Special revenue funds account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes other than debt service or capital projects. Debt service funds are used to account for and report financial resources that are restricted, committed or assigned to expenditure for principal and interest. Capital projects funds are used to account for and report financial resources that are restricted, committed or assigned to expenditure for capital outlays, including the acquisition or construction of capital facilities and other capital assets. Capital projects funds exclude those types of capital-related outflows financed by proprietary funds or for assets that will be held in trust for individuals, private organizations or other governments. Permanent funds are used to report resources legally restricted to the extent that only earnings, and not principal, may be used for purposes that support the state's programs.

The state's major governmental funds are listed below.

The **General Fund** is the primary operating fund for the state and includes transactions for general government, education, employee benefits, teacher retirement state contributions, health and human services, public safety and corrections, transportation, natural resources and recreation, and regulatory services.

The **State Highway Fund**, a special revenue fund, receives funds allocated by law for public road construc-

tion, maintenance, monitoring and law enforcement of the state's highway system.

The **Permanent School Fund** is an investment fund consisting of land and proceeds from the sale of land that establishes a perpetual provision for the support of the public schools of Texas. All dividends and other income are allocated to the credit of the available school fund.

Proprietary Fund Types

Proprietary funds focus on determining operating income, changes in financial position and cash flows. Generally accepted accounting principles similar to those used by private sector businesses are applied in accounting for these funds. Included in proprietary fund financial statements are enterprise funds and an internal service fund.

Enterprise funds are used to report any activity for which a fee is charged to external users for goods or services. Activities must be reported as enterprise funds if any one of the following criteria is met:

- The activity is financed with debt secured solely by a pledge of the net revenues from fees and charges of the activity.
- Laws or regulations require the activity's costs
 of providing services, including capital costs
 (such as depreciation, amortization or debt service), be recovered with fees and charges.
- The pricing policies of the activity establish fees and charges designed to recover its costs, including capital costs.

Internal service funds are used to report any activity that provides goods or services, on a cost reimbursement basis, to other funds, departments or agencies of the reporting entity or other governments. The employees life, accident and health insurance benefits fund accounts for the services provided to state of Texas agencies and institutions of higher education that participate in the Texas Employees Group Benefits Program.

The major enterprise funds for the state are listed below.

The Colleges and Universities include:

- University of Texas System
- Texas A&M University System
- Texas Tech University System
- University of Houston System
- Texas State University System
- University of North Texas System
- Texas Woman's University
- Stephen F. Austin State University
- Texas Southern University
- Midwestern State University
- Texas State Technical College

These institutions of higher education are represented as a single column in the proprietary fund financial statements and individually in the schedules of colleges and universities in the other supplementary information section of this report.

The **Unemployment Trust Fund** contains the activity of the state related to the administration of state and federally financed unemployment benefits.

The **Lottery Fund** receives fees from external users that are used to operate the state lottery, finance debt and make investments to meet future installment obligations to prize winners.

Fiduciary Fund Types

Fiduciary funds account for assets held in either a trustee capacity or as an agent for individuals, private organizations, other governmental units and/or other funds. When assets are held under the terms of a formal trust agreement, either a pension trust fund or a private-purpose trust fund is used.

Pension and other employee benefit trust funds report resources held in trust for the members and beneficiaries of defined benefit pension plans. External investment trust funds report the external portions of investment pools reported by the sponsoring government.

Private-purpose trust funds report all other trust arrangements whose principal and interest benefit individuals, private organizations or other governments. These trusts include tobacco settlement money, reserve for insurance company liquidations, relief of catastrophic insurance losses, contributions of prison inmates, educational savings plans and others.

Agency funds report assets the state holds on behalf of others in a purely custodial capacity. Agency funds involve only the receipt and remittance of fiduciary resources to individuals, private organizations or other governments. Agency funds include those funds established to account for the collection of sales and use tax for distribution to localities, bond escrow funds, deposits of insurance carriers, child support collections and other miscellaneous accounts.

Component Units

All component units of the state of Texas are reported as nonmajor component units. The combining statement of net position – component units and the combining statement of activities – component units are presented for all discrete component units.

Additional information about blended and discretely presented component units can be found in Note 19. More detailed information of the individual component units is available from the component units' separately issued financial statements.

BASIS OF ACCOUNTING, MEASUREMENT FOCUS AND FINANCIAL STATEMENT PRESENTATION

Government-wide financial statements are presented using the economic resources measurement focus and the accrual basis of accounting. Under the economic resources measurement focus, all economic resources

and obligations of the reporting entity, both current and noncurrent, are reported. Under the accrual basis of accounting, revenues, expenses, gains, losses, assets and liabilities resulting from exchange and exchange-like transactions are recognized when the exchange takes place. Revenues, expenses, gains, losses, assets and liabilities resulting from non-exchange transactions are recognized in accordance with GASB Statement No. 33, Accounting and Financial Reporting for Non-exchange Transactions.

The accounting and financial reporting treatment applied to a fund is determined by its measurement focus. Governmental funds use the flow of current financial resources measurement focus and the modified accrual basis of accounting. With this measurement focus, generally only current assets and current liabilities are included on the balance sheet. Operating statements of these funds present increases (i.e., revenues and other financing sources) and decreases (i.e., expenditures and other financing uses) in net current assets.

Under the modified accrual basis of accounting, revenues are recognized in the period in which they become both measurable and available to finance operations of the fiscal year or liquidate liabilities existing at fiscal year-end. The state of Texas considers all major revenue (i.e., operating grants and contributions and taxes) reported in the governmental funds to be available if the revenues are due at fiscal year-end and collected within 60 days thereafter.

In the governmental fund financial statements, revenues that are earned but not expected to be collected within 60 days are not available to liquidate the liabilities of the current period and are reported as deferred revenue. Deferred revenue also includes unearned revenue when cash or other assets are received prior to being earned.

Under the accrual basis of accounting, as used in the government-wide financial statements, proprietary fund financial statements and fiduciary fund financial statements, unearned revenue is recorded when cash or other assets are collected in advance before the revenue recognition criteria are met. Revenues are recognized when earned and expenses are recognized at the time liabilities are incurred. Amounts paid to acquire capital assets are capitalized as assets rather than reported as expenditures. Proceeds of long-term debt are recorded as liabilities rather than other financing sources. Amounts paid to reduce long-term indebtedness of the state are reported as reductions of the related liabilities rather than expenditures.

Proprietary funds distinguish operating from nonoperating items. Operating revenues and expenses result from providing services or producing and delivering goods in connection with the proprietary funds' principal ongoing operations. Operating expenses for enterprise and internal service funds include the cost of sales and services, administrative expenses, and capital asset depreciation and amortization. Revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

Although agency funds use the accrual basis of accounting, they do not have a measurement focus because they do not recognize revenues and expenses.

Budgetary Information

The budgetary comparison schedule and the notes to the budgetary comparison schedule are in the required supplementary information other than management discussion and analysis (MD&A) section. The budgetary comparison schedule presents the original budget, the final budget and the actual activity of the major governmental funds. Reconciliations for the general fund and the state highway fund budgetary basis to the GAAP basis are presented as required supplementary information with explanations of the reconciling items. Budgetary information for nonmajor governmental funds is presented as other supplementary information. The governmental funds with legally

adopted annual budgets are the general fund, the state highway fund and the other nonmajor special revenue funds listed in other supplementary information.

Cash and Cash Equivalents

For reporting purposes, this account includes cash on hand, cash in transit, cash in local banks, cash in the federal and state treasuries, and cash equivalents. Cash in local banks is primarily held by agency funds, employee benefit trust funds, enterprise funds and component units. Cash balances of most state funds are pooled and invested by the Treasury Operations Division of the Comptroller's office. Interest earned is deposited in the general revenue fund and specified funds designated by law.

The statement of cash flows for proprietary funds presents the change in cash and cash equivalents during the fiscal year. Cash equivalents are defined as short-term, highly liquid investments that are both readily convertible to known amounts of cash and so near maturity they present insignificant risk of a decrease in value due to changes in interest rates. Investments with an original maturity of three months or less and used for cash management rather than investing activities are considered cash equivalents. Restricted securities held as collateral for securities lending are not included as cash equivalents on the statement of cash flows.

Investments

Investments are reported at fair value in the balance sheet or other statements of net financial position. Fair value is the amount at which an investment could be exchanged in a current transaction between willing parties other than in a forced or liquidation sale or through consultation with industry advisors. Certain money market investments may be reported at amortized cost provided the investment has a remaining maturity of one year or less at date of purchase. All investment income, including changes in the fair value of invest-

ments, is recognized as revenue in the operating statement or statement of activities.

Receivables and Payables

The major receivables for governmental activities are federal and taxes receivables. The major receivables for business-type activities are federal, patient and tuition receivables. Receivables represent amounts due to the state as of Aug. 31, 2013, from private persons or organizations. Amounts expected to be collected within the next fiscal year are classified as current and amounts expected to be collected beyond the next fiscal year are classified as noncurrent. All receivables are recorded net of allowances for uncollectible accounts.

Taxes receivable represent amounts earned in fiscal 2013 that will be collected sometime in the future. In the government-wide financial statements, a corresponding amount is recorded as revenue. In the governmental fund financial statements, the portion considered available is recorded as revenue; the remainder is recorded as deferred revenue. Taxes receivable are estimated based on collection experience. Tax refunds payable represent amounts owed to taxpayers for overpayments or amended tax returns. See Note 24 for details on taxes receivable and tax refunds payable.

Other receivables in the general fund consist primarily of program receivables for health care assistance and supplemental nutrition assistance. Other receivables in the colleges and universities fund consist primarily of public university fund land income and healthcare contractual agreements. Activities between funds that represent lending/borrowing arrangements outstanding at the end of the fiscal year are interfund loans. All other outstanding balances between funds are reported as due from/due to other funds. Any residual balances between governmental and business-type activities are reported in the government-wide financial statements as "internal balances."

Noncurrent interfund receivables in the general fund, as shown in Note 12, are reported as nonspendable fund balance. Noncurrent interfund receivables in other governmental funds are reported as committed, restricted or assigned fund balance.

Investment trade receivables are reported for sales of investments pending settlement. Investment trade payables are purchases of investments pending settlement.

Inventories and Prepaid Items

Inventories include both merchandise inventories on hand for sale and consumable inventories. Inventories are valued at cost generally utilizing the last-in, first-out method.

The consumption method of accounting is used to account for inventories and prepaid items that appear in both governmental and proprietary fund types. The costs of inventories are expensed when they are consumed. Prepaid items reflect payments for costs applicable to future accounting periods and are recorded in both government-wide financial statements and fund financial statements.

Restricted Assets

Restricted assets include monies or other resources restricted by legal or contractual requirements. These assets include certain proceeds of enterprise fund general obligation and revenue bonds, as well as certain revenues, set aside for statutory or contractual requirements. Assets held in reserve for guaranteed student loan defaults are also included.

Capital Assets

Capital assets are reported in proprietary funds, fiduciary funds and on the government-wide financial statements. The capitalization threshold and the estimated useful life of the assets vary depending upon the asset type. Note 2 includes a table identifying the capitalization threshold and the estimated useful life by

asset type. It also provides information on the state's depreciation/amortization policy and other detailed information.

The state adopted the modified approach for reporting its highway system. This approach reflects a reasonable value of the asset and cost required to maintain the service potential at established minimum standards in lieu of depreciation. The state developed and implemented an asset management system that establishes minimum standards and makes a yearly determination whether the minimum standards are being met. Disclosures of the minimum standards and the current status of the state's system of highways are included in the required supplementary information other than MD&A section of this report.

Long-Term Liabilities

Reporting long-term liabilities in the statement of net position requires two components – the amount due within one year (current) and the amount due in more than one year (noncurrent).

General long-term liabilities consist of claims and judgments, capital lease obligations, employees' compensable leave and other noncurrent liabilities. General long-term liabilities are not reported as liabilities in governmental funds but are reported in the governmental activities column in the government-wide statement of net position. The state reports rebatable arbitrage in claims and judgments. General long-term debt is not limited to liabilities arising from debt issuances, but may also include noncurrent liabilities on lease-purchase agreements and other commitments that are not current liabilities.

In the government-wide financial statements and proprietary fund financial statements, bond premiums, discounts and issuance costs are deferred and amortized over the life of the bonds using the straight-line, bonds outstanding or effective interest method. Bonds payable are reported net of the applicable bond accretion, pre-

mium or discount. Deferred issuance costs are reported as deferred charges and amortized over the term of the debt.

In the governmental fund financial statements, bond premiums, discounts and bond issuance costs are recognized during the current period. The face amount of the debt issued is reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

Employees' Compensable Leave Balances

Annual leave, commonly referred to as vacation leave, and other compensated absences with similar characteristics are accrued as a liability as the benefits are earned by the employee. Benefits are earned when the employee's right to receive compensation is attributable to services already rendered and it is probable the employer will compensate the employee for the benefits through paid time off or some other means, such as cash payments at termination or retirement. Employees accrue vacation time at a rate of eight to 21 hours per month depending on years of employment. The maximum number of hours that can be carried forward to the next fiscal year ranges from 180 hours to 532 hours based on years of service.

Overtime under the federal Fair Labor Standards Act and state laws can be accumulated in lieu of immediate payment as compensatory leave (at one-and-one-half hours for each overtime hour worked) for nonexempt, nonemergency employees to a maximum of 240 hours. All overtime exceeding 240 hours must be paid with the next regular payroll. At termination or death, all overtime balances must be paid in full. For emergency personnel (firefighters, law enforcement, prison officers, etc.), overtime can be accumulated to a maximum of 480 hours. Unused overtime is included in the calculation of current and noncurrent liabilities because

each employee may be paid for the overtime or use it as compensatory time.

Compensatory leave is allowed for exempt employees not eligible for overtime pay. This leave is accumulated on an hour-for-hour basis and must be taken within one year from date earned or it lapses. There is no death or termination benefit for compensatory leave and it is nontransferable. Compensatory leave is reported as a current liability.

Sick leave is accrued at a rate of eight hours per month with no limit on the amount that can be carried forward to the next fiscal year. Accumulated sick leave is not paid at employee termination, although an employee's estate may be paid for one-half of the accumulated sick leave to a maximum of 336 hours. In 2009, the 81st Legislature passed House Bill 2559, which does not allow employees hired on or after Sept. 1, 2009, to apply unused sick or annual leave as service credit to meet retirement eligibility. State employees hired before Sept. 1, 2009, are entitled to service credit in the retirement system for unused sick leave on the last day of employment. The maximum amount of the state's contingent obligation for sick leave was not determined. The probability of a material impact on state operations in any given fiscal year is considered remote.

Capital Lease Obligations

Capital lease contracts payable, which are not funded by current resources, represent the liability for future lease payments under capital lease contracts. Note 8 provides details for capital lease obligations.

Conduit Debt Obligations

Conduit debt issued by the state in the form of bonds is for the express purpose of providing capital financing for a specific third party that is not part of the state's financial reporting entity. The bonds are secured by the property financed and are payable solely from payments received from the third party on the underlying loans. The state has no obligations for the debt beyond the resources provided by the loan with the third party on whose behalf the bonds were issued. The state has chosen to continue reporting conduit debt obligations as long-term liabilities on the balance sheet for debt issued prior to GASB Interpretation No. 2, Disclosure of Conduit Debt Obligations, an Amendment of NCGA Statement 1, as well as subsequent debt obligations that are substantially the same as those already reported. Interpretation 2, which was effective for Texas beginning Sept. 1, 1996, requires only note disclosure for issuance of all other conduit debt. Note 6 provides details on conduit debt obligations.

Deferred Outflows of Resources and Deferred Inflows of Resources

Deferred outflows of resources and deferred inflows of resources are defined in GASB Concept Statement No. 4, *Elements of Financial Statements*, as the acquisitions and consumptions of net assets by the government that is applicable to future periods. Based on this concept, the state reports the following as deferred outflows of resources or deferred inflows of resources.

- The excess consideration given over the net position acquired in the acquisition of the Texas Wesleyan University Law School is reported as deferred outflows of resources.
- The difference between the fair value of the capital assets constructed or improved and the present value of contractual liabilities in service concession arrangements (SCAs) is reported as deferred inflows of resources. Note 27 provides details on SCAs.
- The changes in the fair value of hedging derivative instruments is reported as either deferred outflows of resources or deferred inflows of resources. Note 7 presents additional information about derivative instruments.

Note 28 provides details on deferred outflows of resources and deferred inflows of resources.

Net Position and Fund Balances

The state reports restricted net position when constraints placed on resources are either:

- Externally imposed by creditors (such as debt covenants), grantors, contributors, laws or regulations of other governments
- Imposed by law through constitutional provisions or enabling legislation

Enabling legislation authorizes the government to assess, levy, charge or otherwise mandate payment of resources (from external resource providers) and includes a legally enforceable requirement that those resources be used only for the specific purposes stipulated in the legislation. Restricted net position is designated as either expendable or nonexpendable. Expendable restricted resources are those that may be expended for either a stated purpose or for a general purpose subject to externally imposed stipulations. Nonexpendable restricted resources are those required to be retained in perpetuity. Restricted resources include the state's permanent endowment funds subject to externally imposed restrictions governing their use.

Invested in capital assets, net of related debt, consists of capital assets — including restricted capital assets — net of accumulated depreciation/amortization and reduced by the outstanding balances of bonds, mortgages, notes or other debt attributable to the acquisition, construction or improvement of such assets. Significant unspent related debt proceeds are not included in the calculation of invested in capital assets, net of related debt. The unspent portion of the debt is included in restricted for capital projects.

Fund balances for governmental funds are classified as nonspendable, restricted, committed, assigned or unassigned. Nonspendable fund balances include amounts that cannot be spent because they are either

not in a spendable form or they are legally or contractually required to be maintained intact. Fund balances are reported as restricted when constraints placed upon the use of resources are either:

- Externally imposed by creditors (such as debt covenants), grantors, contributors, laws or regulations of other governments
- Imposed by law through constitutional provisions or enabling legislation

Committed fund balances are amounts that can only be used for specific purposes pursuant to constraints imposed through legislation passed into law by formal action of the Texas Legislature, the state's highest level of decision-making authority. These committed amounts cannot be used for any other purpose unless the Legislature removes or changes the specified use by taking the same type of action it employed to previously commit those amounts. Fund balances are reported as assigned when the state intends for resources to be used for specific purposes, yet the constraints do not meet the requirements to be reported as restricted or committed. Intent is expressed by either the Texas Legislature, agency governing board, or the agency head or official to which the governing body has delegated the authority to assign amounts to be used for specific purposes. Unassigned fund balances represent amounts that have not been restricted, committed or assigned to specific purposes. The Texas Legislature, agency governing board, or the agency head or official to which the governing body has delegated the authority to assign amounts shall determine the procedures and policies for determining assigned fund balances. The general fund is the only fund that can report a positive unassigned fund balance. Note 13 presents disaggregated fund balances.

When both restricted and unrestricted resources are available for use, it is the state's policy to use restricted resources first and then unrestricted resources as they are needed. When only unrestricted resources are avail-

able for use, it is the state's policy to use committed resources first, then assigned resources, and lastly unassigned resources.

Interfund Activity and Transactions – Government-wide Financial Statements

Interfund activity is eliminated from the government-wide financial statements with the exception of activities between governmental activities and businesstype activities. Interfund activity with fiduciary funds is reclassified and reported as external activity.

Interfund payables and receivables are eliminated from the statement of net position except for amounts due between governmental and business-type activities. These amounts are reported as internal balances on the statement of net position. Interfund activities between the primary government and component units with a different fiscal year-end are limited and immaterial.

Interfund transactions with discretely presented component units are reclassified and reported as external activity. Note 12 provides details of interfund activities and transactions.

Risk Financing

The state maintains a combination of commercial insurance and self-insurance programs. The state is self-insured for workers' compensation and unemployment compensation claims. The liabilities are funded on a pay-as-you-go basis. The group insurance programs are provided through a combination of insurance contracts, self-funded health plans and health maintenance organization contracts.

Liabilities are reported when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated. Liabilities include an amount for claims incurred but not reported. See Note 17 for additional information.

Note 2

Capital Assets

Capital assets, which include land, infrastructure, buildings, equipment and intangible assets, of governmental funds are recorded as expenditures at the time of purchase and capitalized in the governmental activities column of the government-wide statement of net position. Capital assets of other funds and component units are capitalized in the fund in which they are utilized. Capital assets are assets with a cost above a set minimum capitalization threshold that, when acquired, have an estimated useful life of more than one year. The capitalization thresholds and estimated useful lives of the state's various categories of capital assets are presented in the table below.

Capitalization of Assets							
Туре	Capitalization Threshold	Estimated Useful Life					
Land and Land Improvements	\$ 0	Not applicable					
Infrastructure, Non-Depreciable	0	Not applicable					
Construction in Progress	0	Not applicable					
Buildings and Building Improvements	100,000	5-30 years					
Infrastructure, Depreciable	500,000	10-50 years					
Facilities and Other Improvements	100,000	10-60 years					
Furniture and Equipment	5,000	3-15 years					
Vehicles, Boats and Aircraft	5,000	5-40 years					
Other Capital Assets							
(Library Books, Leasehold							
Improvements and Livestock)							
Depreciable	Various	3-22 years					
Non-Depreciable	0	Not applicable					
Internally Generated							
Computer Software	1,000,000	3-10 years					
Other Computer Software	100,000	3-10 years					
Land Use Rights – Permanent	0	Not applicable					
Land Use Rights – Term	100,000	10-60 years					
Other Intangible Capital Assets	100,000	3-15 years					

The tables on the following pages present the composition of the state's capital assets, adjustments, reclassifications, additions and deletions during fiscal 2013. The adjustments column includes assets not previously reported, accounting errors and other changes. The reclassifications column includes amounts for transfers of capital assets between agencies and reclassifies amounts for completed construction projects previously reported as construction in progress. The additions column includes current year purchases, depreciation and amortization. The deletions column includes assets removed during the current fiscal year.

All capital assets are capitalized at cost or estimated historical cost if actual historical cost is not available. Depreciation or amortization is reported on all "exhaustible" assets. "Inexhaustible assets," such as works of art and historical treasures, are not depreciated. Professional, academic and research library books and materials are considered "exhaustible" assets and are depreciated. Intangible assets with determinable useful lives are amortized. Donated assets are reported at fair value on the acquisition date. Assets are depreciated or amortized over their estimated useful life using the straight-line method.

Most land improvements (infrastructure), including curbs, sidewalks, fences, bridges and lighting systems, are capitalized. The state's highway infrastructure, expected to be maintained in perpetuity, is reported using the modified approach. The required supplementary information other than management's discussion and analysis section of this report provides further detail on the state's highway infrastructure.

Capitalization of interest incurred during the construction of capital assets is not applicable for governmental activities. For proprietary fund types and fiduciary funds with measurement focus on income determination or capital maintenance, the net amount of interest cost for qualifying assets is capitalized.

The state's capitalization policy regarding works of art and historical treasures is that capitalization is encouraged, but not required, for works of art and historical treasures that meet certain conditions. Works of art and historical treasures not required to be capitalized are those:

- Held for public exhibition, education or research in furtherance of public service, rather than for financial gain
- Protected, kept unencumbered, cared for and preserved

 Subject to an organizational policy that requires the proceeds from sales of collection items to be used to acquire other items for the collection

Assets of this nature include the historical archives of the Texas General Land Office. This vast collection includes approximately 35 million records dating back to 1720, including approximately 45 thousand maps, sketches and plat maps.

Note 3

Deposits, Investments and Repurchase Agreements

Authority for Investments

All monies in funds established in the Texas Comptroller of Public Accounts Treasury Operations Division (Treasury) by the Texas Constitution or by an act of the Legislature are pooled for investment purposes. State statutes authorize the Treasury to invest state funds in fully collateralized time deposits; direct security repurchase agreements; reverse repurchase agreements; obligations of the United States and its agencies and instrumentalities; bankers' acceptances; commercial paper; and contracts written by the Comptroller's office, which are commonly known as covered call options.

The Treasury obtains direct access to the services of the Federal Reserve System through the Texas Treasury Safekeeping Trust Company (Trust Company). The Federal Reserve Bank requires that the Trust Company maintain a positive cash balance in the account during and at the end of the day. The Trust Company met those requirements throughout fiscal 2013. The Trust Company safe-keeps U.S. Government securities in book-entry form for the major investment funds, safe-keeps collateral pledged to secure deposits of the Treasury in financial institutions, and acts as trustee for other public bodies to hold and manage funds on their behalf.

Certain state agencies, component units, public employee retirement systems and institutions of higher education are authorized to invest funds not deposited with the Treasury. As of Aug. 31, 2013, the Teacher Retirement System of Texas (TRS), the permanent school fund (PSF), the Employees Retirement System of Texas (ERS) and the University of Texas System (UT) reported over 85 percent of the total investment fair value. TRS, PSF, ERS, UT and Texas Prepaid Higher Education Tuition Board (TPHETB) make invest-

ments following the "prudent investor rule." Authorized investments include equities, fixed income obligations, cash equivalents and other investments.

Collateralization

State law requires all Treasury funds deposited in financial institutions above the amounts insured by the Federal Deposit Insurance Corporation be fully collateralized by pledging, to the Treasury, securities valued at market excluding accrued interest. Generally, the list of eligible securities includes all U.S. Treasury obligations, most federal agency obligations, and securities issued by state agencies and political subdivisions within the state. All securities pledged to the Treasury must be held by a third-party bank doing business in the state through a main office or one or more branches, any Federal Reserve Bank, the Trust Company, any Federal Home Loan Bank or in the vault of the Treasury. During fiscal 2013 no depository holding state funds failed.

State agencies and institutions of higher education with deposits of public funds not managed by the Treasury are required to secure deposits through collateral pledged by depository banks and savings and loan institutions. Eligible collateral securities are prescribed by state law; however, retirement systems are exempt by statute from this requirement.

External Investment Pool

The activities of the Texas local government investment pool (TexPool) and the Texas local government investment pool prime (TexPool Prime) are reported as an external investment trust fund. Separate audited financial statements may be obtained from the Trust Company.

Deposits

As of Aug. 31, 2013, the carrying amount of deposits for governmental and business-type activities, fiduciary funds and discretely presented component units

was \$1.5 billion, \$439.4 million and \$245.1 million, respectively. These amounts consist of all cash in local banks and a portion of short-term investments. These amounts are included on the combined statement of net position as part of the "Cash and Cash Equivalents," "Securities Lending Collateral" and "Investments" line items. As of Aug. 31, 2013, the total bank balance for governmental and business-type activities, fiduciary funds and discretely presented component units was \$1.5 billion, \$432.9 million and \$194.9 million, respectively.

Custodial Credit Risk: Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, deposits or collateral securities in the possession of an outside party will not be recovered. There is no formal deposit policy for managing custodial credit risk. The state's securities lending programs are subject to custodial credit risk. This type of risk is inherent to the securities lending programs. As of Aug. 31, 2013, the bank balances exposed to custodial credit risk are presented in the table below.

pending international investment trades. The table at the left presents the bank balances exposed to foreign currency risk as of Aug. 31, 2013.

Investments

The fair value of investments is determined from published market prices, quotations from major investment brokers or independent pricing services. In general, the fair value of fixed income securities is based on yields currently available on comparable securities of issuers with similar credit ratings, on prices from fixed income pricing services or on external broker quotes. The changes in the fair value of investments are reported as revenue in the operating statements.

Where no readily ascertainable market value exists (including private equity), fair values can be determined in consultation with investment advisors and Master Trust Custodians. Fair values can also be determined based on the capital account balance at the closest available reporting period, as communicated by the general partner, and adjusted for subsequent contributions, distributions, management fees and reserves.

Money market investments are reported at amortized cost, which approximates market value. Participating interest-earning investment contracts that have a remaining maturity at the time of purchase of one year or less may also be reported at amortized cost, provided the fair value of those investments is not significantly affected by the impairment of the credit standing of the issuer or by other factors.

The fair values of investments as of Aug. 31, 2013, are presented in the table below.

	Governmental and Business-Type Activities	Fiduciary Funds	Component Units

TRS, PSF, ERS, UT and TPHETB participate in individual securities lending programs. Cash collateral received by the lending agent on behalf of each entity is invested in a non-commingled pool exclusively for the benefit of the individual entity. Additional information about securities lending activity is disclosed in the "Securities Lending" section of this note. As of Aug. 31, 2013, the investment type balances for the invested securities lending cash collateral are presented in the table below.

Custodial Credit Risk: Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty, the value of its investments or collateral securities in the possession of an outside party will not be recovered. There is no formal investment policy

for managing custodial credit risk. Consistent with the securities lending program, underlying securities on loans are subject to custodial credit risk.

As of Aug. 31, 2013, the investments exposed to custodial credit risk are presented in the table below.

Foreign Currency Risk: Foreign currency risk for investments is the risk that changes in exchange rates will adversely affect the investment. TRS, PSF, ERS and UT are exposed to investment foreign currency risk. TRS, PSF and ERS do not have an investment policy

for managing foreign currency risk. UT's investment policy has no limitation on investments in non-U.S. denominated bonds or common stocks.

The investments exposed to foreign currency risk as of Aug. 31, 2013, are presented on the following pages.

Credit Risk: Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. Credit risk ratings are assigned by a nationally recognized statistical rating organization (NRSRO).

TRS' investment policy states that for over-the-counter derivatives, the minimum credit rating, based on a NRSRO, must be at least A- or better at the inception of the contract. The net market value of all over-the-counter derivative positions, less collateral posted, may not exceed \$500 million and all over-the-counter derivative positions without collateral may not exceed 5 percent of the total market value of the fund. Repurchase agreements may not exceed 5 percent of the market value of the total investment portfolio. A securities lending agent must be an organization rated A- or better by a NRSRO.

PSF's investment policy requires investments to adhere to specific Standard & Poor's rating guidelines. Fixed income securities must be rated at least BBB- and short-term money market instruments must be rated at least A-1.

ERS' general investment policy requires that noncash interest paying securities in the high yield bond portfolios not exceed 15 percent of the market value of the portfolio and that investments in money market funds represent no more than 5 percent of each individual fund.

UT's investment policy has no requirements or limitations for investment ratings.

As of Aug. 31, 2013, the credit quality distribution for securities with credit risk exposure is presented on the following page.

Concentration of Credit Risk: Concentration of credit risk is the risk of loss attributed to the magnitude of the investment in a single issuer. As of Aug. 31, 2013, governmental and business-type activities did not hold more than 5 percent of investments in any one issuer.

Interest Rate Risk: Interest rate risk is the risk that changes in interest rates of debt investments will adversely affect the fair value of an investment. TRS and PSF use the effective weighted duration method to identify and manage interest rate risk. ERS and UT use the modified duration method.

Duration is a measure of the price sensitivity of a debt investment to changes arising from movements in interest rates. Duration is the weighted average maturity of an instrument's cash flows, where the present value of the cash flows serves as the weights. The duration of an instrument can be calculated by multiplying the time until receipt of cash flow by the ratio of the present value of that cash flow to the instrument's total present value. The sum of these weighted time periods is the duration of the instrument. Effective duration extends this analysis to incorporate an option-adjusted measure of an instrument's sensitivity to changes in interest rates. It incorporates the effect of embedded options for corporate bonds

and changes in prepayments for mortgage backed securities. Modified duration estimates the sensitivity of the fund's investments to changes in interest rates.

The investment policy of PSF mandates the average duration of the fixed income portfolio to be consistent with the Barclay Aggregate Bond Index's duration and the duration of the real return portfolio to be consistent with the Barclay's Capital U.S. Treasury Inflation Protected Securities (TIPS) Index. As of Aug. 31, 2013, the Barclay Aggregate Index duration was 5.4 years and the Barclay's TIPS Index was 7.8 years. The maximum maturity for invested securities lending collateral is 397 days except for bank time deposits, which is 60 days, bankers' acceptances, which is 45 days, reverse repurchase agreements, which is 180 days, and floating rate securities, which is three years. The maximum weighted average maturity of the entire collateral portfolio must be 180 days or less. The maximum weighted average interest rate exposure of the entire collateral portfolio must be 60 days or less. TRS, ERS and UT do not have a formal investment policy for managing interest rate risk.

As of Aug. 31, 2013, PSF's investments by investment type, fair value and the effective weighted duration rate are presented in the table below.

August 31, 2013	e Risk	
PSF Investment Type	Fair Value (in Thousands)	Effective Weighted Duration Rate

Investments with Fair Values Highly Sensitive to Interest Rate Changes

In accordance with the applicable investment policies, TRS, PSF, ERS and UT may invest in asset backed and mortgage backed obligations. Mortgage backed obligations are subject to early principal payment in a period of declining interest rates. The resultant reduction in expected cash flows will affect the fair value of these securities. Asset backed obligations are backed by home equity loans, auto loans, equipment loans and credit card receivables. Prepayments by the obligee of the underlying assets in periods of declining interest rates could reduce or eliminate the stream of income

that would have been received. As of Aug. 31, 2013, the fair value of investments in asset and mortgage backed obligations highly sensitive to interest rate changes for

TRS, PSF, ERS and UT was \$2.4 billion.

Reverse Repurchase Agreements

Investments in reverse repurchase agreements by the Treasury and the Trust Company are permitted by statute. A reverse repurchase agreement consists of a sale of securities with a simultaneous agreement to repurchase them in the future at the same price plus a contract rate of interest. Sale proceeds are invested in securities or repurchase agreements that mature at or almost at the same time as the reverse repurchase agreement. Proceeds from the matured securities are used to liquidate the agreement resulting in a matched position. With a matched position there is minimal market risk because the seller-borrower will hold the securities to maturity and liquidate them at face value. In the event of default on a reverse repurchase agreement, the Treasury would potentially suffer a loss. The loss occurs if the cash received does not exceed the fair value of the securities underlying the reverse repurchase agreements. The amount of the loss would equal the difference between

the fair value plus accrued interest of the underlying securities and the agreement price plus accrued interest. To minimize the risk of default, all securities backing reverse repurchase agreements are held by the Federal Reserve Bank in the state's name.

As of Aug. 31, 2013, the Treasury's aggregate amount of reverse repurchase agreement obligations was \$51.3 million, including accrued interest. The aggregate fair value of the securities underlying those agreements, including accrued interest, was \$51.2 million. There was no credit exposure during fiscal 2013.

Securities Lending

TRS, PSF, ERS, UT, TPHETB and the Veterans Land Board (VLB) participate in securities lending programs as authorized by state statute. TRS, PSF, ERS and UT established their own separately managed securities lending programs. TPHETB has its own separately managed securities lending programs but also participates in collateral investment pools. VLB participates in collateral investment pools that commingle the cash collateral of several entities. Under these programs, the governmental entities transfer securities to an independent broker or dealer in exchange for collateral in the form of cash, governmental securities or bank letters of credit. In addition, PSF may receive collateral in the form of other assets that it specifically agrees to with its lending agent. TRS, ERS, UT and VLB receive collateral equal to 102 percent of the value of domestic securities lent and 105 percent for international securities. PSF receives collateral in an amount of 102 percent of the fair value plus accrued income for domestic corporate securities and 105 percent of the fair value plus accrued income for foreign securities. However, the required percentage is 102 percent for foreign securities denominated and payable in U.S. dollars. TPHETB receives collateral of 102 percent of the value of domestic securities lent plus accrued interest and 105 percent plus accrued interest for foreign securities. There is a simultaneous agreement to return the collateral for the same securities in the future.

The custodians of the securities are the security lending agents. The securities lending contracts do not allow the governmental entities to pledge or sell collateral securities unless the borrower defaults. The lending agents are required to indemnify TRS, PSF, ERS, UT, TPHETB and VLB if the borrowers fail to return the securities.

TRS, PSF, ERS, UT, TPHETB and VLB loans are terminable at will. There were no significant violations of legal or contractual provisions, no borrower or lending agent default losses and no recoveries of prior period losses during the year.

Differences between the fair value of the invested cash collateral and the cash collateral liability are recorded as part of the net increase/(decrease) in fair value of investments. There is no credit risk exposure to the lender when the fair value of the security on loan is less than the cash collateral liability. The overall securities lending activity as of Aug. 31, 2013, is summarized in the table below.

Securities Lending Activity Summary

August 31, 2013 (Amounts in Thousands)

Entity	Fair Value of Securities on Loan	Non-Cash Collateral*	Cash Collateral Liability (Obligation/ Securities Lending)	Fair Value of Invested Cash Collateral (Securities Lending Collateral)	Net Increase/ (Decrease) In Fair Value
TRS	\$ 21,835,123	\$ 437,219	\$ 21,914,339	\$ 21,921,126	\$ 6,787
ERS	2,319,691		2,375,120	2,379,498	4,378
PSF	2,269,856	2,128,813	205,506	138,865	(66,641)
UT*,**	869,555		633,473	633,473	
VLB**	87,928		89,614	89,614	
TPHETB**	67,914		69,632	69,632	
Total	\$ 27,450,067	\$ 2,566,032	\$ 25,287,684	\$ 25,232,208	\$ (55,476)

- * Non-cash collateral received for securities lending activities is not recorded as assets because the underlying investments remain under the control of the borrower, except in the event of default.
- ** UT, VLB and TPHETB did not experience any net change in fair value because the cash collateral pools they participated in were maintained at amortized cost as of Aug. 31, 2013.

Investment Derivative Instruments

Derivatives are financial instruments (securities or contracts) whose value is linked to or "derived" from changes in interest rates, currency rates and stock and commodity prices. These securities or contracts serve as components of the investment strategies of certain state agencies, public employee retirement systems and institutions of higher education. Those investment strategies are utilized to manage and reduce the risk of the overall investment portfolio. Investment derivative levels and types are monitored to ensure that portfolio derivatives are consistent with the intended purpose and at the appropriate level.

All investment derivative instruments are reported at fair value on the statement of net position and the statement of fiduciary net position. The changes in the fair value of investment derivative instruments are reported as investment revenue in the operating statements. As of Aug. 31, 2013, TRS, PSF, UT, Texas A&M University System (A&M) and VLB held investment derivatives (swaps, options, futures and forwards).

Forward foreign currency exchange contracts are used for the purchase or sale of a specific foreign currency at a fixed quantity and price on a future date as a hedge against either specific transactions or portfolio positions. The contracts are in the currency native to the security transactions for settlement date and are marked-to-market daily with the change in market value recorded as an unrealized gain or loss. Realized gain or loss is recorded at the closing of the contract. Risks associated with such contracts include the potential inability of the counterparties to meet the terms of their contracts and unanticipated movements in currency exchange rates.

Futures contracts are standardized, exchangetraded contracts to purchase or sell a specific financial instrument at a predetermined price and date. Futures contracts are used to facilitate various trading strategies, primarily as a tool to hedge against the increase

or decrease of market exposure to various asset classes. Upon entering into a futures contract, an initial margin deposit is pledged to the broker equal to a percentage of the contract amount. Contracts are marked-to-market, settled in cash with the broker and recorded as an unrealized gain or loss daily. The daily gain or loss difference is referred to as the daily variation margin. Realized gain or loss is recorded at the closing of the contract. Holders of futures contracts look to the exchange for performance under the contract and not to the entity holding the offsetting futures. Accordingly, the amount of risk posed by the nonperformance of counterparties to futures contracts is minimal. Risks due to movements in the value of the futures contracts and the inability to close out futures contracts due to a non-liquid secondary market remain.

Options are used to alter market (systematic) exposure without trading the underlying cash market securities and to hedge and control risks so the actual risk/return profile is more closely aligned with the target risk/return profile. Option contracts provide the option purchaser with the right, but not the obligation, to buy or sell the underlying security at a set price during a period or a specified date. The option writer is obligated to buy or sell the underlying security if the option purchaser chooses to exercise the option. With written options, market risk arises from an unfavorable change in the price of the derivative instrument, security or currency underlying the written option.

Swaps represent contracts that obligate two counterparties to exchange a series of cash flows at specified intervals. The ultimate gain or loss depends upon the price or rate at which the underlying financial instrument of the swap is valued at the settlement date. Swaps are used to manage risk and enhance returns. As of Aug. 31, 2013, swap investments were interest rate, credit default, commodity, equity and total return swaps.

UT and VLB invested in pay-variable, receivevariable and pay-fixed, receive-variable interest rate swap agreements that are reported as investment derivatives because they are ineffective hedges.

Foreign Currency Risk: TRS, UT and A&M have exposure to investment foreign currency risk in swaps, options, futures and forwards derivative investments. As of Aug. 31, 2013, derivative investments exposed to foreign currency risk are presented in the table below.

Derivative Investments Exposed to Foreign Currency Risk

Credit Risk: TRS and UT instituted policies to mitigate counterparty credit risk for investment derivatives by having master netting agreements and collateral posting arrangements. TRS and UT negotiated thresholds or limits for each counterparty above which collateral must be posted.

TRS' investment policy limits the net market value of all over-the-counter derivative positions, less collat-

eral posted, to an amount not exceeding \$500 million for any individual counterparty.

UT requires collateral to be posted on a daily basis by the counterparty to cover exposure to a counterparty above the limits set in place by the master netting agreement. Collateral posted by counterparties is held by UT in one of its accounts at their custodian bank.

The aggregate fair value of investment derivative instruments in asset positions as of Aug. 31, 2013, was \$125.7 million. The investment derivative instruments were executed with counterparties that had a credit rating of no less than A using the Standard & Poor's rating scale. This represents the maximum amount of loss that would have been recognized as of Aug. 31, 2013, if all counterparties failed to perform as contracted. This maximum exposure is reduced by \$47.3 million of collateral held and by \$8.9 million in liabilities included in netting arrangements with those counterparties, resulting in a \$69.5 million net exposure of investment derivative instruments to credit risk.

Interest Rate Risk: TRS, UT and VLB are exposed to interest rate risk on swap transactions. Investments in payvariable, receive-variable interest rate swaps ranged from payment of 82.04

to 131.25 percent of Securities Industry and Financial Markets Association (SIFMA) or one month to three month London Interbank Offered Rate (LIBOR) and receipt of 82.04 to 103 percent of SIFMA or LIBOR. Investments in pay-variable, receive-fixed interest rate swaps ranged from payment of various foreign currency rates (Euro Interbank Offered Rate (EURIBOR), LIBOR or Mexican Interbank Rate) and

receipt of 0.25 to 6.75 percent. Investments in payfixed, receive-variable interest rate swaps ranged from receipt of various foreign currency rates (EURIBOR or LIBOR) and payment of 0.75 to 2.65 percent. As of Aug. 31, 2013, the investment maturities for the state's swap contracts exposed to interest rate risk are presented in the table below.

Derivative Investments Exposed to Interest Rate Risk

August 31, 2013 (Amounts in Thousands)

	Investment Maturities (in years)					
Investment Type	Fair Value	Less Than 1	1-5	6-10	11-15	More than 15
Interest Rate Swaps	\$48,899	\$23,450	\$4,141	\$1,991	\$(198)	\$19,515

Investment Funds

Investment funds include hedge fund pools, private investment pools, public market funds and other alternative investments managed by external investment managers. Risks associated with these investments include investment manager risk, liquidity risk, market risk and leverage risk. Investment manager risk is substantially dependent upon key investment managers; therefore, the loss of those individuals may adversely impact the return on investment. Also, some investment funds are not subject to regulatory controls. Liquidity may be limited due to imposed lock-up periods, with penalties to redeem units or restricting redemption of shares until a certain period of time has elapsed. Investment funds may employ sophisticated investment strategies using leverage, which could result in the loss of invested capital. As of Aug, 31, 2013, the fair value of various investment funds was \$64 billion.

Note 4

Short-Term Debt

On Aug. 21, 2012 (with an issue date of Aug. 30, 2012), \$9.8 billion of the state of Texas Tax and Revenue Anticipation Notes, Series 2012 (Series 2012),

were sold to coordinate the cash flow of the state for fiscal 2013. Issuance of these notes enhanced the state's ability to make timely payment of expenditures payable from the general revenue fund. The Series 2012 notes were repaid during fiscal 2013, bore interest at 2.5 percent and were priced to yield 0.225 percent.

On Aug. 27, 2013, the Texas Comptroller of Public Accounts sold approximately \$7.2 billion of the state of Texas Tax and Revenue Anticipation Notes, Series 2013, with an issue date of Sep. 03, 2013, and a maturity date of Aug. 28, 2014. The notes bear interest at 2 percent and were priced to yield 0.2007 percent. They are not subject to redemption prior to maturity. On Aug. 27, 2013, good faith funds in the amount of \$72 million were received. The balance of the \$7.2 billion was received on Sep. 03, 2013.

Short-term debt activity for the fiscal year ended Aug. 31, 2013, is presented in the table below.

Short-Term Debt

For the Fiscal Year Ended August 31, 2013 (Amounts in Thousands)

	Beginning Balance 9/1/12	Issued	Redeemed	Ending Balance 8/31/13
Tax and Revenue Anticipation Notes	\$ 9,800,000	\$ \$ 0	\$ 9,800,000	\$ \$ 0

Note 5

Long-Term Liabilities

Long-term liabilities activity for the fiscal year ended Aug. 31, 2013, is presented in the table below.

Claims and judgments are payments on behalf of the state, its agencies and employees for various legal proceedings, self-insurance and workers' compensation claims. Tort claims are covered under the Texas Tort Claims Act. Numerous miscellaneous claims are covered under the Miscellaneous Claims Act for legal liabilities against the state for which no appropriation otherwise exists. Individual claims above \$50 thousand or numerous separate claims from the same individual or entity that in total exceed \$50 thousand must be approved by the Legislature before being paid. Claims are paid from one or more of approximately 50 governmental funds. Workers' compensation claims are usually paid from the same funding source(s) from which the employee's salary or wage compensation was paid.

Capital lease obligations are described in detail in Note 8.

Employees' compensable leave is the state's liability for all unused vacation and unpaid overtime accrued by employees, payable as severance pay under specified conditions. This obligation is paid only at the time of termination, usually from the same funding source(s) from which the employee's salary or wage compensation was paid.

Notes and loans payable consist of amounts used to purchase capital equipment. Other uses include the acquisition, construction and renovation of other capital assets, including the interim financing of higher education projects; software/database acquisition and development; refinancing of existing debt; and the funding of agency specific missions such as economic development projects and pest eradication programs. The Texas Department of Transportation (TxDOT) entered into pass-through toll agreements with local entities as a means of financing state highway capital improvements and maintenance. In fiscal 2013, TxDOT recognized \$158.2 million as a long-term liability for pass-through toll payables related to highway projects constructed under pass-through financing agreements. See Note 15

for additional details. Debt service requirements for notes and loans payable in the long-term liabilities are presented in the tables to the left on the previous page.

General obligation bonds and revenue bonds are described in detail in Note 6.

Long-term liabilities associated with the acquisition of restricted assets or long-term liabilities that will be liquidated with restricted assets are classified as liabilities payable from restricted assets.

Pollution Remediation Obligations

Pollution remediation obligations are recognized in the financial statements for existing pollution sites after the occurrence of one or more of the following events:

- The pollution creates an imminent endangerment to public health or the environment.
- The state is in violation of a pollution prevention-related permit or license.
- The state is named as a potentially responsible party by a regulator.
- The state is named in a lawsuit that compels it to participate in remediation.
- The state has commenced, or legally obligated itself to commence, cleanup activities.

Under applicable accounting standards, estimated expected recoveries from insurance policies and other responsible parties that are not yet realizable in the financial statements reduce the measurement of the pollution remediation obligation liability. A realized or realizable recovery involves the acknowledgment or recognition by the third party of its responsibility. Realized or realizable recoveries are recognized as assets. Recoveries from the federal government are considered nonexchange transactions and do not reduce the liability measurement, but are recognized separately as revenues when realizable. As of Aug. 31, 2013, the amount expected to offset state remediation costs could not reasonably be estimated.

Federal Regulatory Cleanup Requirements: Pollution remediation obligations are associated with projects initiated under federal regulatory requirements. Applicable federal laws and regulations include the Comprehensive Environmental Response, Compensation and Liability Act (also known as Superfund), the National Emissions Standards for Hazardous Air Pollutants and U.S. Environmental Protection Agency Class V Wells regulations.

The Superfund obligation estimates are based on budgeted projects to cover necessary activities for the upcoming fiscal year, along with estimated costs for future years and phases, plus direct salaries and benefits. Other obligations are calculated based on contractor estimates or historical costs as applicable.

Federal reimbursements are expected to offset a portion of these expected costs. The potential for changes due to price increases or reductions, technology or applicable laws or regulations was incorporated into these estimates.

State Regulatory Cleanup Requirements: Other pollution remediation obligations are associated with cleanups required under state of Texas law. The Texas Commission on Environmental Quality operates as a regulatory agency to ensure cleanups are conducted within applicable state laws and regulations contained in the Texas Administrative Code, Title 30; Texas Water Code; Texas Health and Safety Code; Texas Occupations Code; and Texas Natural Resources Code.

Other Pollution Remediation Activity: A remediation activities estimate for land owned by Texas Tech University in Carson County, Texas, remains pending as of Aug. 31, 2013.

Note 6

Bonded Indebtedness

DESCRIPTION OF BOND ISSUES

The state of Texas had 458 bond issues outstanding as of Aug. 31, 2013. During fiscal 2013 the state paid \$512.8 million from the general revenue fund for debt service.

General Obligation Bonds - General Comments

The Texas Constitution authorizes the state to issue several types of general obligation bonds. Each issue of general obligation bonds is designed to be self-supporting from a primary revenue source related to the program being financed, except for the general obligation bonds of the Texas Public Finance Authority, the Water Development Board, the Constitutional Appropriation Bonds and the Texas Transportation Commission highway improvement bonds.

The purpose and primary pledged revenue sources of each type of general obligation bond are summarized below.

The **Texas Higher Education Coordinating Board** issues bonds for educational loans to eligible Texas college students. Payments received on the loan contracts are applied to debt service on the bonds.

The **Texas Parks and Wildlife Department** issues bonds to finance the acquisition and development of state park sites. Park entrance fees, sporting goods sales tax revenue and investment earnings are applied to debt service on the bonds.

The **Texas Public Finance Authority** issues general obligation bonds to finance the acquisition, construction or renovation of buildings for the use of state agencies and institutions of higher education and to fund cancer research. The Texas Public Finance Authority is also authorized to issue general obligation bonds to assist local government economic development projects to enhance the value of military facilities. The bonds are payable from state appropriations.

The **Texas Water Development Board** issues bonds to provide financial assistance to political subdivisions for water conservation and development, water quality enhancement projects and flood control projects. Debt service payments are funded by principal and interest received on loans to political subdivisions, repayments of purchased water storage contracts and earnings on temporary investments.

The **Veterans Land Board** issues bonds to provide funds to loan to eligible Texas veterans for the purchase of land, housing or home improvements. Principal and interest payments on loans, plus investment earnings, are the primary source of repayment for bonds.

The Texas Department of Transportation, through the Texas mobility fund, issues general obligation bonds to pay or reimburse the state highway fund for the payment of part of the costs of constructing, reconstructing, acquiring and expanding state highways. In addition, the bond proceeds provide funds for participation by the state in the payment of part of the costs of constructing and providing certain publicly owned toll roads and other public transportation projects. Sources of pledged revenue for the Texas mobility fund include the United We Stand license plate fees, investment income, motor vehicle inspection fees, driver record information fees, driver license fees and certificate of title fees. Debt service for highway improvement bonds is provided by the state's general revenue.

Constitutional Appropriation Bonds are issued in support of the construction programs of institutions of higher education not benefiting from the permanent university fund, which is dedicated to the University of Texas System and Texas A&M University System. Debt service payments on bonds issued are limited to the \$131.3 million in general revenue funds available for debt service each year.

The Economic Development and Tourism Office, a division within the Office of the Governor, issues general obligation bonds to provide financial assistance to export businesses, promote domestic business development, provide loans to finance the commercialization of new and improved products and processes, and provide loans to defense-related communities for economic development projects. Debt service payments are funded from revenues of the Economic Development and Tourism Office, primarily from the repayment of loans and the disposition of debt instruments.

General Obligation Bonds – Authorized But Unissued

The Texas Constitution limits the amount of bonds that can be issued in any of the general obligation categories. As of Aug. 31, 2013, the amounts of general obligation bonds, other than Constitutional Appropriation Bonds, authorized but unissued, are presented in the table below.

General Obligation Bonds Authorized But Unissued		
(Amounts in Thousands)		
SELF-SUPPORTING		
Texas Agricultural Finance Authority Bonds	\$	46,000
Farm and Ranch Loan Bonds		475,000
Veterans Land and Housing Bonds		1,606,274
Water Development Bonds		6,258,633
College Student Loan Bonds		1,383,565
Texas Military Value Revolving Loan Fund		200,405
Total		9,969,877
NOT SELF-SUPPORTING		
Agricultural Water Conservation Bonds		164,840
Texas Public Finance Authority Bonds		2,954,697
Transportation Commission Transportation Bonds		2,901,359
Water Development Bonds -		
Economically Distressed Areas Program		151,976
Water Infrastructure Fund Program		101,836
Total		6,274,708
Total General Obligation Bonds	\$1	6,244,585

Revenue Bonds - General Comments

Each series of revenue bonds is backed by the pledged revenue sources and restricted funds specified in the bond resolution. The purpose and primary pledged revenue sources of each type of revenue bond are summarized below.

Self-Supporting

The **Veterans Land Board** issues bonds to assist in the construction of skilled nursing care facilities for veterans and to make land and home mortgage loans to veterans. The bonds are limited and special revenue obligations payable solely from the income, revenues, receipts and collateral pledged under the related trust indentures.

The Texas Department of Housing and Community Affairs issues bonds to assist in financing the purchase of homes by, or the construction of rental housing for, families with very low to moderate incomes and persons with special needs. Loan payments provide the revenues for debt service payments. The agency also issued taxable bonds for investment in collateralized mortgage obligations of federal agencies, to finance mortgage loans, and to carry out financial assistance programs.

The **Texas Water Development Board** issues bonds for the Texas water resources fund and the state water pollution control revolving fund. The proceeds are used to provide financial assistance to political subdivisions for water quality enhancement purposes. Principal and interest repayments from political subdivision loans are pledged for debt service requirements of the bonds.

University of Texas System and Texas A&M University System issue **Permanent University Fund** bonds to build, equip or buy buildings or other permanent improvements. The Texas Constitution limits each system's permanent university fund debt to an amount not to exceed 20 percent and 10 percent, respectively, of the cost value of permanent university fund assets, excluding real estate. Revenue from investments of the permanent university fund is pledged to secure the payment of principal and interest. The cost value of permanent university fund assets as of Aug. 31, 2013, excluding real estate, was \$12.5 billion. A comparison between the legal debt limits and the actual bonds outstanding at that date is presented in the table below.

Permanent University Fund Bonds (Amounts in Thousands)

	Legal	Actual Bonds	Authorized
	Debt Limits	Payable	But Unissued
University of Texas System Texas A&M University System	\$ 2,508,410	\$ 1,406,750	\$ 1,101,660
	1,254,205	707,905	546,300
Total	\$ 3,762,615	\$ 2,114,655	\$ 1,647,960

Miscellaneous College and University Revenue

Bonds are issued to provide funds to acquire, construct, improve, enlarge and equip property, buildings, structures or facilities. The revenue bonds issued by each institution's governing board are secured by the pledged revenue of the respective institutions and are not an obligation of the state of Texas.

The Office of the Governor is the oversight agency for the **Texas Small Business Industrial Development Corporation**, a discretely presented component unit of the state. The Texas Small Business Industrial Development Corporation bond program provides financing to state and local governments and to businesses and non-profit corporations for the purchase of land, facilities and equipment for economic development. The bonds are not an obligation of the state and are payable from the repayment of loans and investment earnings on the bond proceeds.

The **Texas Water Resources Finance Authority**, a discretely presented component unit of the state, issues bonds to purchase the majority of existing political subdivision bonds including those held by the Texas Water Development Board. Principal and interest from political subdivision bonds are pledged for debt service requirements of the bonds.

The **Texas Department of Transportation** issues revenue bonds to finance state highway improvement projects. Pledged revenues include all revenues deposited to the credit of the state highway fund, including dedicated registration fees, dedicated taxes, dedicated federal revenues, amounts collected or received pursuant to other state highway fund revenue laws and any interest or earnings from the investment of these funds.

The **Texas Transportation Commission** issued bonds to pay a portion of the costs of planning, designing, engineering, developing and constructing the initial phase of the Central Texas Turnpike System located in the greater city of Austin metropolitan area in Travis

and Williamson counties. The bond obligations are payable from and secured solely by a first lien on and pledge of the trust estate.

The **Texas Workforce Commission** issued revenue bonds to fund the workers' compensation insurance fund. The bond obligations are secured by a special obligation assessment imposed on Texas employers.

Not Self-Supporting

The following revenue bonds are supported by pledged lease or rental revenue derived from contracts with other state agencies, which in turn comes from legislative appropriations.

The Adjutant General's Department assumed the Texas Military Facilities Commission's responsibilities on Sept. 1, 2007. The Texas Military Facilities Commission's title to facilities, rental and other income pledged to the bonds was transferred to the Texas Public Finance Authority. Title will pass to the Adjutant General's Department upon final discharge of all bond obligations. Bonds are issued for the construction, expansion and renovation of armories. The bonds are payable from certain pledged revenues, primarily rentals from the Adjutant General's Department. As of Aug. 31, 2013, the bond obligations were still outstanding.

The **Texas Public Finance Authority** issues bonds to finance the acquisition of real property and to construct, equip or renovate buildings for the use of state agencies and institutions of higher education. The bonds are payable from specified pledged revenues, collected primarily from occupant-agency rentals.

The **Texas Parks and Wildlife Department** issues bonds for infrastructure repairs and construction. The bonds are payable from rent payments, funded by state appropriations, made by the Texas Parks and Wildlife Department to the Texas Public Finance Authority.

Pledged Future Revenues

Pledged revenues are those specific revenues that are formally committed to directly secure revenue bonds. The table below provides information on pledged revenue and pledged future revenue for the state's revenue bonds.

Pledged Future Revenue				
(Amounts in Thousands)				
	General			
	Obligation Bonds		Revenue Bonds	
	Governmental	Governmental	Business-Type	Component
	Activities	Activities	Activities	Units
Pledged Revenue Required for Future Principal

Term of Commitment Fiscal Year Ending August 31,	2039	2030	2053	2039
Percentage of Revenue Pledged	100%	100%	100%	100%

Build America Bonds

The American Recovery and Reinvestment Act (ARRA) of 2009 was implemented in February 2009. As part of this federal legislation, a new bond program called Build America Bonds (BABs) was created. Authority to issue BABs expired on Dec. 31, 2010.

The Texas Department of Transportation, the University of Texas System, the Texas Public Finance Authority and the University of Houston System had \$3.5 billion, \$1.7 billion, \$181.8 million and \$80 million of Direct Payment BABs outstanding, respectively, as of Aug. 31, 2013.

Under the Budget Control Act of 2011, across-the-board sequestration took effect on March 1, 2013. This resulted in the 35% federal subsidy for BABs interest payments being reduced to 32.34%, or a 7.6% reduction.

Variable Rate Bonds

Eight state agencies had a total of 106 variable rate bond issues with outstanding balances as of Aug. 31, 2013. Most of the issues' interest rates reset every seven days. The remaining issues' interest rates reset daily or monthly. The potential volatility for related debt service increases with these interest rate reset provisions.

Demand Bonds

The Office of the Governor, the Veterans Land Board, the Texas Department of Housing and Community Affairs, the Texas Department of Transportation, the University of Houston System and the University of Texas System had outstanding demand bonds as of Aug. 31, 2013.

A bond holder may tender any of these bonds for repurchase prior to maturity, usually every seven days.

Any bonds so tendered will be purchased either by the proceeds of the remarketing of such bonds or, if not successfully remarketed, from amounts drawn under a letter of credit, liquidity agreement or standby purchase agreement of the respective agency until such time as the remarketing is finalized. As of Aug. 31, 2013, there were no purchased bonds held by liquidity providers under the terms of the various agreements. Details are presented in the table below and on the following page.

Defeased Bonds

Texas defeased various bond issues by placing funds in irrevocable trusts in the Texas Treasury Safekeeping Trust Company (Trust Company) and external financial institutions to provide for all future debt service payments on the old bonds. Funds placed in the Trust Company to defease \$52.1 million in bonds are included in the state's financial statements in an agency fund. The trust account assets and the liability for all other defeased bonds are not included in the state's financial statements. The Texas Water Development Board defeased \$63.1 million of general obligation bonds in fiscal 2013. As of Aug. 31, 2013, the amounts of defeased bonds, at par, that remain outstanding for all bond issuers are presented in the table below.

Conduit Debt

The Texas State Affordable Housing Corporation (TSAHC), a discrete component unit of the state, is authorized to issue statewide 501(c)(3) tax-exempt multifamily mortgage revenue bonds under Texas

Government Code, Section 2306.555. The 501(c)(3) tax-exempt multifamily mortgage revenue bond program provides long-term variable or fixed rate financing to nonprofit borrower/developers of new or existing multifamily rental properties in order to generate and/or preserve affordable rental housing. TSAHC may finance single developments or pools of properties located throughout the state of Texas. Borrowers must agree to set aside a prescribed percentage of a property's units for rent to persons and families of low income. TSAHC finances properties under the program primarily through the sale of tax-exempt multifamily housing revenue bonds.

The bonds are secured by the property financed and are payable solely from payments received on the underlying mortgage loans. TSAHC, the state and any political subdivision thereof are not obligated in any manner for repayment of the bonds. Accordingly, the bonds are not reported as liabilities in the accompanying statements.

As of Aug. 31, 2013, there were 20 series of multifamily housing revenue bonds outstanding with an aggregate \$252 million principal amount payable. No bonds were issued in fiscal 2013.

The Private Activity Bond Surface Transportation Corporation, a blended component unit of the state, issued two series of bonds in the aggregate amount of \$1 billion that remains outstanding as of Aug. 31, 2013. The proceeds were loaned to LBJ Infrastructure Group LLC and NTE Mobility Partners LLC to finance the development and expansion of public transportation projects. Debt service is funded from loan and interest repayments from the borrowers.

Conduit bond debt for the Texas Department of Housing and Community Affairs (multifamily housing bonds) and the Texas Small Business Industrial Development Corporation, a discrete component unit of the state, predates the implementation of note disclosure requirements and is reported in the financial statements.

INTEREST RATE SWAPS

Effective interest rate swap agreements are considered hedging derivatives. The aggregate debt service requirements and associated net swap payments are detailed in this note. See Note 7 for additional information on derivatives.

Estimated Debt Service of Swap Payments

Using rates as of Aug. 31, 2013, the debt service requirements of the state's variable-rate and fixed-rate bonds and associated net swap payments were estimated and are presented in the tables below and on the following page.

Pay-Fixed, Receive-Variable Interest Rate Swaps: Estimated Debt Service Requirements of Variable-Rate Debt Outstanding and Net Swap Payments

The tables were prepared assuming current interest rates and swap index relationships remain the same for their terms. As rates and index relationships vary in the future, so will the resulting actual interest payments and net swap payments.

Note 7

Derivative Instruments

Derivatives are financial instruments whose values are derived, in whole or part, from the value of any one or more underlying assets or index of asset values. Derivatives include swap contracts, futures contracts, options, options on futures contracts, and forward contracts.

Hedging derivatives are entered into to reduce the overall cost of borrowing long-term capital and protect against the risk of rising interest rates. The hedging derivatives primarily consist of interest rate swap agreements entered into in connection with long-term bonds. The derivative contracts enable the state to issue bonds at a cost less than what the state would have paid to issue conventional fixed rate debt.

Investment derivatives are entered into with the intention of managing transaction risk, reducing interest cost, or reducing currency exchange risk in purchasing, selling or holding investments. Ineffective hedges are also reported as investment derivatives.

Summary of Derivative Activity

The fair value of effective hedging derivatives is recorded as derivative instrument assets (positive fair value) and derivative instrument liabilities (negative fair value). The cumulative change in fair value of effective hedging derivatives is reported as deferred outflows of resources and deferred inflows of resources. The state's cumulative derivative activity as of Aug. 31, 2013, is summarized in the table on the following page. The notional amounts are presented in U.S. dollar equivalents, with the exception of commodity forwards, which are presented in million British thermal units (MMBTU).

Fair Value

Derivative instruments are recorded at fair value. The fair values of the interest rate swaps were determined using a combination of methods.

Veterans Land Board (VLB) and the University of Texas System (UT) used the zero-coupon method in determining the fair values of their effective interest rate swaps. Several of VLB's effective interest rate swaps contain a provision for the state to be "knocked out" of the swaps by the respective counterparties upon the breach of certain predetermined barriers. In each of

these cases, VLB was paid an up-front option premium by the respective counterparties. With regard to the swap associated with Vet Land Tax Ref Bds Ser '2000, the knock-out is permanent once the option is taken at the discretion of the counterparty. In the remainder of the swaps with knock-out provisions, the knock-out is mandatory and is periodic in nature, with the knockout period corresponding only to the period during which the respective barrier is breached. The knock-out provisions are an integral part of the associated swaps, and the fair values of the swaps include the effects of the knock-outs.

^{**} The unit of measurement for the notional amount of the commodity forwards is expressed in million British Thermal Units (MMBTU). The notional amount of the commodity forwards is 960 thousand MMBTUs.

^{*} The permanent school fund is jointly managed by the Texas Education Agency and the Texas General Land Office, but issues a separately audited stand-alone annual financial report.

Texas Deparatement of Housing and Community Affairs (TDHCA) based the fair value of its swaps on market conditions as of Aug. 31, 2013. Fair values were directly obtained by the counterparties to the transactions and separately verified by an independent third party. Valuations are based on mid-market levels and may not reflect the amount a counterparty would have required in the event of an early termination of the swap transaction on that date. For swaps with no predefined notional amortization schedule, a valuation was performed based on an assumed notional amortization.

Futures contracts are marked-to-market daily and valued at closing market prices on the valuation date. A daily variation margin (the gain or loss) between the daily value of the contracts and the value on the previous day is recorded and settled in cash with the broker the following morning. Options and swaps are valued using broker quotes, proprietary pricing agents or appropriate pricing models with primarily externally verifiable model inputs.

The fair value of forward currency contracts is estimated by adding the forward points to the corresponding spot rate. These rates are then applied to the outstanding currency exchange to derive a change in valuation.

HEDGING DERIVATIVES

The state entered into interest rate swap agreements with various counterparties, all of which are highly rated financial institutions, to manage various risks associated with the state's debt programs. Each of the state's interest rate swaps is a contractual agreement entered into between the state and a counterparty under which each party agrees to exchange periodic fixed or variable

payments, based upon a stated notional amount, over the stated life of the agreement. The net differential paid or received is recognized over the life of the agreement as an adjustment to interest expense. Interest rate swaps determined to be hedging derivatives are designated as cash flow hedges. The state also entered into commodity forward contracts to hedge against the future purchase of natural gas. The specific objectives for each category of effective hedges are summarized below.

Pay-fixed Interest Rate Swaps: The combination of these swaps and variable-rate bonds creates synthetic fixed-rate debt. The use of synthetic fixed-rate debt has historically lowered the state's borrowing costs, as compared to the borrowing costs associated with the issuance of traditional fixed-rate bonds.

Commodity Forwards: The state enters into commodity forward contracts to meet the objective of hedging the risk that changes in the market price of natural gas will adversely affect the cash flows of the expected purchase of natural gas. As of Aug. 31, 2013, the commodity forward contracts expired and the state did not renew these contracts.

Significant Terms and Credit Ratings

The significant terms and credit ratings of the state's hedging derivatives as of Aug. 31, 2013, are presented in the tables on the following pages. The variable rates are quoted in terms of a percentage of the London Interbank Offered Rate (LIBOR) or Securities Industry and Financial Markets Association (SIFMA) municipal swap index rates as noted. Standard & Poor's and Moody's Investor service credit ratings are disclosed for each swap and forward contract. The notional amount for the commodity forwards are expressed as MMBTUs.

Risks

Credit Risk: The state is exposed to credit risk if the counterparty to an interest rate swap fails to meet the terms and obligations of its contracts. The state mitigates the credit risk associated with its swaps by entering into transactions with a diversified group of highly-rated counterparties. The interest rate swap agreements also contain varying collateral agreements and insurance policies with the counterparties. Posted collateral may be held either by the state itself or by a quality third party custodian. Swap contracts with a negative fair value do not expose the state to credit risk. As of Aug. 31, 2013, the state was not exposed to credit risk because the swaps recorded in the positive position were offset by other swaps with negative fair values.

Interest Rate Risk: On the pay-fixed, receive-variable interest rate swaps, as LIBOR or the SIFMA municipal swap index decrease, the state's net payment

on the swap increases. For the related hedged variablerate debt, as LIBOR or the SIFMA municipal swap index decrease the state's interest payments on the bonds decrease. The value of interest rate swap agreements with a longer weighted average maturity tend to be more sensitive to changing interest rates, and therefore, more volatile than those with shorter maturities.

Basis Risk: The state is exposed to basis risk to the extent that the interest payments on its variable-rate bonds do not match the variable-rate payments received on the associated swaps. The state mitigates this risk by matching the notional amount and amortization schedule of each swap to the principal amount and amortization schedule of each associated variable-rate bond issue and by selecting an index for the variable-rate leg of each swap that is reasonably expected to closely match the interest rate resets on the associated variable-rate bonds over the life of each bond issue. Additionally, tax-

exempt interest rates can change without a corresponding change in taxable interest rates due to factors affecting the tax-exempt market that do not have a similar effect on the taxable market.

The state was exposed to basis risk on its commodity forward contracts because the commodity purchase was priced based on a pricing point of Waha Natural Gas Hub, while the hedging forward contracts were settled on the NYMEX pricing point.

Termination Risk: Termination risk is the risk that the swap may be terminated prior to its scheduled maturity date as a result of certain specified events. The swap associated with the Vet Land Tax Ref Bds Ser '2000 provides the counterparty with the option to terminate the swap under certain conditions.

The state or the counterparties may terminate any of the swaps if the other party fails to perform under the terms of the respective swap agreements. If any of the swaps are terminated, the associated variable-rate bonds would no longer have a synthetic fixed-rate and the state would be subject to interest rate risk to the extent that the variable-rate bonds were not hedged with another swap or with variable-rate assets. Unless there is a termination option exercised by the counterparty, the state would owe the counterparty a termination payment equal to the swap's negative fair value.

Several swap agreements include optional early termination provisions granting the state the right, but not an obligation, to terminate the interest rate swaps at par without a termination payment after an effective date or after the breach of certain counterparty credit ratings.

Rollover Risk: Rollover risk is the risk caused by a mismatch between the amortization of a derivative contract and the underlying hedged bonds. The maturity dates of the state's effective interest rate swaps were designed to extend to the maturity dates of the underlying bonds. However, in the case of the swap associated

with the Vet Land Tax Ref Bds Ser '2000, the state will be subject to rollover risk if the counterparty exercises the option to terminate the swap contract.

Market-access Risk: Each swap associated with underlying variable-rate debt subject to tender at the option of the bondholder is subject to market-access risk. In the event the state is unable to remarket its variable-rate bonds, the state may choose to refund the variable-rate bonds with fixed-rate bonds and optionally terminate the related interest rate swap agreements. If an early termination event occurs, the state could be required to pay or to receive a substantial termination payment.

Swap Payments and Associated Debt

Aggregate debt service requirements of the state's variable-rate debt and net receipts/payments on associated hedging derivative instruments are disclosed in Note 6.

Contingent Features

Some of the state's derivative instruments include provisions that require the posting of collateral in the event that the contracting agency's credit rating falls below a specified level as issued by Moody's Investor Service and Standard & Poor's. If the contracting agency fails to post eligible collateral, the derivative instrument may be terminated by the counterparty. Note 15 discloses detail about derivatives with contingent features.

INVESTMENT DERIVATIVES

Investment derivatives expose the state to certain investment related risks. In January 2013, the state reduced its exposure to credit and interest rate risk by terminating all constant maturity basis swaps associated with Texas Mobility Fund bonds. Note 3 discloses detail about the state's investment derivatives.

Note 8

Leases

The state leases office buildings, computer and office equipment and other assets under a variety of agreements. Although lease terms vary, most leases are subject to biennial appropriations from the Legislature to continue the lease obligations.

Operating Leases

Operating lease payments are recorded as expenditures or expenses during the life of the lease. Rental expenditures or expenses related to operating leases for fiscal 2013 were \$319.7 million for the primary government and \$4.2 million for discrete component units. The following table presents minimum future rental obligations on noncancelable operating leases as of Aug. 31, 2013.

Noncancelable Operating Lease Obligations

	Total	\$ 1,182,249	\$ 15,772			

Additionally, the permanent school fund (PSF), the University of Texas System (UT), the Texas A&M University System (A&M) and the Texas Tech University System (Tech) have leased buildings, equipment and land to outside parties under various operating leases. The following table presents estimated future lease rental income on noncancelable operating leases as of Aug. 31, 2013.

Noncancelable Operating Lease Rental Income

August 31, 2013 (Amounts in Thousands)

	Minimum Future Lease Rental Income Primary Government		
Year			
2014	\$ 23,700		
2015	19,793		
2016	17,152		
2017	15,227		
2018	14,056		
2019 and beyond	81,263		
Total	\$ 171,191		

The historical cost of PSF's leased assets is \$363.5 million. Depreciation is not recorded because the assets are held for investment purposes in a permanent fund. Real estate investments are re-appraised periodically and the carrying amounts are adjusted when permanent impairments occur. In fiscal 2013, PSF reported contingent rental revenues in the amount of \$842 thousand.

The historical cost of UT's leased buildings and leased land is \$129.2 million and \$4 million, respectively. As of Aug. 31, 2013, the carrying value of UT's leased assets was \$100.2 million and the related accumulated depreciation was \$33.4 million. UT did not report any contingent rental revenues.

The historical cost of A&M's leased buildings and leased land is \$90 million and \$1.1 million, respectively. As of Aug. 31, 2013, the carrying value of A&M's leased assets was \$63.4 million and the related accu-

mulated depreciation was \$27.7 million. A&M did not report any contingent rental revenues.

The historical cost of Tech's leased building space is \$21.7 million. As of Aug. 31, 2013, the carrying value of Tech's leased building space was \$10.5 million and the related accumulated depreciation was \$11.2 million. The historical cost, accumulated depreciation and carrying value of the leased building space represents 8.7 percent of the full carrying value of the leased buildings. Tech did not report any contingent rental revenues.

Capital Leases

Leases that are purchases in substance are reported as capital lease obligations. The capital assets are recorded at the present value of the future minimum lease payments at the inception of the lease plus any cash paid or trade-in value received.

For governmental and business-type activities, the assets and liabilities are recorded in the government-wide financial statements.

The table below is a summary of the future minimum lease payments for capital leases.

Future Capital Lease Payments

August 31, 2013 (Amounts in Thousands)

Note 9

Retirement Plans

The state of Texas contributes to six defined benefit pension plans and one defined contribution plan that provide financial benefits to retired employees, as well as to their spouses and beneficiaries, of the state of Texas, school districts and other entities. The defined benefit pension plans are administered by the Employees Retirement System of Texas (ERS) and the Teacher Retirement System of Texas (TRS), which are component units, and the Fire Fighters' Pension Commissioner (FPC), which is part of the primary government. The state is a participating employer in these plans with the exception of the FPC defined benefit pension plan. The state is not an employer in the FPC plan, but makes on-behalf contributions to the FPC plan.

The state makes employer contributions to the defined contribution plan, Optional Retirement Program (ORP), which benefits certain employees of institutions of higher education. This plan is administered by the employers of institutions of higher education.

The state's contributions to these plans are authorized by statute and may be amended by the Legislature. The state reports the pensions' financial activities in the other employee benefit trust funds column of the fiduciary funds financial statements. The investments of the pension funds are included in Note 3.

The Texas Guaranteed Student Loan Corporation's (TGSLC) defined contribution pension plan is disclosed because the TGSLC is a discrete component unit of the state, but the state is not considered an employer of the plan and does not contribute to the plan.

Audited financial statements for each defined benefit pension plan may be obtained from:

Employees Retirement System of Texas P.O. Box 13207 Austin, Texas 78711-3207 Teacher Retirement System of Texas 1000 Red River Street Austin, Texas 78701-2698

Fire Fighters' Pension Commissioner P.O. Box 12577 Austin, Texas 78711-2577

Additional information for each defined contribution plan may be obtained from:

Statewide Coordinator, Optional Retirement Program Texas Higher Education Coordinating Board P.O. Box 12788 Austin, Texas 78711-2788

Texas Guaranteed Student Loan Corporation P.O. Box 83100 Round Rock, Texas 78683-3100

DESCRIPTION OF PLANS AND FUNDING POLICY

Employees Retirement System of Texas

The Board of Trustees of ERS is the administrator of four pension plans that provide a standard monthly benefit in a life annuity at retirement and death and disability benefits for members. The Employees Retirement System of Texas Plan (ERS Plan) is considered a cost-sharing, multiple-employer defined benefit plan with a special funding situation. In addition to the state of Texas, employers of the ERS Plan include various component units of the state. The Employees Retirement System and the Texas Treasury Safekeeping Trust Company, which are blended component units, and the State Bar of Texas, which is a discrete component unit, are also employers of the ERS Plan. The Law Enforcement and Custodial Officer Supplemental Retirement Plan (LECOS) and the Judicial Retirement System of

Texas (JRS) Plan One (JRS1) and Plan Two (JRS2) are considered single-employer defined benefit pension plans.

Contribution requirements are not actuarially determined, but are set by legislation, except for the JRS2, under which the state contribution rate is actuarially determined every even-numbered year for the next biennium. The contribution rates are based on a percentage of the monthly gross compensation for each member. Each plan's monthly contribution requirements are disclosed in the table below.

Required Contribution Rates

		Employer		Members				
Plan	Employee Class	Elected Class – Legislators	Elected Class – Other	Employee Class	Elected Class – Legislators	Elected Class – Other		
ERS	6.5%	6.5%	6.5%	6.5%	8.0%	6.5%		
LECOS*	0.5%	N/A	N/A	0.5%	N/A	N/A		
JRS1	N/A**	N/A	N/A	6.0%	N/A	N/A		
JRS2	6.5%	N/A	N/A	6.0%	N/A	N/A		
TRS	6.4%	N/A	N/A	6.4%	N/A	N/A		

- st Amount contributed is supplemental to amount contributed for the employee class of the ERS Plan.
- ** JRS1 is funded on a pay-as-you-go basis. Therefore, there is not a required employer contribution rate.

The ERS audited financial statements reflect the results of the actuarial valuations of the four plans it administers. The statements do not note any subsequent legislative action that would negatively affect the certification of actuarial soundness of the plans.

The ERS Plan, established by the Texas Government Code, Chapters 811-815, covers elected class members and employee class members. The monthly benefit is determined by the years and months of service multiplied by a statutorily determined percentage and may vary by class.

The elected class members are vested after eight years of service credit and may retire at age 50 with 12 years of service credit or at age 60 with eight years of

service credit. The monthly standard annuity equals the statutory percentage of 2.3 percent of the current state salary of a district judge multiplied by the number of years of service credit. Retirement benefits are automatically adjusted as state judicial salaries change. The maximum standard annuity is 100 percent of the state salary of a district judge.

The employee class includes all employees and appointed officers of the state and excludes independent contractors and their employees and employees covered by TRS and JRS. Other employee class members

include certified peace officers and custodial officers.

In 2009, the 81st Legislature created new plan provisions for members of the employee class hired after Sept. 1, 2009, with the exception of certified peace officers and custodial officers. This resulted in different requirements for benefit eligibility, vesting and early service retirement eligibility with reduced benefits, dependent upon the employee hire date.

For members of the employee class hired on or before Aug. 31, 2009, the following provisions apply:

- Employees vest after five years of service credit.
- Employees may retire at age 60 with five years of service credit or at any age when the sum of age and service credit (including months) total 80.
- The average monthly compensation is the average of the highest 36 months of compensation.
- The monthly standard annuity equals the statutory percentage of 2.3 percent of the average monthly compensation multiplied by the number of years of service credit.
- The minimum monthly standard annuity is \$150; the maximum standard annuity is 100 percent of the average monthly compensation.

For members of the employee class hired on or after Sept. 1, 2009, the following provisions apply:

- Employees vest after 10 years of service credit.
- Employees may retire at age 65 with 10 years of service credit or at any age when the sum of age and service credit (including months) equals or exceeds 80.
- The standard retirement annuity is reduced by five percent for each year the member retires before the member reaches age 60, with a maximum possible reduction of 25 percent.
- The average monthly compensation is the average of the highest 48 months of compensation.
- The monthly standard annuity equals the statutory percentage of 2.3 percent of the average monthly compensation multiplied by the number of years of service credit.

Certified peace officers and custodial officers may retire at age 55 with 10 years of service as a certified peace officer or custodial officer. The average monthly compensation is the average of the highest 36 months of compensation. The monthly standard annuity equals the statutory percentage of 2.3 percent of the average monthly compensation multiplied by the number of years of service credit.

A Partial Lump Sum Payment Option is available to members of the employee class, the elected class and certified peace officers and custodial officers. A one-time partial lump sum of up to three years of standard annuity at retirement can be taken and the annuity is reduced for life.

LECOS, established under Texas Government Code, Section 814.107, provides a supplemental retirement benefit to the ERS employee class member with service rendered while a law enforcement officer (commissioned peace officer) or a custodial officer. Upon meeting the qualification requirements under LECOS, members are eligible for LECOS benefits in addition to those received under the ERS Plan.

In 2009, the 81st Legislature created new plan provisions for LECOS members hired after Sept. 1, 2009. This resulted in different requirements for benefit eligibility, vesting and early service retirement eligibility with reduced benefits, dependent upon the employee hire date.

For members hired on or before Aug. 31, 2009, the following provisions apply:

- Employees with 20 years of service may retire at age 50 or at any age when the sum of age and service credit equals or exceeds 80.
- A member under the age of 50 may receive reduced benefits upon completing 20 years of service.
- The average monthly compensation is the average of the highest 36 months of compensation.
- The monthly standard annuity equals the statutory percentage of 2.3 percent from the ERS
 Plan plus an additional 0.5 percent from the LECOS Plan of the average monthly compensation multiplied by the number of years of service credit.
- The minimum monthly standard annuity is \$150; the maximum standard annuity is 100 percent of the average monthly compensation.

For members hired on or after Sept. 1, 2009, the following provisions apply:

- Employees may retire after 20 years of service at age 55 or at any age when the sum of age and service credit equals or exceeds 80.
- A member under the age of 55 may receive reduced benefits upon completing 20 years of service.
- The average monthly compensation is the average of the highest 48 months of compensation.
- The monthly standard annuity equals the statutory percentage of 2.3 percent from the ERS
 Plan plus an additional 0.5 percent from the
 LECOS Plan of the average monthly compen

- sation multiplied by the number of years of service credit.
- The minimum monthly standard annuity is \$150; the maximum standard annuity is 100 percent of the average monthly compensation.

Annual actuarial valuations of the fund are performed to monitor the adequacy of the financing arrangement.

JRS1 is established by Texas Government Code, Chapter 831, and JRS2 is established by Texas Government Code, Chapter 836. JRS covers judges, justices and commissioners of the Supreme Court, the Court of Criminal Appeals, the Court of Appeals, district courts and certain commissions to a court. Members prior to Sept. 1, 1985, participate in JRS1 and all others participate in JRS2.

Participants in both plans may retire at age 65 with 10 years of service with at least the last year being continuous and currently holding judicial office, or at age 65 with 12 years of service. Members of JRS1 and JRS2 may retire at any age with 20 years of service. Participants in both plans are eligible for reduced early service retirement benefits once they attain age 60 and complete 10 years of service if the member currently holds judicial office with at least the last year being continuous, or at age 60 with 12 years of service.

The monthly benefit for members of both plans is equal to 50 percent of the salary for the position from which the member retired and is increased by 10 percent of final compensation if in office within one year of benefit commencement.

Member contributions for JRS1 are made to the general revenue fund, and the state is obligated to make appropriations from the general revenue fund in an amount sufficient to pay benefits on a pay-as-you-go basis. The contribution requirements are not actuarially determined since the plan is not funded in advance.

State statutes prohibit benefit improvements or contribution reductions if, as a result of the particular

action, the time required to amortize the ERS, LECOS or JRS2 plans' unfunded actuarial liabilities would be increased to a period that exceeds 30 years by one or more years. The statutes also apply if the amortization period already exceeds 30 years by one or more years. According to the actuarial valuations as of Aug. 31, 2013, contributions are insufficient to amortize the current unfunded accrued liabilities of the ERS, LECOS and JRS2 plans over any period of time. Therefore, the 30 year funding objective is not being realized for any of the plans.

Teacher Retirement System of Texas

The Board of Trustees of TRS is the administrator of one pension plan (TRS Plan). The TRS Plan, established under Texas Government Code, Chapters 821-824, is considered a cost-sharing multiple-employer defined benefit plan with a special funding situation. The state is required by statute to make contributions to the TRS Plan. For fiscal 2013 the state made the majority of contributions to the TRS Plan. A special funding situation is created, which results in the state reporting the TRS Plan as if it was the sole employer. The employers of the TRS Plan include the state of Texas, TRS and 1,307 public schools, service centers, charter schools and community colleges. Employees of TRS and state of Texas colleges, universities and medical schools are members of the TRS Plan, provided they are employed for one-half or more of the standard work load and are not exempted from membership under Texas Government Code, Section 822.002. The commissioner of the Texas Education Agency may also elect to participate in the TRS Plan in lieu of participation in the ERS Plan in the same manner and under the same conditions as other members of the TRS Plan.

The TRS Plan provides retirement, disability annuities and death and survivor benefits. The benefit and contribution provision of the TRS Plan are authorized by state law and may be amended by the Legislature.

A member is vested after five years of service credit and is eligible to retire at a future date and receive a lifetime monthly annuity.

Some members who established membership on or before Aug. 31, 2005, are considered "grandfathered," which in certain instances results in different retirement provisions than for non-grandfathered members. These differences are noted where applicable. In order to be grandfathered, members had to meet at least one of the following criteria on or before Aug. 31, 2005:

- The member was at least 50 years of age.
- The sum of the member's age and years of service credit equaled at least 70.
- The member had at least 25 years of service credit

For members who established membership before Sept. 1, 2007, the following provisions apply:

- Members may retire at age 65 with five years of service credit or when the sum of the member's age and years of service credit equals at least 80 years (known as the "Rule of 80") and membership is maintained until retirement.
- The standard life annuity benefit formula is 2.3
 percent of the average of the five highest annual
 salaries multiplied by the years of service credit.
- For grandfathered members, the three highest annual salaries are used to calculate the annuity benefit.
- At normal retirement age, the minimum monthly standard annuity is the greater of \$150 or the formula standard annuity. Total payments will not be less than accumulated contributions at retirement.
- Members qualify for early retirement with reduced benefits at age 55 with five years of service credit or any age below 50 with 30 years of service credit, provided the member does not meet the Rule of 80 and membership is maintained until retirement.

For members who established membership on or after Sept. 1, 2007, the following provisions apply:

- Members may retire at age 65 with five years of service credit, or at age 60 if the member meets the Rule of 80.
- The standard life annuity benefit formula is 2.3
 percent of the average of the five highest annual
 salaries multiplied by the years of service credit.
- For grandfathered members, the three highest annual salaries are used to calculate the annuity benefit.
- At normal retirement age, the minimum monthly standard annuity is the greater of \$150 or the formula standard annuity. Total payments will not be less than accumulated contributions at retirement.
- Members qualify for early retirement with reduced benefits if the member meets one of the following criteria:
 - The member is age 55 with five years of service credit but does not meet the Rule of 80.
 - The member has 30 or more years of service credit, but is less than age 60 and does not meet the Rule of 80.
 - The member is less than age 60, meets the Rule of 80 and has five years of service credit.
- Grandfathered members who re-enter TRS on or after Sept. 1, 2007, qualify for early retirement with reduced benefits if the member meets one of the following criteria:
 - The member is at least age 55 with at least five years of service credit but does not meet the Rule of 80.
 - The member has 30 years of service credit but does not meet the Rule of 80 and is below age 60.
 - The member is below age 55 and meets the Rule of 80.

Grandfathered members receive full retirement benefits for early retirement if they meet all of the following criteria:

- The member is at least age 55.
- The member meets the Rule of 80.
- The member has at least 20 years of service credit.

Although grandfathered members receive full retirement benefits by meeting these criteria, they are still considered early-age retirees. This may affect other aspects of post-retirement activities, such as obtaining employment with the state of Texas after retirement.

TRS offers to all service and eligible disability retirees several annuity payment options that reduce the standard annuity by application of age-related actuarial reduction factors in order to continue payment to a beneficiary after the retiree's death. The available options include 100, 75 and 50 percent joint and survivor annuities and five-year and 10-year guaranteed period annuities.

TRS also offers two other annuity payment options:

- The Deferred Retirement Option Plan (DROP) DROP allowed members to freeze their standard annuity and, instead of retiring, have a portion of the frozen standard annuity deposited into a DROP account, for up to five years, while continuing to work for a TRS-affiliated employer. The plan was closed for new participants effective Dec. 31, 2005.
- A Partial Lump-Sum Cash Option (PLSO)
 PLSO reduces the standard monthly annuity
 and provides a cash lump sum distribution.
 Members may participate in the PLSO if they
 are eligible for service retirement and meet the
 Rule of 90 (age and years of service credit equal
 at least 90), are not participating in the DROP
 plan and are not retiring with disability benefits. Grandfathered members may participate
 in the PLSO plan if they meet the Rule of 80
 or are at least age 65 with at least five years of
 service credit.

Contribution requirements are not actuarially determined but are legally established each biennium. The TRS Plan's monthly contribution requirements are disclosed on the "Required Contribution Rates" table. The Texas Constitution requires the Legislature to establish a member contribution rate of not less than 6 percent of the member's annual compensation, and a state contribution rate of not less than 6 percent but not greater than 10 percent of the aggregate annual compensation of all members of the TRS Plan during that fiscal year. As required by state statute, the state rate is paid by the employer for compensation paid to new members during the first 90 days of employment, on amounts paid to employees above the statutory minimum amount, and on compensation paid from private or federal funds. Total employer contributions to the TRS Plan are a combination of state, public schools, federal and private funding.

State statute prohibits benefit improvements or contribution reductions if, as a result of the particular action, the time required to amortize the TRS Plan's unfunded actuarial liabilities would be increased to a period that would exceed 30 years by one or more years, or, if the amortization period already exceeds 30 years by one or more years, the period would be increased by such action. According to the actuarial valuation as of Aug. 31, 2013, if payroll grows as expected, contributions are sufficient to amortize the current unfunded accrued liabilities of the TRS Plan over a period of 28 years based on the smoothed asset value as of the valuation date. Therefore, the 30 year funding objective is being realized.

Optional Retirement Program

The state's contributions to the Optional Retirement Program (ORP) are authorized by Texas Government Code, Chapter 830. Full-time faculty, librarians and certain professionals and administrators employed in public higher education are eligible to elect ORP in

lieu of the TRS Plan before the 91st day after becoming eligible. It is a one-time irrevocable choice between two distinct plans. ORP is administered by the benefits offices at each employer. The Texas Higher Education Coordinating Board develops policies, practices and procedures to provide greater uniformity in the administration of ORP.

ORP is a defined contribution pension plan in which each participant selects from a variety of investments offered by several insurance and investment companies through annuity contracts or mutual fund investments. These types of investments are authorized by Internal Revenue Code, Section 403(b). With the purchase of these individual contracts, the state has effectively transferred the obligation for the payment of benefits to the companies. Participants vest in ORP after one year of participation.

The contributory percentages of participant salaries provided by each participant and the state were 6.65 percent and 6 percent, respectively, for fiscal 2013. Institutions and agencies authorized under state law to provide ORP to their employees may supplement the state contribution at a rate of up to 2.5 percent of payroll.

Individual accounts are maintained at the insurance and investment companies selected by each ORP participant. Separate financial statements for ORP are not prepared because the state retains no liability for plan performance and has very limited administrative involvement.

The employers of ORP are institutions of higher education, one educational state agency and several two-year college institutions that are not part of the state reporting entity. State entity participation in ORP for fiscal 2013 resulted in participant contributions of \$231.5 million and employer contributions of \$276.8 million.

As of Aug. 31, 2013, ORP had 37,404 participants. The total participant contributions were \$263.6 million

and total employer contributions were \$310.7 million. Additional information for ORP is included in the fiscal 2013 *ORP Participation Report Summary* published annually by the Texas Higher Education Coordinating Board.

Fire Fighters' Pension Commissioner

FPC is the administrator of the Texas Emergency Services Retirement System (TESRS), a cost-sharing multiple-employer defined benefit pension plan established to provide pension benefits for emergency services personnel who serve without significant monetary remuneration. As of Aug. 31, 2013, there were 216 member fire departments participating in TESRS. The state is not an employer of the TESRS plan.

The statutory authority for TESRS is found in Texas Government Code, Chapters 861-865. The governing bodies of participating departments are required to contribute at least the minimum prescribed amount per month for each active member. No contributions are required by individual members of participating departments. Additional contributions may be made by a governing body to pay for granting credit for service before the department began participating in TESRS. Per Texas Government Code, Section 865.015, the state is required to appropriate a limited amount to make the fund actuarially sound. The appropriations may not exceed the amount of one-third of the total of all contributions by governing bodies in one year. Legislative appropriations to make the fund actuarially sound for the past three fiscal years are:

- Fiscal 2013: \$572.3 thousand
- Fiscal 2012: \$572.3 thousand
- Fiscal 2011: \$502.9 thousand

The member fire department contributions to the fund were \$4.7 million for fiscal 2013. Contributions made were equal to the yearly statutorily required contributions.

Total members in the pension plans administered by ERS and TRS are presented in the table below.

Retirement Systems' M					
	ERS	LECOS	JRS1	JRS2	TRS
Retirees and Beneficiaries Currently Receiving Benefits	91,367	9,089	421	254	348,228

Funded Status

Information on the state's pension plans funded status for each plan as of Aug. 31, 2013, is presented in the table above.

The schedule of funding progress, presented as required supplementary information following the notes to the financial statements, provides multi-year trend information about whether the actuarial value of plan assets are increasing or decreasing over time relative to the actuarial accrued liability for benefits.

Included in the audited financial reports for ERS and TRS are:

- Schedules of funding progress that include historical trend information about the actuarially determined funded status of the plan from a long-term on-going plan perspective and the progress made in accumulating sufficient assets to pay benefits when due
- Schedules of employer contributions that include historical trend information about the annual required contributions (ARC) of the employer and the contributions made by the employers in relation to the ARC

Texas Guaranteed Student Loan Corporation

The Texas Guaranteed Student Loan Corporation (TGSLC), a discrete component unit of the state, maintains its own defined contribution retirement plan, the TGSLC Money Purchase Pension Plan and Trust (the Plan). The Plan covers substantially all employees of the TGSLC. As of June 30, 2013, there were 690 participants in the Plan. Employees do not contribute to the Plan; TGSLC's contributions to the Plan are generally based on 9 percent of gross annual salaries, net of forfeitures. Total payroll and covered payroll was approximately \$37.9 million and \$36.1 million, respectively, in the Plan year ended June 30, 2013. Total TGSLC contributions were approximately \$3.1 million for the fiscal year ended Sept. 30, 2013. Plan amendments are subject to the Plan's Board of Trustees' approval and the TGSLC Board of Directors' ratification.

Note 10

Deferred Compensation

The state of Texas offers two deferred compensation plans to all state employees. One was established in accordance with Internal Revenue Code, Section 457. The second was established in accordance with Internal Revenue Code, Section 401(k). All costs of administering and funding these programs are the responsibility of plan participants. The assets of the two plans remain the property of the contributing employees and are not presented in the accompanying financial statements. The state makes no contributions to either plan, the assets do not belong to the state and the state has no liability related to the plans.

The University of Texas System (UT) offers its own deferred compensation plan, created in accordance with Internal Revenue Code, Section 457(b). All UT employees are eligible to participate in UT's plan and do not participate in the plan offered by the state of Texas. All investments, amounts, property and rights held under the deferred compensation trust fund are held for the exclusive benefit of participants and beneficiaries at the fair market value of the plan account for each participant. UT has no liability under the plan.

Note 11

Postemployment Health Care and Life Insurance Benefits

In addition to providing pension benefits, the state of Texas contributes to four plans that provide health care and life insurance benefits for retired employees, their spouses and beneficiaries. These other postemployment benefits (OPEB) are authorized by statute and contributions are established by the General Appropriations Act.

The state of Texas is a participating employer in three different OPEB plans and is an on-behalf contributor to one plan. The financial statement recognition and note disclosure requirements in GASB Statement No. 45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions, were applied separately for each plan. The following note disclosures are organized by OPEB plan administrator.

University of Texas and Texas A&M University Systems

The state of Texas contributes to two single-employer defined benefit retiree health care and life insurance benefit plans: the UT System Employee Group Insurance Program (UT Plan) and A&M System Group Insurance Program (A&M Plan). The UT Plan is administered by the University of Texas System (UT) and the A&M Plan is administered by the Texas A&M University System (A&M).

UT and A&M each issue a publically available financial report that includes financial statements and required supplementary information. Those reports may be obtained by writing to the systems at the following addresses:

University of Texas System 601 Colorado Street Austin, Texas 78701-2982

Texas A&M University System 200 Technology Way College Station, Texas 77845

Plan Descriptions

Each plan provides separate postemployment health care and life insurance coverage to university system retirees, surviving spouses and beneficiaries. UT and A&M are part of the state of Texas primary government. Employees of these systems are considered to

be state employees. Benefit provisions for the UT and A&M plans are established and amended by the administering systems as allowed under Texas Insurance Code, Chapter 1601. Retiree eligibility for insurance continuation after employment is determined by the Legislature and is subject to change.

Funding Policy

The university system and member contribution rates are determined annually by each system based on the recommendations of the employee benefits office and consulting actuaries. The plan rates are based on the plan costs expected to be incurred, the funds appropriated for the plans and the funding policy established by the Legislature in connection with benefits provided through the plan. Amounts contributed by the state are currently based on pay-as-you-go financing requirements determined during each legislative session. State contribution requirements are established and may be amended by the Legislature. The three-year history of employer contributions and annual OPEB costs is presented in the table below.

Three-	Year Trer Thousands)	nd Infor	mation	
Fiscal Year Ended	Employer Contribution	Annual OPEB Cost	Percentage of Annual OPEB Cost Contributed	Net OPEB Obligation
UT Plan				
8/31/13	\$ 146,454	\$ 682,065	21.5%	\$2,799,478
8/31/12	142,737	639,952	22.3%	2,263,867
8/31/11	124,280	595,169	20.9%	1,766,652
A&M Plan				
8/31/13	\$ 61,529	\$ 176,876	34.8%	\$ 719,225
8/31/12	63,131	190,200	33.2%	603,878
8/31/11	40,489	174,919	23.1%	476,809

For the fiscal year ended Aug. 31, 2013, the state made monthly contributions for health care and life insurance to the UT and A&M plans. Contribution rates for the state and retirees are presented in the next column. Costs are estimated by an actuary for claims

expected to be paid during the year. The retiree contributes any premium over and above state contributions.

Required Contribution Rates – Retiree Health Care and Life Insurance Premium

For the Fiscal Year Ended August 31, 2013

	UT	Plan	A&M Plan	
Level of Coverage	Employer	Plan Member	Employer	Plan Member*
Retiree Only	\$ 483	\$	\$ 370	\$ 79
Retiree/Spouse	736	208	548	257
Retiree/Children	645	218	482	190
Retiree/Family	900	410	637	346

^{*} Plan member contribution for health insurance only. There is no plan member contribution for basic life.

Annual OPEB Cost and Net OPEB Obligation

The state's annual OPEB cost for the UT and A&M plans is calculated based on the employer annual required contributions (ARC). The ARC is an amount actuarially determined in accordance with the parameters of GASB 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities over a period no greater than 30 years. The table below presents the components of the annual OPEB cost for the UT and A&M plans for fiscal 2013 and the net OPEB obligation for these two plans as of Aug. 31, 2013.

Annual OPEB Cost and Net OPEB Obligation		
(Amounts in Thousands)	UT Plan	A&M Plan
Annual Required Contribution, ARC Interest on Net OPEB Obligation Adjustment to ARC Annual OPEB Cost	\$ 640,898 158,471 (117,304) 682,065	\$ 165,148 44,083 (32,355) 176,876
Employer Contributions Made	(146,454)	(61,529)
Increase in Net OPEB Obligation	535,611	115,347
Net OPEB Obligation, September 1, 2012	2,263,867	603,878
Net OPEB Obligation, August 31, 2013	\$2,799,478	\$719,225

Funded Status and Funding Progress

The funded status of the UT and A&M plans as of Aug. 31, 2013, is presented in the table below.

Funded Status		
(Amounts in Thousands)	UT Plan	A&M Plan
Actuarial Valuation Date	Dec. 31, 2012	Sept. 1, 2012
Actuarial Value of Plan Assets Actuarial Accrued Liability (AAL)	\$ 6,939,197	\$ 1,924,980
Unfunded Actuarial Accrued Liability (UAAL)	\$ 6,939,197	\$ 1,924,980
Funded Ratio (actuarial value of plan assets/AAL)	0.0%	0.0%
Covered Payroll (active plan members)	\$ 5,674,298	\$ 1,149,300
UAAL as a Percentage of Covered Payroll	122.3%	167.5%

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of events far into the future. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress is presented as required supplementary information following the notes to the financial statements. The schedule presents multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits. Since there are no plan assets for UT and A&M plans, the actuarial accrued liability for these two plans continues to increase.

Actuarial Methods and Assumptions

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs

between the employer and plan members to that point. The actuarial methods and assumptions used in the UT and A&M plan valuations include techniques designed to reduce short-term volatility in actuarial accrued liabilities consistent with the long-term perspective of the calculations. The table below provides additional detail on the actuarial methods and assumptions used in the UT plan and A&M plan valuations.

Summary of Actuarial Methods and Assumptions

UT Plan	A&M Plan
Dec. 31, 2012	Sept. 1, 2012

7.00%	7.30%
3.50%	3.00%
8% initial 5.5% ultimate	9% initial 5% ultimate
TRS and PBGC tables*	RP-2000 Table applied on a gender-specific basis
	Plan Dec. 31, 2012 Entry Age Normal Level Percent Open 30 years Market 4.75% to 7.75% 7.00% 3.50% 8% initial 5.5% ultimate TRS and PBGC

^{*} For service retirees, the mortality tables used by TRS retirement plan that reflect TRS specific experience was adopted as most of the UT EGIP OPEB plan members participate in the TRS retirement plan. For disability retirees, the PBGC male and female disability mortality tables were used.

Employees Retirement System of Texas

The Employees Retirement System of Texas (ERS) administers a program that provides postemployment health care, life and dental insurance benefits to retirees through the Texas Employees Group Benefits Program as authorized by Texas Insurance Code, Chapter 1551. The State Retiree Health Plan (SRHP) is a cost-sharing multiple-employer defined benefit plan with 61 participating employers.

There is no special funding situation in SRHP. In a cost-sharing multiple-employer plan without a special funding situation, employers recognize their annual contractually required contributions to the plan in the fund financial statements.

For cost-sharing multiple-employer defined benefit plans like SRHP, the amount of OPEB liability or asset is equal to the difference between contributions required and contributions made. Contractually required contributions to a cost-sharing multiple-employer OPEB plan are not required to be based on the plan ARC.

Each employer has limited note disclosure requirements under the cost-sharing multiple-employer provisions of GASB 45. No disclosure of actuarial information as it relates to the entire plan is required on individual employer reports. Instead, the OPEB plan discloses all required actuarial calculations in the notes to its financial statements and required supplementary information. ERS issues a publically available financial report that includes financial statements and required supplementary information for SRHP. That report may be obtained by writing to ERS at:

Employees Retirement System of Texas P.O. Box 13207 Austin, Texas 78711-3207

Plan Description

Retirees of state agencies, institutions of higher education (not part of UT and A&M Systems) and other non-state entities selected by the Legislature are eligible to receive OPEB through SRHP. Retirees must meet certain age and service requirements and have at least 10 years of service at retirement to participate in the plan. Surviving spouses and dependents of retirees are also covered by the plan. Benefit and contribution provisions of SRHP are authorized by state law and may be amended by the Legislature.

The financial statements of SRHP are reported using the accrual basis of accounting. Contributions are recognized when due, pursuant to state law. Benefits and refunds of contributions are recognized when due and payable in accordance with the terms of the plan.

Funding Policy

The Legislature sets and has the power to amend annual state contributions to SRHP. Currently, the state pays 100 percent of eligible retiree health insurance premiums and 50 percent of dependents' premiums. The retiree contributes any premium over and above state contributions. The table below summarizes the maximum monthly state and retiree contributions toward the health and basic life premiums of eligible retirees.

Required Contribution Rates – Retiree Health Care and Life Insurance Premium

For the Fiscal Year Ended August 31, 2013

	ERS SRHP		
Level of Coverage	Employer	Plan Member	
Retiree Only	\$ 470	\$	
Retiree/Spouse	740	269	
Retiree/Children	651	180	
Retiree/Family	920	449	

Contractually required contributions to the plan are currently based on the annual pay-as-you-go expenses of SRHP. In fiscal 2013 the state contributed \$471 million to SRHP, which equaled the required contribution as established by the Legislature. In fiscal 2012 and fiscal 2011, the state contributed \$425 million and \$394.2 million, respectively. These contributions also equaled the contribution required by the Legislature.

Teacher Retirement System of Texas

The Teacher Retirement System of Texas (TRS) administers a program that provides benefits to public school district retirees with at least 10 years of service.

The Texas Public School Retired Employees Group Insurance Program (TRS-Care), a cost-sharing multiple-employer defined benefit plan with 1,255 participating employers, provides a free basic level of coverage for eligible retirees and optional coverage for eligible retirees and their dependents.

The state of Texas is not an employer in the TRS-Care OPEB plan and is not legally required to continue contributing benefits. The fiscal 2013 contributions to the TRS-Care OPEB plan are presented in the table below.

Schedule of Contributions from the Employers and Other Contributing Entities

For the Fiscal Year Ended August 31, 2013 (Amounts in Thousands)

 From Reporting Entities
 \$ 160,953

 On Behalf From State
 241,577

 On Behalf From Federal Government
 74,511

 \$ 477,041

TRS issues a publically available financial report that includes financial statements and required supplementary information for TRS-Care. That report may be obtained by writing to TRS at:

Teacher Retirement System of Texas 1000 Red River Street Austin, Texas 78701-2698

Plan Description

Basic coverage includes participation in a major medical group health insurance plan with deductibles based upon enrollment in Part A or Part B of Medicare. Eligibility provisions of the TRS-Care plan are established in Texas Insurance Code, Chapter 1575.

The financial statements for TRS-Care are reported using the accrual basis of accounting. Contributions are recognized in the period in which amounts are due, pursuant to state law. Benefits and refunds of contributions are recognized when due and payable in accordance with the terms of the plan.

Funding Policy

Funding for free basic coverage is provided based on public school district payroll. The state and active school employee contribution rates are 1 percent and 0.65 percent of school district payroll, respectively, with school districts also contributing 0.55 percent of payroll.

TRS-Care retiree health care and life insurance benefits are financed on a pay-as-you-go basis. The expenses are recognized when reimbursements are made for claims paid by non-state entities or when premiums are paid.

Medicare Part D

In fiscal 2013 the administrators of each OPEB plan received payments from the federal government pursuant to the retiree drug subsidy provisions of Medicare Part D. On-behalf payments are recorded as revenues and expenses of each plan. The table below presents Medicare Part D receipts from the federal government as reported by the OPEB administrators in fiscal 2013.

Medicare Part D Receipts

For the Fiscal Year Ended August 31, 2013 (Amounts in Thousands)

UT Plan \$ 9,057 A&M Plan 3,830 ERS SRHP 13,605 TRS-Care 24,975 \$ 51,467

Note 12

Interfund Activity and Transactions

Interfund activity refers to financial interactions between funds and/or blended component units and is restricted to internal events. Interfund transactions refer to financial interactions with legally separate entities, i.e., discrete component units and other governments, and are restricted to external events.

Reciprocal Interfund Activity

Interfund loans are reciprocal interfund activity with a requirement for repayment. These loans are reported as interfund receivables/payables and are classified as either current or noncurrent.

Interfund services are sales and purchases of goods and services for a price approximating their external exchange value. This activity is reported as revenues in seller funds and expenditures or expenses in purchaser funds. Unpaid amounts are reported as receivables and payables.

Nonreciprocal Interfund Activity

Interfund transfers are nonreciprocal interfund activity. This activity refers to flows of assets without equivalent flows of assets in return and without a requirement for repayment. In governmental funds, transfers are reported as other financing sources or uses. In proprietary funds, transfers are reported after nonoperating revenues and expenses. The majority of transfers are legally authorized by statute or bond covenant to move amounts from one fund to another. Amounts not transferred at fiscal year-end are accrued as "due from/due to." Activity occurring within the same fund is eliminated. Additional eliminations are made and transfers in and out are netted and presented in the government-wide statement of activities as "transfers-internal activities."

Certain reclassifications and eliminations are made between the fund financial statements and the government-wide financial statements. Resource flows between the primary government and its discretely presented component units are reported as revenues and expenses, as if they were external transactions, on the fund financial statements and the government-wide financial statements. Transfers between the governmental or business-type activities and fiduciary funds are reported as transfers on the fund financial statements and are reclassified to revenues and expenses, as if they were external transactions, on the government-wide financial statements.

Due from/due to amounts between the primary government and the discretely presented component units are reported separately from due from/due to amounts between funds in the fund financial statements and the government-wide financial statements. Due from/due to amounts between governmental or business-type activities and fiduciary funds are reported as due from/due to amounts between funds in the fund financial statements and are reclassified to receivables from fiduciary funds/payables to fiduciary funds, as if they were external transactions, on the government-wide financial statements.

Interfund reimbursements are repayments from funds responsible for payment of expenditures or expenses to the funds that actually made the payment. These reimbursements are reported in the appropriate expenditure/expense category in the fund responsible for the payment.

For the state of Texas, routine transfers are those transfers from unrestricted revenue collected in the general revenue fund to finance various programs accounted for in other funds in accordance with the General Appropriations Act, which is the primary budget document for the state of Texas. Other transfers are legally authorized by statute to move resources from one fund to another. The interfund receivables/

payables include loans for energy efficiency programs of approximately \$48.3 million. There is also a \$732.3 million receivable for Texas A&M University System from the University of Texas System from permanent university funds. The earnings will be used for bond payments. Significant transfers include a \$3 billion transfer from the property tax relief fund and a \$1.1

billion transfer from the lottery fund to the foundation school fund for educational programs. There is also a \$1 billion transfer from the permanent school fund to the available school fund. The detail of interfund activity and transactions by fund type and category as of Aug. 31, 2013, is presented in the tables below and on the following page.

Note 13

Classification of Fund Balances/ Net Position

The table on the following page presents a summary of the governmental fund balances by fund type and specific purpose as of Aug. 31, 2013.

The classifications of nonspendable, restricted, committed, assigned and unassigned are the fund balance classifications according to GASB Statement No. 54, Fund Balance Reporting and Governmental Fund Type Definitions. With the exception of nonspendable fund balances, fund balances are presented based on each fund's specific purpose. For the general fund, special revenue funds, capital projects funds and nonmajor permanent funds, the specific purpose of the fund balance is determined by the governmental function for which the funds are restricted, committed, assigned or unassigned. The governmental function is assigned to an agency and all fund balances reported by the agency reflect that function.

If a fund reported by an agency is exclusively for another governmental function and the amount is significant, the balance is reclassified to the appropriate governmental function.

Capital projects fund balances are often reported by two agencies with different governmental functions. In these instances, the fund balance is reported in the function for the project. The function is determined by the specific purpose reflected for each column in the combining balance sheet – nonmajor capital projects funds.

The specific purpose for debt service funds is considered debt service.

Of the \$7.3 billion governmental funds total unassigned fund balance, \$6.2 billion is for the economic stabilization fund (ESF). The ESF was authorized by the Texas Constitution, Article III, Section 49g. In November of each year a transfer is made equal to 75 percent of the excess of the prior fiscal year collections for oil and natural gas production taxes over 1987 collections. The

ESF shall also receive a transfer from the general revenue fund, by the 90th day of each biennium, for one-half of any unencumbered positive balance remaining in the general revenue fund on the last day of the preceding biennium. The Legislature may appropriate, by a three-fifths vote of the members present in each house, amounts in the ESF for spending that does not exceed the amount of any unanticipated deficit or revenue decline during a biennium. The Legislature may also appropriate any amount from the ESF for any purpose only if approved by at least two-thirds of the members present in each house.

Restrictions of net position are listed on the face of the government-wide and proprietary statements of net position. Per GASB 54, balances reported as restricted in the fund financial statements plus the nonspendable permanent fund corpus balances are reported as restricted in the statement of net position. All other fund financial balances are reported as unrestricted in the statement of net position.

Note 14

Restatement of Beginning Balances

During fiscal 2013, certain accounting changes and adjustments were made

that required the restatement of fund balances or net position.

The beginning balances and all related restatements for the components of the state's financial reporting entity are presented in the table at right and discussed on the following page.

Total Restatements	\$ (134,312)	\$ (165,283)	\$ 0	\$ 279,257	\$ (20,338)		

Restatements are grouped in the table above by the following four types of activity:

- A. These restatements are for adjustments to capital assets and accumulated depreciation or amortization. The restatements include an amount of \$82.1 million to report bridges that were not previously reported upon their completion.
- B. This restatement is to record new component units recognized under GASB 61 and to reclassify blended component units to discrete component units in order to comply with this new standard.
- C. This restatement is to correct grant advances in the Texas Enterprise Fund that were recorded as receivables in prior years and were not reclassified in accordance with GASB 33 to grant expense after the grant requirements had been met.
- D. These are miscellaneous restatements necessary to correct accounting errors in the prior period or recognize changes in the application of accounting principles and methodologies, including restatements for funds reclassified to a different fund type, to improve consistency within the financial reporting entity.

Note 15

Commitments and Contingencies COMMITMENTS

Outstanding Loan Commitments

The state makes loan commitments to political subdivisions for financing purposes. These loan commitments are provided from remaining current bond proceeds, future bond proceeds and federal drawdowns. The Texas Water Development Board had loan commitments totaling \$385.7 million as of Aug. 31, 2013. The Texas Department of Transportation (TxDOT) has an equity loan agreement of \$15.6 billion. Of this amount, \$6 billion is related to North Texas Tollway Authority for State Highway 161 Project in Dallas. The remainder of \$9.6 billion is used by the Grand Parkway Transportation Corporation to pay for certain costs related to development, construction, operation, maintenance and financing of projects in Harris County and possible extensions or expansions of the Grand Parkway in the Dallas/Fort Worth area.

Investment Funds

As of Aug. 31, 2013, state agencies, public employee retirement systems and institutions of higher education had entered into capital commitments with investment managers for future funding of investment funds. Investment funds include hedge fund pools, private investment pools, public market funds and other alternative investments managed by external investment managers. As of Aug. 31, 2013, the remaining commitment was \$30.6 billion.

Construction and Other Commitments

As of Aug. 31, 2013, TxDOT had contractual commitments of approximately \$10 billion for construction and comprehensive developments. These are not recognized liabilities because the terms of the contracts or agreements were not met and benefits were not received as of the end of the fiscal year.

Additionally, TxDOT is party to several passthrough toll agreements with local entities. Under these agreements, the local entities will finance, design and construct certain roadway projects and may maintain them for a specified period of time. Upon completion of the projects, TxDOT will make payments (i.e., passthrough toll payments) to the entities based on traffic utilization of the roadways and other payment requirements governed by the agreements. Motorists traveling these roadways will not be required to pay a toll. Estimated payments under the agreements are included as notes payable as each project is completed. Liabilities for uncompleted agreements are not recognized. As of Aug. 31, 2013, the amount of unrealized payables for uncompleted pass-through toll agreements was \$431 million. In addition, TxDOT has equity grant commitments of \$323.6 million to various local toll project entities.

CONTINGENCIES

Protested Tax Payments

As of Aug. 31, 2013, pending litigation filed by taxpayers seeking refunds of state taxes totaled \$203 million. The protested taxes include sales, franchise, insurance and other taxes. Although the outcome of these cases cannot presently be determined, adverse ruling in some of them could result in significant additional refunds.

Unpaid Claims and Lawsuits

A variety of cases that may affect the state were filed as of Aug. 31, 2013. These claims total \$86.3 million and include a number of lawsuits and claims that may be significant to individual state agencies. While the outcome of these cases cannot be determined, adverse rulings could result in additional liabilities. Additionally, TxDOT filed 850 cases exercising eminent domain for \$219 million.

Federal Assistance

The state receives federal financial assistance subject to review or audit by federal grantor agencies. Entitlement to this assistance is generally conditional upon compliance with the terms and conditions of grant agreements and applicable federal regulations, including the expenditure of assistance for allowable purposes. Any disallowance as a result of the audits may become a liability of the state but is considered immaterial to its overall financial condition.

The Texas Office of the Attorney General and the Texas Health and Human Services Commission's Office of Inspector General investigate allegations of overpayments to Medicaid providers. Until investigations are completed, the total amount of overpayments to providers is potentially subject to recovery (amounts associated with the "open case list") and may represent a corresponding potential liability for the federal share of these payments – about 60 to 65 percent of that total.

An actual liability is realized only after a completed investigation substantiates an overpayment and the provider is notified of the results and given an opportunity to submit rebuttal or claims for offsets. The percent of total dollars on the open case list that are ultimately confirmed as overpayments cannot be reliably predicted. The state estimates the amounts that may become payable to the federal government will be immaterial to its overall financial condition.

Guaranteed Debt

In 1983, the voters of the state approved a constitutional amendment that provides for the guarantee by the permanent school fund of up to a defined capacity of \$76.8 billion in school district bonds as of Aug. 31, 2013. Approval by the state of Texas attorney general is required for each bond issuance. In the event of a default by a school district, the permanent school fund will transfer to the paying agent/registrar an amount necessary to pay the maturing or matured principal and/or interest to bondholders. As of Aug. 31, 2013, \$55.2 billion in debt was guaranteed by the permanent school fund for outstanding bond issues in 810 school districts in the state. Under state statute, payments by the permanent school fund on such guarantees are recoverable from the state of Texas. The \$55.2 billion represents the principal amount and does not reflect any subsequent accretions in value for compound interest bonds (zero coupon securities), nor does it include interest on current interest bonds or variable rate notes. The amount also excludes bonds that were refunded and released from the bond guarantee program. From the inception of the program through Aug. 31, 2013, none of the school districts with guaranteed debt have defaulted on the guaranteed debt.

Arbitrage

Rebatable arbitrage is defined by Internal Revenue Code, Section 148, as earnings on investments

purchased with the gross proceeds of a bond issue in excess of the amount that would have been earned if the investments were invested at a yield equal to the yield on the bond issue. The rebatable arbitrage must be paid to the federal government. State agencies and institutions of higher education responsible for investments from bond proceeds carefully monitor their investments to restrict earnings to a yield less than the bond issue and, therefore, limit any state arbitrage liability. The state estimates that rebatable arbitrage liability, if any, will be immaterial to its overall financial condition.

Derivatives with Contingent Features

All of the Department of Housing and Community Affair's (TDHCA) derivative instruments include provisions that require posting collateral in the event its credit rating falls below a specified level as issued by Moody's Investor Service and Standard & Poor's. If TDHCA fails to post eligible collateral, the derivative instrument may be terminated by the counterparty. As of Aug. 31, 2013, the aggregate fair value of all derivative instruments with collateral provisions was \$25.1 million. If the posting requirements had been triggered, TDHCA would have been required to post eligible collateral equal to the aggregate fair value of the derivative instruments. TDHCA posted no collateral as of Aug. 31, 2013.

The Teacher Retirement System of Texas (TRS) is party to derivative instruments with provisions that require TRS to post collateral in the event that the fair value surpasses a specified contractual threshold. As of Aug, 31, 2013, the aggregate fair value of all derivative instruments with these provisions was \$45 million. If the collateral posting thresholds did not exist, TRS would be required to post the aggregate amount of \$6.5 million in collateral to its counterparties. TRS posted no collateral as of Aug. 31, 2013.

Note 16

Subsequent Events

Primary Government

Bonds and Commercial Paper Issued/Refunded

State agencies and institutions of higher education issued \$1.9 billion in new bonds and commercial paper and \$1.5 billion in refunding bonds since Aug. 31, 2013, as presented in the table below and on the following page. This routine activity finances state facilities, housing assistance programs, educational loans and refunds outstanding debt.

Other Subsequent Events

The Texas Workforce Commission transferred \$95.6 million of taxes to the unemployment trust fund in September 2013 in accordance with Texas Labor Code, Section 204.123. The taxes were originally deposited to the employment and training investment hold-

ing fund, an account within the general revenue fund. Texas Labor Code, Section 204.061, defines a statutory floor for the unemployment trust fund as 1 percent of total taxable wages for the four quarters ended June 30, 2013. This transfer was required because the unemployment trust fund balance was below that floor.

An application was submitted by the Grand Parkway Transportation Corporation, a blended component unit of the Texas Department of Transportation (TxDOT), for a loan from the U.S. Department of Transportation in the amount of \$840 million to fund and reimburse eligible costs of the Grand Parkway system. The loan is expected to be finalized in fiscal year 2014.

On Sept. 23, 2013 the Governor of Texas approved the transfer of approximately \$116.7 million in depreciable and nondepreciable infrastructure as well as related right-of-way from the Loop 49 Toll Facility in Smith County to the North East Texas Regional Mobility Authority. The actual change in asset valuation for TxDOT will be recorded in fiscal year 2014. The transferred segments will be utilized for the operation and maintenance of a turnpike project.

	Total Bond and Commercial Paper Issued/Refunded	\$ 3	5,426,481		

Note 17

Risk Management

The state of Texas is exposed to various risks of loss related to property, general and employer liability, net income, and personnel. The state of Texas and its employees are covered by numerous immunities and defenses that limit some of these risks of loss, particularly in liability actions brought against the state or its employees. Remaining exposures are managed by self-insurance arrangements, contractual risk transfers, the purchase of commercial insurance or a combination of these risk financing techniques.

Estimates of liabilities for incurred but not reported claims are actuarially determined based on estimates of the ultimate cost of settling claims, using past experience adjusted for current trends and any other factors that would modify past experience. Claims liabilities include specific, incremental claims adjustment expenditures/expenses. In addition, estimated recoveries on unsettled claims, such as salvage and subrogation, are evaluated in terms of their estimated realizable value and deducted from the liability for unpaid claims. Unallocated claim adjustment expenditures/expenses are not included in the liability for claims and judgments.

There were no significant reductions in insurance coverage in the past year. Also, in the past three years, settlements have not exceeded insurance coverage.

Property and Liability

The Texas Labor Code, Chapter 412, states that the State Office of Risk Management (SORM) shall operate as a full-service risk and insurance manager for state agencies and shall administer programs to reduce property and liability losses, including workers' compensation losses.

SORM administers the statewide workers' compensation program. The state does not carry commercial insurance for workers' compensation, but instead, uses

the general revenue fund to account for its risk financing activities. Certain agencies are exempt from the SORM program or elect to purchase additional insurance coverage outside of the program. The University of Texas System (UT), Texas A&M University System (A&M) and Texas Department of Transportation (TxDOT) administer separate self-insured workers' compensation programs.

Where applicable, certain agencies purchased fire and extended insurance coverage for buildings financed through the issuance of bonds. Other risks are addressed through a combination of interim financing and commercial coverage for fire and all other perils, as well as coverage for medical malpractice, torts, named windstorms, floods and other potential liabilities.

Health, Life and Dental

Insurance coverage is provided to active state employees and their dependents by one of three health plan administrators. All state employees not covered by insurance plans provided by UT and A&M are included in the Texas Employees Group Benefits Program (GBP) administered by the Employees Retirement System of Texas (ERS). Public school employees and their dependents are covered by the Texas Active School Employees Uniform Group Benefits Program (TRS-ActiveCare) administered by the Teacher Retirement System of Texas (TRS). Risk of loss is retained with self-insured plans or transferred to the insurance carrier with health maintenance organization (HMO) plans.

Texas Employee Group Benefits Program

Claims for health, life, accidental death and dismemberment (AD&D), disability and dental insurance coverages are established under the GBP. These coverages are provided through a combination of insurance contracts, a self-funded health plan, a self-funded dental indemnity plan, HMO contracts and dental health maintenance organizations (DHMO) contracts.

University of Texas System and Texas A&M University System

UT and A&M provide health insurance, dental insurance, vision insurance, life insurance, AD&D, long-term disability, short-term disability, long-term care and flexible-spending account coverages to all benefits-eligible employees. These insurance benefits are provided through both self-funded and fully insured arrangements.

Teacher Retirement System

TRS-ActiveCare is a health benefits program that offers options ranging from catastrophic coverage with reduced premiums to a comprehensive plan with near first-dollar coverage at higher premiums. TRS-ActiveCare covers members currently employed by public educational employers that participate in the plan.

TRS-ActiveCare offers a choice of four preferred provider organization plans statewide as well as HMO plans in certain service areas. The risk associated with TRS-ActiveCare is retained by the plan's participants, and no risk is transferred to the plan's administrators, employers or the state.

Changes in Claims Liability Balances

The table below presents the changes in claims liability reported in various balance sheet/statement of net position liability accounts during fiscal years ended Aug. 31, 2012, and Aug. 31, 2013. Claims and judgment amounts presented in Note 5 are also included in the table below.

Changes in Claims Liability Balances (Amounts in Thousands) Beginning Balance Increases Decreases Balance

\$ 2,829,489

\$ 2,699,682

\$ 2,846,831

\$2,726,971

2013

2012

\$ 787,456

\$ 760,167

Of the fiscal 2013 claims liability ending balance, \$186 million relates to long-term claims liabilities, which are reported in Note 5. Of the remaining, \$618 million relates to the state's health, life and dental insurance programs, and the remainder to miscellaneous claims and judgments, all of which are reported as accounts payable.

Note 18

Contested Taxes

The state may assess a claim against one or multiple taxpayers for a tax liability. Taxpayers may petition for a formal hearing before an independent administrative law judge if they wish to challenge a tax liability assessed by the state. If the request for a determination hearing is received within a specified time, the taxpayer does not have to pay the tax until a final decision is reached. As of Aug. 31, 2013, there was an estimated \$1.3 billion of assessments filed that are currently in the redetermination hearings process. Collectability of these assessments is dependent upon the decisions of administrative law judges. These assessments are not recognized as tax revenue until the administrative hearing is final. Therefore, these amounts are not included in the receivables reported in the financial statements.

Note 19

Component Units and Related Organizations

Component units are legally separate organizations for which the elected officials of the primary government are financially accountable. Component units can also be other organizations for which the nature and significance of their relationship with a primary government is such that exclusion would cause the reporting

\$ 804,798

\$ 787,456

entity's financial statements to be misleading. In addition, component units can be organizations that raise and hold economic resources for the direct benefit of a government unit. Because of the closeness of their relationships with the primary government, some component units are blended as though they are part of the primary government. Other component units are discretely presented. None of the component units for the state of Texas meet the criteria for major component unit presentation and those presented are for informational purposes of interested parties. The component units are reported for the fiscal year ended Aug. 31, 2013, unless indicated otherwise.

Blended Component Units

The state is financially accountable for the following legally separate entities. These component units are reported as if they are part of the primary government because they provide substantially all of their services directly to the state, or the component units' debts are expected to be repaid entirely or almost entirely with the resources of the state. The component units' financial data is blended in the appropriate funds within the financial statements.

Employees Retirement System of Texas (ERS) is a legally separate entity established by the Legislature to administer benefits for officers and employees of the state. ERS is governed by a six-member board of trustees. The governor, with the advice and consent of the Senate, appoints three of the six members of the board of trustees. The state of Texas has the ability to impose its will upon ERS through its budget approval powers. Separate financial statements may be obtained by contacting ERS at P.O. Box 13207, Austin, Texas 78711.

Texas Treasury Safekeeping Trust Company
(Trust Company) is a legally separate entity established
by the Legislature. The Texas Comptroller of Public
Accounts is the single shareholder of the Trust Company and is charged with managing the Trust Company.

The Trust Company is authorized to manage, disburse, transfer, safekeep and invest funds and securities provided by statute or belonging to state and local entities and gives the Comptroller's office direct access to services provided by the Federal Reserve System. Separate financial statements may be obtained by contacting the Trust Company at 208 E. 10th St., 4th Floor, Austin, Texas 78701.

Texas Governor's Mansion Restoration Fund (TGMRF) is a legally separate entity established to raise awareness and provide financial assistance to the state for the restoration of the Texas Governor's Mansion. TGMRF is closely related to the state of Texas because the Office of the Governor provides administrative services to TGMRF, including accounting, the filing of taxes and the collection of donations. Separate financial statements may be obtained by contacting the Office of the Governor at P.O. Box 12428, Austin, Texas 78711.

Cancer Prevention and Research Institute of Texas Foundation (CPRIT Foundation) is a legally separate entity established to augment the activities of the Cancer Prevention and Research Institute of Texas (CPRIT), a state agency, in the form of public outreach, marketing and executive recruitment. The five-member board is appointed by CPRIT's oversight committee, which can also remove board members at any time with or without cause. The CPRIT Foundation was dissolved in May 2013, but final close-out is not expected to occur until fiscal 2014, and financial activity is reported for fiscal 2013. The CPRIT Foundation did not issue separate financial statements for fiscal 2013. Information about the CPRIT Foundation may be obtained by contacting CPRIT at P.O. Box 12097, Austin, Texas 78711.

Grand Parkway Association (GPA) is a legally separate entity established to facilitate the efficient development of the city of Houston's third outer highway loop to serve the regional mobility needs of the metropolitan Houston area. The Texas Transportation Commission,

which is the governing body of the Texas Department of Transportation, appoints the voting majority of the GPA's governing board, and has the ability to remove appointed board members at will. Separate financial statements may be obtained by contacting the GPA at 4544 Post Oak Place, Suite 222, Houston, Texas 77027.

Texas Private Activity Bond Surface Transportation Corporation (TxPABST) is a legally separate entity that acts on behalf of the Texas Department of Transportation (TxDOT) in the promotion and development of transportation facilities by issuing private activity bonds for projects developed under comprehensive development agreements (CDA) entered into by TxDOT. Bonds issued by TxPABST are not legal obligations of the state and are payable solely from payments received by or on behalf of a CDA developer. The Texas Transportation Commission appoints the voting majority of TxPABST's governing board, and has the ability to remove appointed board members at will. TxPABST does not have any financial activity, as its sole purpose is to issue debt on behalf of TxDOT.

Grand Parkway Transportation Corporation (GPTC) is a legally separate entity that acts on behalf of TxDOT in the promotion and development of the Grand Parkway project by issuing bonds and entering into CDAs with developers for the design and construction of several segments of the Grand Parkway project. The Texas Transportation Commission appoints the voting majority of GPTC's governing board, and has the ability to remove appointed board members at will. Separate financial statements may be obtained by contacting GPTC at 125 East 11th Street, Austin, Texas 78701.

Windham School District (WSD) is a legally separate entity that provides education to inmates within the Texas Department of Criminal Justice. The Texas Board of Criminal Justice serves as the board of trustees for the WSD. The primary government is able to impose its will on the WSD through its ability to mod-

ify or approve the budget of the WSD. WSD's entire debt is covered by the state of Texas through appropriations, and the state is liable for any and all outstanding debt. WSD does not issue separate financial statements. Information about WSD may be obtained by contacting the Texas Department of Criminal Justice at P.O. Box 13034, Austin, Texas 78711.

Friends of the Texas Historical Commission

(Friends) is a legally separate entity whose sole purpose is to support the activities of the Texas Historical Commission (THC). Friends is reported as a component unit due to it being closely related to the primary government. The THC provides office space to Friends. In addition, the staff of Friends participates in programs sponsored by THC. Separate financial statements may be obtained by contacting Friends at P.O. Box 13497, Austin, Texas 78711.

Texas Tech Foundation Inc. (TTF) is a legally separate entity established to financially support and serve the fundraising needs of Texas Tech University System (TTUS). The governing board of TTF is appointed by the TTUS board of regents. The board of regents has the ability to impose its will on TTF through its ability to veto, override, or modify the decisions of TTF and its ability to modify or approve the budget of TTF. Separate financial statements may be obtained by contacting TTF at P.O. Box 41102, Lubbock, Texas 79409.

National Wind Resource Center (NWRC) is a legally separate entity established to support research at Texas Tech University (TTU). Five of the nine members of the governing board of NWRC are TTU personnel. TTU controls all assets of NWRC and may modify NWRC's budget. Separate financial statements may be obtained by contacting NWRC at P.O. Box 41091, Lubbock, Texas 79409.

Texas Tech Physician Associates (TTPA) is a legally separate entity established for the sole purpose of, and is operated exclusively for, the benefit of the Texas Tech University Health Science Center (TTUHSC).

The nine-member governing board of TTPA is appointed by TTUHSC. TTUHSC controls all financial and operational transactions of TTPA, and has the ability to remove board members at will. Separate financial statements may be obtained by contacting TTPA at Provider Payor Relations, 3601 4th Street, Lubbock, Texas 79430.

Texas State University - San Marcos Research **Foundation** (SMRF) is a legally separate entity established to support the mission of Texas State University San Marcos and its objectives of promoting higher education, conducting research, providing public service and assisting in economic development in Texas. The key business officers of Texas State University – San Marcos comprise the entirety of SMRF's officers and directors. Texas State University - San Marcos is able to impose its will on SMRF through its ability to remove board members at will, its ability to modify or approve the budget of SMRF, its ability to modify or approve the rates or fees affecting revenues of SMRF and its ability to appoint, hire, reassign or dismiss those persons responsible for the day-to-day operations of SMRF. SMRF is reported for the fiscal year ended Feb. 28, 2013. Separate financial statements may be obtained by contacting Texas State University, Office of the President for Finance and Support Services, at 601 University Drive, San Marcos, Texas 78666-4684.

Harold M. Freeman Educational Foundation (Freeman Foundation) is a legally separate entity formed through a trust to make the use of the Freeman Ranch available exclusively to Texas State University – San Marcos. The Freeman Ranch is used and operated solely for farm, ranch and game management, education, and research purposes in connection with the educational activities of Texas State University – San Marcos. There is no formal governing board for the Freeman Foundation. Texas State University – San Marcos acts as an active co-trustee to operate the ranch. Frost Bank operates as an inactive trustee to ensure the provisions

of the trust are followed. Based on the Freeman Foundation being closely related to Texas State University – San Marcos, the Freeman Foundation is included as a blended component unit. Separate financial statements are not issued by the Freeman Foundation. Information about the Freeman Foundation may be obtained by contacting Texas State University, Office of the President for Finance and Support Services, at 601 University Drive, San Marcos, Texas 78666-4684.

Texas A&M Research Foundation (TAMRF) is a legally separate entity established to facilitate research and development within the Texas A&M University System (A&M). The board of regents appoints the voting majority of TAMRF, and can impose its will through its ability to remove appointed board members at will. A&M can also impose its will through its ability to modify or approve the budget of TAMRF. Separate financial statements may be obtained by contacting TAMRF at 400 Harvey Mitchell Parkway South, Suite 100, College Station, Texas 77845.

Southwestern Health Systems Inc. (SHSI) is a legally separate entity established to support the University of Texas Southwestern Medical Center (UTSWMC). Its four-member governing board is appointed by the UTSWMC. UTSWMC has the ability to impose its will on SHSI through its ability to remove appointed board members at will, its ability to modify or approve the budget of SHSI and its ability to modify or approve rates or fees affecting revenues of SHSI. Separate financial statements may be obtained by contacting SHSI at 5323 Harry Hines Boulevard, Dallas, Texas 75390.

Southwestern Moncrief Cancer Center (SW Moncrief) is a legally separate entity established to support the UTSWMC. Its four-member governing board is appointed by the president of UTSWMC. UTSWMC has the ability to impose its will on SW Moncrief through its ability to remove appointed board members at will, its ability to modify or approve the budget of

SW Moncrief and its ability to modify or approve rates or fees affecting revenues of SW Moncrief. Separate financial statements may be obtained by contacting SW Moncrief at 400 West Magnolia Avenue, Fort Worth, Texas 76104.

Moncrief Cancer Foundation (Moncrief) is a legally separate entity established to support the UTSWMC. Its six-member governing board is appointed by the president of UTSWMC. UTSWMC has the ability to impose its will on Moncrief through its ability to remove appointed board members at will, its ability to modify or approve the budget of Moncrief and its ability to modify or approve rates or fees affecting revenues of Moncrief. Separate financial statements may be obtained by contacting Moncrief at 5323 Harry Hines Boulevard, Dallas, Texas 75390.

University of Texas Medical Branch Healthcare Systems Inc. (Healthcare Systems) is a legally separate entity established to support the University of Texas Medical Branch at Galveston (UTMB). Its eightmember governing board is appointed by the UTMB. UTMB has the ability to impose its will on Healthcare Systems through its ability to remove appointed board members, its ability to modify the budget of Healthcare Systems, its ability to appoint, hire, reassign or dismiss those responsible for Healthcare Systems' day-to-day operations and its ability to unilaterally abolish Healthcare Systems. Separate financial statements may be obtained by contacting Healthcare Systems at 301 University Boulevard, Galveston, Texas 77555.

University Medical Branch Student Book Store Inc. (Book Store) is a legally separate entity established to operate the book store for UTMB. Its five-member governing board is appointed by UTMB. UTMB has the ability to impose its will through its ability to remove appointed board members at will and its ability to appoint, hire, reassign or dismiss those responsible for the Book Store's day-to-day operations. The Book Store is reported for the fiscal year ended June 30,

2013. Separate financial statements may be obtained by contacting the Book Store at 301 University Boulevard, Galveston, Texas 77555.

University of Texas Physicians (UT Physicians) is a legally separate entity established to provide management services for the physician practice plan at the University of Texas Health Science Center at Houston (UTHSCH). Its five-member governing board is appointed by UTHSCH. UTHSCH has the ability to impose its will on UT Physicians through its ability to modify or approve the budget of UT Physicians, its ability to modify or approve rates or fees affecting revenues of UT Physicians and its ability to appoint, hire, reassign or dismiss those responsible for UT Physicians day-to-day operations. Separate financial statements may be obtained by contacting UT Physicians at P.O. Box 20627, Houston, Texas 77225.

University of Texas System Medical Foundation (Medical Foundation) is a legally separate entity established to support the medical residency programs at UTHSCH. Its three-member governing board is appointed by the UTHSCH. UTHSCH has the ability to impose its will on the Medical Foundation through its ability to modify or approve the budget of the Medical Foundation and its ability to appoint, hire, reassign or dismiss those responsible for the Medical Foundation's day-to-day operations. Separate financial statements may be obtained by contacting the Medical Foundation at 6431 Fannin, Suite JJL 310, Houston, Texas 77030.

University Physicians Group (UPG) is a legally separate entity established to provide health care education and research activity to the University of Texas Health Science Center at San Antonio (UTHSCSA). Its five-member governing board consists of the dean of the School of Medicine and four members elected by the practice plan (physicians) at UTHSCSA. UTHSCSA has the ability to remove board members at will, the ability to modify or approve the budget of UPG, the ability to

veto, overrule or modify the decisions of UPG's board, the ability to appoint, hire, reassign or dismiss those responsible for UPG's day-to-day operations and the ability to unilaterally abolish UPG. Separate financial statements may be obtained by contacting UPG at 6126 Wurzbach Road, San Antonio, Texas 78238.

M.D. Anderson Physicians Network (MDAPN) is a legally separate entity established to support the University of Texas M.D. Anderson Cancer Center (Cancer Center). MDAPN's four-member board is appointed by the president of the Cancer Center. The president can also remove appointed board members at will. Separate financial statements may be obtained by contacting MDAPN at 7505 South Main, Suite 500, Houston, Texas 77030.

M.D. Anderson Services Corporation (MDASC) is a legally separate entity established to support the Cancer Center. The seven-member board is appointed by the president of the Cancer Center and the University of Texas System (System) board of regents. The president may remove appointed board members at will. Separate financial statements may be obtained by contacting MDASC at 7505 South Main, Suite 500, Houston, Texas 77030.

East Texas Quality Care Network (ETQCN) is a legally separate entity established to provide agency nursing services to the University of Texas Health Science Center at Tyler (UTHSCT). Its four-member governing board is appointed by UTHSCT. UTHSCT has the ability to remove board members at will, the ability to modify or approve the budget of ETQCN, the ability to modify or approve rates or fees affecting revenues of ETQCN, the ability to veto, overrule or modify the decisions of ETQCN's board, the ability to appoint, hire, reassign or dismiss those responsible for ETQCN's day-to-day operations and the ability to unilaterally abolish ETQCN. Separate financial statements may be obtained by contacting ETQCN at P.O. Box 6053, Tyler, Texas 75711-6053.

University of Texas Investment Management Co.

(UTIMCO) is a legally separate entity established to provide investment management services to the System. UTIMCO's nine-member board consists of three members of the System board of regents, the chancellor of the System, three members appointed by the System board of regents and two members appointed by the Texas A&M board of regents. The System has the ability to impose its will through its ability to modify or approve UTIMCO's budget, its ability to modify or approve rates or fees affecting UTIMCO's revenues, its ability to veto, overrule or modify the decisions of UTIMCO's board, its ability to appoint, hire, reassign or dismiss those responsible for UTIMCO's day-to-day operations and its ability to unilaterally abolish UTIM-CO. Separate financial statements may be obtained by contacting UTIMCO at 401 Congress Avenue, Suite 2800, Austin, Texas 78701.

University of Texas Fine Arts Foundation (Fine Arts) is a legally separate entity established to acquire the Suida-Manning Art Collection for the University of Texas at Austin (UT–Austin) Blanton Museum of Art. Fine Arts' three-member governing board is appointed by UT–Austin. UT–Austin has the ability to impose its will on Fine Arts through its ability to remove appointed board members at will, its ability to modify or approve Fine Arts' budget, its ability to veto, overrule or modify the decisions of Fine Arts and its ability to unilaterally abolish Fine Arts. Fine Arts is reported for the fiscal year ended Dec. 31, 2012. Separate financial statements may be obtained by contacting UT–Austin at Main Building, P.O. Box T, Austin, Texas 78713.

Communication Foundation is a legally separate entity established to support the UT–Austin College of Communication. Its three-member governing board is appointed by UT–Austin. UT–Austin has the ability to impose its will on the Communication Foundation through its ability to remove appointed board members at will, its ability to modify or approve the Communi-

cation Foundation's budget, its ability to veto, overrule or modify the decisions of the Communication Foundation and its ability to unilaterally abolish the Communication Foundation. Separate financial statements may be obtained by contacting UT–Austin at P.O. Box 7322, Austin, Texas 78713.

Discretely Presented Component Units

The state is financially accountable for the following legally separate entities (component units); however, the component units do not provide services entirely or almost entirely to the state nor are the component units' debts expected to be repaid entirely or almost entirely with the resources of the state. The component units' financial data is discretely presented in the component unit column of the state's government-wide financial statements.

Texas Guaranteed Student Loan Corporation

(TGSLC) is a private nonprofit corporation that guarantees loans made to eligible students under the federal guaranteed student loan program. All nine members of TGSLC's board are appointed by the governor with the advice and consent of the Senate. The state of Texas imposes its will on TGSLC through its application of the Texas Sunset Act. TGSLC's liabilities are not debts of the state. TGSLC received a one-time appropriation of \$1.5 million to fund initial startup operations. TGSLC is reported for the fiscal year ended Sept. 30, 2013. Separate financial statements may be obtained by contacting TGSLC at P.O. Box 83100, Round Rock, Texas 78683-3100.

Teacher Retirement System of Texas (TRS) is a legally separate entity established by the Legislature to administer retirement and disability annuities to employees and beneficiaries of public school systems and institutions of higher education. TRS is governed by a nine-member board of trustees, three of whom are direct appointments of the governor. The remaining trustees are appointed by the governor from lists prepared by various

constituent groups. TRS is subject to the budget approval powers of the Texas Legislature, and therefore is fiscally dependent on the state of Texas. The retired employees insurance program and 403(b) administrative program are reported in the component unit column of the government-wide financial statements, whereas the employee benefit trust fund and active employees insurance are reported in the pension and other employee benefit trust funds financial statements. Separate financial statements may be obtained by contacting TRS at 1000 Red River St., Austin, Texas 78701.

State Bar of Texas is a public corporation and an administrative agency of the judicial branch of government. The purpose of the State Bar is to ensure that public responsibilities of the legal profession are effectively discharged. The annual budget for the State Bar of Texas must be reviewed and approved by the Supreme Court, thus making the State Bar of Texas fiscally dependent on the state of Texas. The State Bar is reported for the fiscal year ended May 31, 2013. Separate financial statements may be obtained by contacting the State Bar at 1414 Colorado St., Austin, Texas 78701.

Texas State Affordable Housing Corporation

(TSAHC) was incorporated under the Texas Nonprofit Corporation Act and is legally separate from the state. Its purpose is to serve the housing needs of low-income Texans, professional educators, firefighters and police officers who are first-time home buyers and are not afforded housing finance options through conventional lending channels. TSAHC operates under the name Texas Star Mortgage to provide single and multifamily loans to low-income Texans. Prior to any bonds being issued by TSAHC, the issuance must be reviewed by the Bond Review Board, which is composed of the governor, lieutenant governor, speaker of the House of Representatives and the Comptroller. Separate financial statements may be obtained by contacting TSAHC at P.O. Box 12637, Austin, Texas 78711-2637.

OneStar National Service Commission Inc. and OneStar Foundation (OneStar) are legally separate nonprofit corporations that administer the AmeriCorps*Texas program. They serve as the state's liaison to and oversee Texas' participation in OneStar programs for the Corporation for National and Community Service (a federal agency), as well as prepare a comprehensive three-year national service plan for the state. The governor appoints all members of OneStar's boards. The governor can also remove any board member at will. The OneStar Foundation Inc. performs all administrative duties of the OneStar National Service Commission Inc., as well as provides technical assistance, education, information and other support to the volunteer community. OneStar is reported for the fiscal year ended Dec. 31, 2012. The financial statements of OneStar can be obtained by contacting OneStar at 9011 Mountain Ridge Drive, Suite 100, Austin, Texas 78759.

Texas Low-Level Radioactive Waste Disposal Compact Commission (Commission) is a legally separate organization established to promote the health, safety and welfare of the citizens and environment of the states participating in the Texas Low-Level Radioactive Waste Disposal Compact (Compact), known as party states. There are currently three party states, Texas, Maine and Vermont, with Texas serving as the host party state. The mission of the Commission is to:

- Limit the number of radioactive waste disposal facilities
- Effectively, efficiently and economically manage low-level radioactive waste
- Encourage the reduction of the generation thereof

Since Texas serves as the host party state for the Compact, it is entitled to six voting members, whereas the other party states are only entitled to one voting member. The governor appoints the six members of the Commission serving on behalf of Texas. As host state,

Texas has the authority to establish the disposal fees assessed at the facility for disposal of low-level radio-active waste generated in the party states. The Texas Legislature, with the approval of the governor, also has the authority to revise the portion of the Compact pertaining to the volume of waste the host state will dispose of without the consent of the nonhost party states. The financial statements of the Commission may be obtained by contacting the Commission at 333 Guadalupe St. #3-240, Austin, Texas 78701.

Texas Prepaid Higher Education Tuition Scholar**ship Foundation, Inc.** (TPHETSF) is a legally separate entity created to provide prepaid tuition scholarships to students meeting economic or academic requirements. TPHETSF is a direct-support organization of the prepaid tuition program and is authorized by the Texas Education Code. TPHETSF was previously reported as a blended component unit. Due to an analysis performed this year of the financial relationship between TPHETSF and the primary government, it was determined that TPHETSF should be reported as a discrete component unit. TPHETSF is governed by a board composed of the Comptroller, a member appointed by the governor with the advice and consent of the Senate and three members appointed jointly by the Comptroller and the member who is appointed by the governor. The Comptroller assigns and supervises employees responsible for the day-to-day operations of TPHETSF. Separate financial statements may be obtained by contacting the Texas Comptroller of Public Accounts, Texas Guaranteed Tuition Plan at 111 E. 17th Street, Austin, Texas 78774.

Texas Match the Promise Foundation (TMPF) is a legally separate entity established to implement the Texas Save and Match Program, which helps families save for college by offering competitive matching scholarships and tuition grants to Texas students who participate in the Texas Tuition Promise Fund. TMPF was previously reported as a blended component unit. Due

to an analysis performed this year of the financial relationship between TMPF and the primary government, it was determined that TMPF should be reported as a discrete component unit. The Comptroller appoints the Match Foundation's governing board, and can remove appointed board members at will. The Comptroller also assigns and supervises employees responsible for the day-to-day operations of TMPF. Separate financial statements may be obtained by contacting the Texas Comptroller of Public Accounts, Texas Guaranteed Tuition Plan at 111 E. 17th Street, Austin, Texas 78774.

Texas Windstorm Insurance Association (Association) is a legally separate organization established to provide an adequate market for windstorm and hail insurance in the seacoast territory of Texas and serves as an insurer of last resort. The commissioner of the Texas Department of Insurance (TDI) appoints the ninemember board of directors, and the board is responsible and accountable to the commissioner. The state of Texas has the ability to impose its will on the Association through TDI commissioner approval of rates and maximum liability limits for windstorm and hail insurance policies issued by the Association. The Association is reported for the fiscal year ended Dec. 31, 2012. Separate financial statements may be obtained by contacting the Association at 5700 South Mopac, Building E, Suite 530, Austin, Texas 78749.

Surplus Lines Stamping Office of Texas (Stamping Office) is a legally separate nonprofit corporation created by the Legislature to assist TDI in the regulation of surplus lines insurance. TDI's commissioner appoints the board. The Stamping Office performs its functions under a plan of operation approved by order of TDI. The Stamping Office assesses each surplus lines insurance agent a stamping fee for the administrative funding of the Stamping Office. The state of Texas has the ability to impose its will upon the Stamping Office through the approval of the assessment rate that funds its operations. The Stamping Office is reported for

the fiscal year ended Dec. 31, 2012. Separate financial statements may be obtained by contacting the Stamping Office at P.O. Box 160170, Austin, Texas 78716-0170.

Texas Health Reinsurance System (THRS) is a legally separate entity that reinsures risks covered under the health benefit plans of small employers' insurance carriers. TDI's commissioner appoints, supervises and controls the nine-member board. The state of Texas has the ability to impose its will through TDI commissioner approval of base reinsurance premium rates and the assessment rates against reinsured health benefit plan issuers. Financial statements are presented on statutory accounting principles established by TDI, and are reported for the fiscal year ended Dec. 31, 2012. Financial statements may be obtained by contacting THRS at 100 Great Meadow Rd., Suite 704, Wethersfield, Connecticut 06109.

Texas Health Insurance Pool (THIP) (previously titled Texas Health Insurance Risk Pool) is a legally separate entity that provides access to quality health care at a minimum cost to the public for those unable to obtain traditional health care coverage. The nine-member board of directors is appointed by TDI's commissioner. TDI approves all rates and rate schedules before they are used. THIP is reported for the fiscal year ended Dec. 31, 2012. Financial statements may be obtained by contacting THIP at 1701 Director's Blvd., Suite 120, Austin, Texas 78744.

Texas Title Insurance Guaranty Association

(TTIGA) is a legally separate non-profit organization created for the purpose of providing funds for the protection of holders of covered claims as defined in the Texas Insurance Code. This applies to all title insurance written by title insurance companies authorized to do business in Texas. The nine-member board of directors is appointed by TDI's commissioner. TDI is able to impose its will on TTIGA through its ability to veto, overrule or modify the decisions of TTIGA. TTIGA is reported for the fiscal year ended Dec. 31, 2012. Sepa-

rate financial statements may be obtained by contacting TTIGA at 106 East 6th Street, Suite 300, Austin, Texas 78701-3661.

Texas Life and Health Insurance Guaranty Association (TLHIGA), previously titled Life, Accident, Health and Hospital Service Insurance Guaranty Association, is a legally separate entity created to protect persons against failure in the performance of contractual obligations under life, accident and health insurance policies and annuity contracts due to the impairment or insolvency of the member insurer that issued the policies or contracts. TDI's commissioner appoints TLHIGA's nine-member board of directors. TDI is able to impose its will on TLHIGA through its ability to veto, overrule or modify the decisions of TLHIGA. TLHIGA is reported for the fiscal year ended Dec. 31, 2012. Separate financial statements may be obtained by contacting TLHIGA at 515 Congress Avenue, Suite 1875, Austin, Texas 78701.

Texas Property and Casualty Insurance Guaranty **Association** (TPCIGA) is a legally separate entity created to assess the cost of providing protection among insurers for providing a mechanism for the payment of covered claims, to avoid excessive delay in payments, to avoid financial loss to claimants or policyholders due to an insurer's impairment, and to assist in the detection and prevention of insurer insolvencies. The nine-member board of directors consists of five members selected by member insurers, with the approval of TDI's commissioner, and four members appointed by the commissioner. TDI is able to impose its will on TPCIGA due to the requirements that TPCIGA's plan of operation, and any amendments, must be approved by TDI's commissioner. TPCIGA is reported for the fiscal year ended Dec. 31, 2012. Separate financial statements may be obtained by contacting TPCIGA at 9120 Burnet Road, Austin, Texas 78758-5204.

Fair Access to Insurance Requirements Plan Association (FAIRPA) is a legally separate entity established to administer the Fair Access to Insurance Requirements Plan (FAIR Plan), which delivers property insurance to Texas residents in underserved areas. The 11-member governing board is appointed by TDI's commissioner. The commissioner may remove appointed board members at will. FAIRPA is reported for the fiscal year ended Dec. 31, 2012. Separate financial statements may be obtained by contacting FAIRPA at 5700 South Mopac, Building A, Austin, Texas 78749.

Texas Boll Weevil Eradication Foundation Inc. (Foundation) is a legally separate entity that establishes and implements a boll weevil eradication program for Texas. It is governed by 21 board members. The Texas Department of Agriculture's (TDA) commissioner appoints five of the board members. Although TDA must approve the Foundation's budget, assessment fees and debt, a financial benefit or financial burden does not exist between the Foundation and the primary government. Therefore, the primary government is not financially accountable for the Foundation. However, based on the Foundation's financial relationship with the TDA, omitting the Foundation would result in incomplete financial statements. The Foundation is reported for the fiscal year ended Dec. 31, 2012. Separate financial statements may be obtained by contacting TDA at P.O. Box 12847, Austin, Texas 78711-2847.

Texas Agricultural Finance Authority (TAFA) is a legally separate entity that provides financial assistance for the expansion, development and diversification of agricultural businesses, and primarily benefits the citizens of Texas. The governor, with the advice and consent of the Senate, appoints seven of the nine members of the board of directors. The commissioner of TDA administers TAFA with the assistance of the board. If there are insufficient funds to pay TAFA's bond obligations, the primary government is obligated to transfer money from the state treasury to TAFA in an amount sufficient to pay those obligations. Separate financial

statements may be obtained by contacting TDA at P.O. Box 12847, Austin, Texas 78711-2847.

Texas Water Resources Finance Authority

(Authority) is a legally separate entity created by the Legislature as a governmental entity and body politic and corporate for the purpose of increasing the availability of financing for water-related projects, and primarily benefits the citizens of Texas. A board of directors, composed of the six members of the Texas Water Development Board (TWDB), governs the Authority. The members of the TWDB are appointed by the governor. TWDB, through a sales and servicing agreement, wholly manages the Authority's operations. Prior to

TWDB at P.O. Box 13231, Austin, Texas 78711-3231.

Texas Appraiser Licensing and Certification

any bonds being issued by the Authority, the issuance

must be reviewed by the Bond Review Board, which is

composed of the governor, lieutenant governor, speaker

of the House of Representatives and the Comptroller.

Financial statements may be obtained by contacting

Board (TALCB) is a legally separate entity statutorily created as an independent subdivision of the Texas Real Estate Commission (TREC) to serve the real estate community in Texas. The governor appoints the members of the governing board. TREC provides administrative support to TALCB, but has no authority to approve or modify its budget or to set its fees. Although TALCB is not fiscally dependent on TREC, to exclude it would result in the presentation of incomplete financial statements. Financial statements can be obtained by contacting TREC at P.O. Box 12188, Austin, Texas 78711-2188.

Texas Economic Development Corporation

(TED Corp.), a legally separate nonprofit corporation, was created to assist, promote, develop and advance economic development in the state of Texas. TED Corp.'s services primarily benefit the Texas citizenry. The board of directors is appointed by the governor. The Office of the Governor is the oversight agency for TED Corp.,

and has the ability to remove board members at will. Separate financial statements may be obtained by contacting TED Corp. at P.O. Box 684702, Austin, Texas 78768.

Texas Small Business Industrial Development

Corporation (TSBIDC) is a legally separate entity and was chartered to promote economic development in the state of Texas. TSBIDC's services primarily benefit the Texas citizenry. The board of directors is appointed by the governor. The Office of the Governor is the oversight agency for TSBIDC. The Articles of Incorporation and Bylaws of TSBIDC cannot be changed without the approval of the Office of the Governor. Separate financial statements may be obtained by contacting the Office of the Governor at P.O. Box 12428, Austin, Texas 78711.

Texas Disaster Relief Fund (TDRF), a legally separate nonprofit corporation, was established to help the Office of the Governor provide disaster relief. The services provided by TDRF assist the Office of the Governor in responding to the needs of the citizens before, during and after a disaster in Texas. Based on TDRF's financial relationship with the Office of the Governor, omitting TDRF would result in misleading financial statements. TDRF's financial statements may be obtained by contacting the Office of the Governor at P.O. Box 12428, Austin, Texas 78711.

Texas Health Services Authority (THSA) is a legally separate entity created to assist the Office of the Governor with the improvement of the Texas health care system. THSA promotes and coordinates the electronic exchange of health information throughout the state to ensure information is available to health care providers and to improve patient safety and quality of care. The board of directors consists of 11 members and is appointed by the governor, with the advice and consent of the Senate. The state of Texas has the ability to impose its will upon THSA through the ability of the governor to order the dissolution of THSA at any time the governor declares the purposes of THSA are fulfilled or that THSA

is inoperative or abandoned. THSA is reported for the fiscal year ended Sept. 30, 2012. THSA's financial statements may be obtained by contacting THSA at 221 E. 9th St., Suite 201, Austin, Texas 78701.

Beacon State Fund is a legally separate organization established to assist the Governor's Commission for Women (Commission) to promote issues affecting the women of Texas. The Beacon State Fund increases public awareness through the distribution of information, media events and community outreach programs. Members of the board of trustees are appointed by the Office of the Governor or someone designated by the Office of the Governor. The Office of the Governor has fiscal oversight over the Beacon State Fund to ensure funds are expended properly and the public purpose is being accomplished. The Beacon State Fund is reported for the year ended Dec. 31, 2012. Financial statements may be obtained by contacting the Commission at P.O. Box 12428, Austin, Texas 78711.

State Agency Council is a legally separate organization established to assist the Governor's Commission for Women (Commission) by honoring women who have made significant contributions to Texas through their work in state government. The board of directors is appointed by the director of the Commission. The director of the Commission is required to sign all contracts and has check signing privileges. Expenses exceeding \$500 require the Commission director's signature. Financial statements for the State Agency Council may be obtained by contacting the Commission at P.O. Box 12428, Austin, Texas 78711.

Film Texas Fund is a legally separate nonprofit organization created to support, encourage and promote the development of the film, television and multimedia industry in Texas. The Film Texas Fund is closely related to the Office of the Governor Texas Film Commission (Commission). However, the Commission is not financially accountable for the Film Texas Fund and the Film Texas Fund supports its own mission in promoting the

film industry in Texas. Due to the Film Texas Fund's close financial relationship with the Commission, omitting the Film Texas Fund would result in misleading financial statements. The Film Texas Fund is reported for the year ended Dec. 31, 2012. Financial statements for the Film Texas Fund may be obtained by contacting the Office of the Governor at P.O. Box 12428, Austin, Texas 78711.

Texas Governor's Mansion Administration

(TGMA) is a legally separate non-profit organization established to support the financial administration of catering and facility expenses associated with the use of the official residence of the governor of the state of Texas for non-political events. TGMA is closely related to the state of Texas because the Office of the Governor provides administrative services, including accounting services, to TGMA. TGMA is reported for the year ended Dec. 31, 2012. Separate financial statements for TGMA may be obtained by contacting the Office of the Governor at P.O. Box 12428, Austin, Texas 78711.

Robert G. Carr and Nona K. Carr Scholarship

Foundation (Carr Foundation) is a legally separate entity established for the sole purpose of providing scholarships to students of Angelo State University (ASU), a campus within the Texas Tech University System. The ASU board of regents serves as the governing board for the Carr Foundation, and has the ability to appoint, hire, reassign or dismiss those persons responsible for the day-to-day operations of the Carr Foundation. Separate financial statements may be obtained by contacting the Carr Foundation at P.O. Box 11007C, ASU Station, San Angelo, Texas 76909.

University of North Texas Foundation (Foundation) is a legally separate entity established to raise funding for scholarships for students of the University of North Texas, as well as provide funding for the benefit of the University of North Texas. The majority of endowments supporting the University of North Texas scholarships and other University programs are

owned by the Foundation. Therefore, the Foundation is closely related to the University of North Texas, and failure to include its financial activities would lead to incomplete financial statements. Separate financial statements may be obtained by contacting the Foundation at 1155 Union Circle #311250, Denton, Texas 76203-5017.

Casa Verde Research Center, Sociedad Anonimo

(Casa Verde) is a legally separate organization established in Costa Rica to provide research opportunities for students and faculty of Texas A&M University. Casa Verde also provides services to outside organizations, such as study abroad programs to corporations and research and education opportunities for Costa Rican universities. The board of Casa Verde is appointed by executive management of Texas A&M University. The executive management can also remove board members at will and modify the budget of Casa Verde. Separate financial statements may be obtained by contacting Texas A&M University, External Reporting, at 750 Agronomy Rd., Suite 3101 GSC, 6000 TAMU, College Station, Texas 77843-6000.

Representacion de TAMU en la Republica Mexicana, A.C. (Mexico Center) is a legally separate organization established in Mexico City, Mexico, to serve as a central point of contact for the support and promotion of Texas A&M University's international education, research and outreach activities. In addition, the Mexico Center provides services outside of Texas A&M University, such as to Mexican government entities. The executive management of Texas A&M University appoints the voting majority of the board of the Mexico Center. It can also remove board members at will and approve and modify the Mexico Center's budget. The Mexico Center is reported for the year ended Dec. 31, 2012. Separate financial statements may be obtained by contacting Texas A&M University, External Reporting, at 750 Agronomy Rd., Suite 3101 GSC, 6000 TAMU, College Station, Texas 77843-6000.

National Biosecurity Foundation (NBF) is a legally separate nonprofit corporation established to develop national, regional and local biosecurity countermeasures against unconventional weapons, including biological, chemical and radioactive weapons, and communicable diseases applicable to both military and civilian populations. The board consists of initially three directors, originally appointed by the deputy general counsel of the Texas A&M University System (A&M). Additional directors may be elected by a majority of the existing directors of NBF. A&M can modify or approve the budget of NBF, as well as veto, overrule or modify the decisions of NBF's board. NBF was originally scheduled to be dissolved at the end of fiscal 2012. However, it was never officially dissolved, and is still in existence and operational as of fiscal 2013. Separate financial statements may be obtained by contacting Texas A&M University System, Office of Budgets and Accounting, at 301 Tarrow, Suite 350, College Station, Texas 77840-7896.

Texas 4-H Inc. is a legally separate nonprofit organization established to prepare the youth of Texas to meet the challenges of childhood, adolescence and adulthood through a coordinated, long-term, progressive series of educational experiences that enhance life skills and develop social, emotional, physical and cognitive competencies. Texas 4-H Inc. serves as the central organization for the subordinate organizations and affiliate organizations that comprise the 4-H program in Texas. Texas A&M AgriLife Extension Service is responsible for the Texas 4-H programs. Although the state of Texas is not financially accountable for Texas 4-H Inc., Texas 4-H Inc. is closely related to the Texas A&M University System. Failure to include the financial information of Texas 4-H Inc. would result in misleading financial statements. Separate financial statements may be obtained by contacting Texas A&M University System, Office of Budgets and Accounting, at 301 Tarrow, Suite 350, College Station, Texas 77840-7896.

Related Organizations

Related organizations are legally separate, fiscally independent entities for which the state appoints a voting majority of the board, but the state is not financially accountable for the entity.

Life, Accident, Health and Hospital Service
Insurance Guaranty Association changed its name to
the Texas Life and Health Insurance Guaranty Association (Association). Due to an analysis performed this
year of the financial relationship between the Association and the primary government, it was determined
that the Association should be reported as a discrete
component unit.

Texas Title Insurance Guaranty Association (Guaranty Association) was previously reported as a related organization. Due to an analysis performed this year of the financial relationship between the Guaranty Association and the primary government, it was determined that the Guaranty Association should be reported as a discrete component unit.

Texas Mutual Insurance Company (Texas Mutual) operates as a domestic mutual insurance company providing workers' compensation insurance in the state of Texas and also serves as the insurer of last resort. The governor, with the advice and consent of the Senate, appoints five of the nine members of Texas Mutual's board of directors.

Texas Self-Insurance Group Guaranty Association (TSIGGA) is a legally separate entity created to provide payment of workers' compensation insurance benefits for injured employees covered by an insolvent workers' compensation self-insurance group. The commissioner of the Division of Workers' Compensation appoints two of the six board members, and approves three other members selected by representatives of the certified workers' compensation self-insurance groups.

Midwestern State University Charitable Trust (Trust) is a nonprofit organization with the sole purpose of educational and other activities of Midwestern State

University. It is governed by a board of trustees of no less than three members. This board appoints individuals to fill vacancies on the board as they occur with the approval of the Midwestern State University board of regents. The Trust's board of trustees serves under the direction of the board of regents, which has the power by majority vote to appoint or remove any or all of the trustees.

Charter School Finance Corporation is a non-profit organization with the sole purpose of issuing revenue bonds for authorized open-enrollment charter schools for the acquisition, construction, repair or renovation of education facilities at those schools. The Texas Public Finance Authority appoints the board of directors in consultation with the commissioner of the Texas Education Agency.

Texas State University System Foundation Inc. (Foundation) is a nonprofit corporation with the purpose of providing financial support for the universities and colleges within the Texas State University System. The Foundation provides funds for student scholarships and faculty awards and assists the chancellor in performing his/her duties. The board of directors is comprised of all members of the Texas State University System board of regents, which is appointed by the governor.

Texas Farm and Ranch Lands Conservation

Council (Council) was established to advise and assist the commissioner of the General Land Office with the administration of the Texas Farm and Ranch Lands Conservation Program and to select applicants to receive grants under the program. Due to an analysis performed this year, it was determined that the Council is not legally separate from the primary government. Therefore, the Council is no longer reported as a related organization.

Operation Game Thief Committee was established to administer the operation game thief program. The program facilitates the apprehension and prosecution of persons who violate Texas laws intended to protect the state's natural or cultural resources and the

public safety of persons using those natural or cultural resources. The program also pays rewards and death benefits authorized by Texas statute. The Texas Parks and Wildlife Department's executive director appoints the members of the committee.

Parks and Wildlife Foundation (Foundation) is a legally separate nonprofit organization established to manage and conserve the natural and cultural resources of Texas. The Foundation provides private support to the Texas Parks and Wildlife Department (Department), but the Department is not financially accountable to the Foundation, nor is the Foundation fiscally dependent on the Department. The Foundation is governed by a group of trustees, the majority of whom are appointed by the chairman of the Department.

River Authorities are political subdivisions created by Texas statute. The Texas Constitution, Article XVI, Section 59, authorizes the Legislature to create districts that conserve and develop natural resources of the state. The conservation and development of the state's natural resources includes the control, storing, preservation and distribution for irrigation, power and all other useful purposes of storm waters, flood waters and the waters of rivers and streams; the reclamation and irrigation of arid, semiarid and other lands needing irrigation; the reclamation of drainage of overflowed lands and other lands needing drainage; the conservation and development of forests, water and hydro-electric power; the navigation of inland and coastal waters; and the preservation and conservation of all such natural resources of the state. The state of Texas appoints the voting majority for the following 16 river/water authorities:

- Angelina and Neches River Authority
- Brazos River Authority
- Central Colorado River Authority
- Guadalupe-Blanco River Authority
- Lavaca-Navidad River Authority
- Lower Colorado River Authority
- Lower Neches Valley River Authority

- Nueces River Authority
- Red River Authority
- Sabine River Authority
- San Jacinto River Authority
- Sulphur River Basin Authority
- Trinity River Authority
- Upper Colorado River Authority
- Upper Guadalupe River Authority
- Upper Neches Municipal Water Authority

Note 20

Deficit Fund Balances/Net Position of Individual Nonmajor Funds

Proprietary Funds

The **Texas Prepaid Tuition Plans** reported a deficit of \$541.6 million. The deficit is due to the difference between the present value of actual and projected contract benefit payments and actual and projected contributions from account holders and investment earnings on those contributions to the Texas Guaranteed Tuition Plan (Plan). The Plan was closed to new enrollment in 2003 when tuition was deregulated. Over the life of the Plan, actual tuition and required fees for Texas public four year colleges and universities grew at a higher percentage rate than the Plan's investment return.

The **Grand Parkway Transportation Corporation**, a blended component unit of the Texas Department of Transportation, reported a deficit of \$15.9 million. The deficit is due to the payment of bond issuance costs. None of the segments of the Grand Parkway were opened to traffic as of August 31, 2013, thus no revenues were collected to offset the bond issuance costs.

Discretely Presented Component Units

The **Teacher Retirement System** reported a deficit of \$117.6 million for ActiveCare. The deficit is due to increasing claim costs. The Teacher Retirement System

Board of Trustees has authorized premium rate increases for plan year 2014 to offset higher claim costs.

The **Texas Windstorm Insurance Association** and the **Fair Access to Insurance Requirement Plan Association,** both discrete component units, reported deficits of \$122.4 million and \$19 million, respectively. The deficits are due to increased liabilities associated with claim settlements and estimated claim settlements.

Note 21

Tobacco Settlement

The state of Texas settled a lawsuit against certain tobacco manufacturers in 1998. The settlement included monetary and injunctive relief. The settling tobacco manufacturers agreed to remit annual payments to the state. Estimates made at the time of the agreement projected that these payments could total \$15.1 billion over the first 25 years of the agreement. The court-ordered annual payment amounts are subject to adjustments based on the tobacco companies' domestic cigarette sales, the general consumer inflation rate, the profitability of the tobacco companies and any other court-ordered factors. A revenue accrual of \$311.7 million is based on the payments received in December 2013. Tobacco settlement revenues were \$484 million in fiscal 2012 and \$483.8 million in fiscal 2013. Cumulative actual tobacco settlement revenues as of fiscal 2013 were \$8.1 billion.

Note 22

Donor-Restricted Endowments

The state of Texas has donor-restricted endowments with net appreciation of \$2.2 billion on investments available for authorization for expenditure by the governing board. Details for the amounts of the net appre-

ciation on investments and how they are reported are presented in the table below.

Donor-Restricted Endowments (Amounts in Thousands)						
Donor- Restricted Endowments	Amount of Net Appreciation	Reported in Net Position				
True Endowments Term Endowments	\$ 2,176,516 34,185 \$ 2,210,701	Expendable Expendable				

True endowments require the principal to be maintained inviolate and in perpetuity. Term endowments allow the principal to be expended after the passage of a stated period of time and all conditions of the endowment are met. Expendable funds are those funds that may be expended for either a stated purpose or for a general purpose as per the endowment gift terms. Non-expendable funds are those required to be retained in perpetuity.

The majority of the state's endowments are the results of donations made to institutions of higher education. The Uniform Prudent Management of Institutional Funds Act, Texas Property Code, Chapter 163, provides general guidelines on how endowments should be maintained. An institution may appropriate for expenditures or accumulate as much as the institution determines prudent for the uses, benefits, purposes and duration of the endowment. Each institution sets the amounts and/or percentage of net appreciation on endowment investments that are authorized for expenditure in its spending plan.

Net appreciation on related investment balances for the Robert G. Carr and Nona K. Carr Scholarship Foundation, previously included as part of Texas Tech University System's net appreciation, is now disclosed separately based on the determination that the foundation is a discrete component unit with an ending net appreciation balance of \$3.4 million.

Note 23

Extraordinary and Special Items

The state did not report extraordinary items in fiscal 2013. Extraordinary items are transactions or other events that are both unusual in nature and infrequent in occurrence.

The state did report one special item in fiscal 2013. Special items are significant transactions or other events within the control of management that are either unusual in nature or infrequent in occurrence. The Texas Guaranteed Student Loan Corp., a discrete component unit, was transformed from a public nonprofit corporation to a private nonprofit corporation and made a one-time gift of \$248 million to the state's Veterans Assistance program.

Note 24

Taxes Receivable and Tax Refunds Payable

Taxes receivable and tax refunds payable, as reported in the general fund on the balance sheet – governmental funds, are detailed by tax type in the tables to the right.

Texas franchise tax receivables represent balances due as of Aug. 31, 2013, for business activity that occurred in calendar year 2012. The franchise tax payments were due May 15, 2013; however, taxpayers were allowed to extend the filing date to November 2013.

Franchise taxes are considered earned when the underlying business activity occurs. There are no required estimated payments under this tax. Tax payments are due annually each May 15. The tax earned during the first eight months of calendar year 2013 is not due until May 2014. As a result, the taxes receivable and related revenue that are earned in this eight month period are not measurable and are not accrued at fiscal year-end.

Taxes Receivable by Tax Type

August 31, 2013 (Amounts in Thousands)

Тах Туре	Taxes Receivable
Sales and Use Tax	\$ 1,770,978
Motor Vehicle and Manufactured Housing	144,586
Motor Fuels	5,537
Oil and Natural Gas Production	670,541
Franchise	261,668

Nonmajor Governmental Funds	71,536
Total Taxes Receivable - Balance Sheet - Governmental Funds	\$ 3,635,315

Tax Refunds Payable by Tax Type

August 31, 2013 (Amounts in Thousands)

Тах Туре	Tax Refunds Payable
Oil and Natural Gas Production	\$ 269,551
Franchise	570,451
Total Tax Refunds Payable	\$ 840,002

Note 25

Termination Benefits

Health Care Related Termination Benefits

Health care continuation under the Consolidated Omnibus Budget Reconciliation Act (COBRA) is provided for both voluntary and involuntary terminations. COBRA members are allowed to remain in their eligible insurance program for 18 months, or 29 months if disabled. Covered dependents are eligible to remain in the program for 36 months. COBRA plan administrators for the state include the Employees Retirement

System of Texas, the University of Texas System and the Texas A&M University System.

For self-insured and fully-insured plans, the insurance carrier performs the billing and collections process for COBRA participants. If the plan is self-insured, the insurance carrier then forwards the premium to the plan administrators, net of a 2 percent administrative fee, which is intended to cover costs related to the billing and collection functions. The plan administrators are responsible for any claims or administrative costs associated with COBRA participants that exceed these payments. For fiscal 2013, the cost to the state was approximately \$35.7 million for 3,954 COBRA participants.

For the fully-insured health maintenance organization health insurance plans, the insurance carrier retains all premiums and is liable for all claims and expenses. Premium and expense information is not available for these plans.

Non-Health Care Related Termination Benefits

There were no material non-health care related voluntary or involuntary termination benefits reported in fiscal 2013.

Note 26

Segment Information

Primary Government

A segment is a separately identifiable activity reported as or within enterprise funds for which revenue bonds or other revenue-backed debt instruments are outstanding and for which related expenses, gains, losses, assets and liabilities can be identified. To qualify as a segment, an activity must also be subject to an external requirement to separately account for this revenue stream. There were no activities identified that met the criteria for qualification as a segment. There-

fore, the State did not report segment information in fiscal 2013.

Note 27

Service Concession Arrangements

The state of Texas has seven arrangements that fit the criteria of a service concession arrangement (SCA). As the transferor in these arrangements, the state retains ownership rights and title to all assets associated with an SCA. All of these arrangements were entered into by the Texas Department of Transportation (TxDOT). The fees the operator collects are in the form of tolls. Project maintenance and operations will transfer back to TxDOT once the arrangements have ended.

A general description of each SCA, including status, term and duration, is presented in the table below.

Service Concession Arrangements

August 31, 2013

	Construction	Term of	Concession Dates		
Arrangement Name	Status	Concession	Begin	End	
IH 10 "Katy Managed Lanes"	Complete	46 years	2010	2055*	
SH 130 Segments 5 and 6	Complete	50 years	2012	2062	
SH 121 Concession	Complete	50 years	2009	2059	
North Tarrant Exp Seg 1 and 2-West	Under Construction	52 years	2009	2061	
North Tarrant Exp Seg 3A and 3B	Preliminary Activity	52 years	2009	2061	
LBJ/IH-635 Managed Lanes	Under Construction	52 years	2009	2061	
Grand Parkway Seg D, E, F1, F2, G	Under Construction	40 years	2013	2053*	

* These are estimated end dates. The concession period extends until Harris County/GPTC is fully reimbursed for costs of construction and debt service.

These arrangements were entered to:

- Improve mobility by expanding existing road capacity and introducing managed toll lanes, traditional toll lanes and other strategies aimed at reducing traffic congestion
- Enable the state to deliver these projects faster than would be possible using traditional funding sources

Shift the majority of the financial risk to the operator

In the year an SCA project opens for traffic, TxDOT records the capital assets acquired under the SCA at their fair value with a corresponding entry to deferred inflows of resources. The deferred inflows of resources balance will then be reduced and revenue will be recognized in a systematic manner over the term of the arrangement, beginning when the infrastructure assets are placed into operation. Up-front concession payments received are recorded as assets (cash and cash equivalents) with an offset to deferred inflows of resources. Revenue is recognized and the deferred inflows of resources are reduced in a systematic and rational manner over the term of the arrangement. SCA amounts reported as of Aug. 31, 2013, are presented in the table below.

Service Concession Arrangements – Amounts Reported in Financial Statements – Governmental Activities

August 31, 2013 (Amounts in Thousands)

Arrangement Name	Cash and Cash Equivalents*	Capital Assets	Inflows of Resources**
IH 10 "Katy Managed Lanes"	\$	\$ 250,000	\$ 228,261
SH 130 Segments 5 and 6	126,701	1,434,228	1,498,580
SH 121 Concession	1,756,073	1,338,296	3,489,021
North Tarrant Exp Seg 1 and 2-West		472,177	38,771
North Tarrant Exp Seg 3A and 3B		72,941	
LBJ/IH-635 Managed Lanes		75,070	
Grand Parkway Seg D, E, F1, F2, G		36,327	
	\$ 1,882,774	\$ 3,679,039	\$ 5,254,633

- * The balance of cash and cash equivalents is the amount of unspent up-front concession payments.
- ** The deferred inflows of resources balance that relates to up-front payments received and recorded in the governmental fund financial statements is recorded as deferred revenues.

In some cases, TxDOT is obligated to make contributions of public funds to the SCA project during the construction period for portions of the project's design, construction or right-of-way costs. Outlays of TxDOT funds related to SCA projects are recorded as additions to construction in progress as they are incurred.

The Grand Parkway Transportation Corporation (GPTC) is a blended component unit of TxDOT. In fiscal 2013, GPTC and TxDOT entered into an arrangement that fits the criteria of an SCA. Pursuant to this arrangement, GPTC is responsible for the design, construction, financing and operation of Segments D (Harris County), E, F1, F2 and G of the Grand Parkway (State Highway 99) for a period until the bonds or other debt secured is fully repaid. GPTC will be entitled to all toll revenues during the operations period. At the end of the arrangement, operation of the roadway will be transferred to TxDOT.

The objective of this arrangement is to deliver this project in partnership with TxDOT more quickly than would be possible under a traditional structure.

TxDOT has committed funds in the form of a \$9.6 billion toll equity loan agreement (TELA) to GPTC.

Under the TELA, TxDOT has agreed to lend a negotiated amount each year should revenues of the projects be insufficient to cover operations and maintenance, including debt service. The GPTC funds are to be used to pay for certain costs relating to the development, construction, operation, maintenance and financing of Segments D (Harris County), E, F1, F2 and G and the predevelopment of possible extensions or expansions of the Grand Parkway. The maximum amount of money that can be paid by TxDOT to GPTC under the TELA is equal to the aggregate amount of costs that are authorized under Article VIII, Section 7a of the Texas Constitution

and Section 222.103 of the Texas Transportation Code, i.e. the "Eligible Costs." As of Aug. 31, 2013, no drawdowns of funding have been requested by GPTC under this arrangement.

GPTC has recognized an intangible asset in the amount of \$611.2 million for its costs of design, con-

struction and right-of-way acquisition for the fiscal year ended Aug. 31, 2013. This amount is reported as business-type activities.

Note 28

Deferred Outflows of Resources and Deferred Inflows of Resources

In fiscal 2013, the state reported deferred outflows of resources and deferred inflows of resources in connection with its hedging derivative instruments, service concession arrangements and the acquisition of Texas Wesleyan University Law School by Texas A&M University.

The table below presents the balances of deferred outflows of resources and deferred inflows of resources as of Aug. 31, 2013.

Deferred Outflows of Resources and Deferred Inflows of Resources per the Government-wide Financial Statements

August 31, 2013 (Amounts in Thousands)

	Deferred Outflows of Resources		
Hedging Derivatives (Note 7) Government Acquisition	\$ 393,026 39,065	\$ 17,499	
SCAs (Note 27)		5,254,633	
Total	\$ 432,091	\$ 5,272,132	

Deferred outflows of resources of \$393 million were related to hedging derivatives in a liability position and \$17.5 million of deferred inflows of resources were related to hedging derivatives in an asset position. The net hedging derivative liability of \$375.5 million is disclosed in Note 7.

Deferred outflows of resources of \$39 million represent the unamortized balance of the excess consideration provided by Texas A&M University over the net position acquired in the acquisition of Texas Wesleyan University Law School. The objective of the acquisition of Texas Wesleyan University Law School is to enhance the academic ranking of Texas A&M University by having a law school. The acquisition was finalized on Aug. 13, 2013, with no contingent consideration arrangements. The total consideration provided was \$53.9 million, net position acquired was \$14.7 million, and amortization for fiscal 2013 was \$0.2 million.

Deferred inflows of resources of \$5.3 billion were related to service concession arrangements (SCA) entered into by the Texas Department of Transportation with non-state entities. This amount reflects the unamortized balance of up-front concession payments received and capital assets acquired from these entities. Details of the state's service concession arrangements are disclosed in Note 27.

Note to Budgetary Comparison Schedule

The budgetary comparison schedule presents comparisons of the legally adopted budget with actual data on a budgetary basis. Since accounting principles applied for purposes of developing data on a budgetary basis differ significantly from those used to present financial statements in conformity with generally accepted accounting principles (GAAP), a reconciliation of these differences is presented in the table below.

Reconciliation of Budgetary Basis to August 31, 2013 (Amounts in Thousands)	GAAP B	asis
	General Fund	State Highway Fund
Excess of Revenues and Other Financing Sources Over		
Expenditures and Other Financing Uses –		
Actual Budgetary Basis	\$ 8,558,208	\$ 3,095,513
Pagin of Association Differences		
Basis of Accounting Differences: Receivables and Deferred Revenues	42,957	(13,465)
Payables	263,181	(381,018)
1 ayables	203,161	(361,016)
Perspective Differences:		
Beginning Cash Balances Reported as Other Financing Sources	(2,443,249)	(3,383,303)
Other Revenues Not Budgeted	191,236	, , , , ,
Other Expenditures Not Budgeted	(219,782)	(107,169)
Entity Differences:		
Excess of Revenues and Other Financing Sources Over	000	
Expenditures and Other Financing Uses for Other Activities	822	
Excess (Deficiency) of Revenues and Other Financing		
Sources Over (Under) Expenditures and Other		
Financing Uses – GAAP Basis	\$ 6,393,373	\$ (789,442)
I maneing Osco Oth II Dasis	Ψ 0,575,575	Ψ (707, 112)

The major reconciling items between the budgetary comparison schedule actual and the GAAP financial statements are:

• Basis of Accounting Differences: Revenues and expenditures are reported on the cash basis of accounting in the budgetary comparison schedule but are reported on the modified accrual basis on the GAAP financial statements. Therefore, deferred revenues, receivables and payables are included as reconciling items.

 Perspective Differences: Certain revenues and expenditures, including debt service and the disproportionate share portion of the Federal Medical Assistance program, are not budgeted by the Legislature. The activity for these programs is excluded from the budgetary comparison schedule.

The beginning cash balances are included as other financing sources in the budgetary comparison schedule. The beginning fund bal-

ances are not included as financing sources on the GAAP financial statements.

 Entity Differences: Budgets are not established for sources from capital leases. These financing sources are not included in the budgetary comparison schedule.

Excess of Actual Budgetary Basis Expenditures over Final Budget

General fund – The \$1.4 billion variance in education was due to various prior year educational programs in that year's budget primarily being spent in this fiscal year. The \$4.8 billion variance in health and human services

is the result of increased expenditures made from the excess of federal revenues received over estimates by agencies in this particular function.

Major special revenue fund – state highway fund –

The \$5.4 million variance in general government and the \$7.2 million variance in public safety and corrections is the result of expenditures made from available beginning cash balance in the fund.

Basis of Budgeting

The state's budget is prepared on a cash basis. The Texas Constitution limits appropriation bills to two years. The Legislative Budget Board (LBB) is required by statute to adopt an estimated rate of growth for the next biennium and calculate a limit on the amount of state tax revenue, not dedicated by the Texas Constitution, that is available for spending in the next biennium. If the Legislature, by adoption of a resolution approved by a record vote of a majority of the members of each house, finds that an emergency exists and identifies the nature of the emergency, the Legislature may provide appropriations in excess of the adopted limit. The Governor's Budget Office and LBB initiate the process by submitting budget requests to the Legislature. At final passage of the General Appropriations Act by the Legislature, it is sent to the Comptroller for certification. If the Comptroller certifies that appropriated amounts are available in the affected funds, the bill is sent to the governor. If not certified, the Legislature may pass the bill with a four-fifths majority vote. The governor has the option of vetoing the total bill or specific line-item appropriations, but does not have the authority to reduce a line item of appropriation. Upon approval by the governor, the bill becomes law and is the budget authority for state agencies to spend state funds. The Comptroller is responsible for controlling, accounting and reporting expenditures in accordance with the expenditure budgets.

Legal Level of Budgetary Control

The Texas Constitution requires the Comptroller to submit a *Biennial Revenue Estimate* to the Legislature prior to each regular session. This document contains an itemized estimate of beginning cash balances, anticipated revenues based on laws then in effect and estimated expenditures from prior appropriations. The Texas Constitution also requires the Comptroller to submit supplementary revenue estimates at any special session

of the Legislature and at other necessary times to show probable changes.

The level of legal control for the budget is established at the strategy (line item) level by agency. For example, "Highway Patrol" and "Vehicle Inspection Program" are two of the strategies for the Texas Department of Public Safety. The legal level of budgetary control is defined as the level at which the governing body must approve any over-expenditure of appropriations or transfers of appropriated amounts. Agencies are authorized limited transfer authority between strategies, not to exceed 20 percent, by the General Appropriations Act. Transfers and expenditures are monitored against the original budget by the Comptroller's office to ensure the agency's authorized budget is not exceeded.

The level of legal control for all agencies is documented in the Appropriation Summary Report, which is available by request from the Comptroller's office. This separate document includes budget and actual data by appropriation line item for each state agency. State agencies cannot exceed approved appropriations. In certain emergency situations, the governor may authorize additional appropriations from deficiency and emergency appropriation reserves. During fiscal 2013, \$400,000 was transferred to the Texas Veteran's Commission to provide additional funds for staffing needs in processing veteran's claims for disability benefits. Unexpended appropriations generally lapse 60 days after the fiscal year unless they are encumbered during the 60-day "lapse" period. Other appropriations referred to as "reappropriated unexpended balances" represent the continuation of a prior year's balances for completion of a program.

Modified Approach to Reporting Infrastructure Assets

The state adopted the modified approach for reporting its highway system. Under the modified approach, depreciation is not reported and certain preservation and maintenance costs are expensed.

The modified approach requires that the state:

- Maintain an asset management system that includes an up-to-date inventory of eligible infrastructure assets
- Perform condition assessments of the eligible infrastructure assets and summarize the results using a measurement scale in order to document that the eligible infrastructure assets are being preserved approximately at (or above) the condition level established and disclosed by the government
- Estimate each year the annual amount needed to maintain and preserve the eligible infrastructure assets at the condition level established and disclosed by the government

Although bridges are an integral part of the highway system, the state elected to depreciate bridges. Therefore, they are not reported using the modified approach.

Condition Assessments

The Texas Department of Transportation (TxDOT) performs yearly condition assessments through its Texas Maintenance Assessment Program (TxMAP). Under this program, visual inspections are conducted on approximately 10 percent of the interstate system, 5 percent of

the non-interstate system (national, state and farm-to-market roadways) and 20 percent of the Central Texas Turnpike System toll roads. For each section of highway observed, 21 elements separated into three highway components are assessed scores from 0 to 5 (0=NA, 1=Failed, 2=Poor, 3=Fair, 4=Good, 5=Excellent) in order to determine the condition of the highways. Each element within a component and each component are weighted according to importance

to determine the overall condition of the highways. The overall score is converted to a percentage measurement for reporting (1=20 percent, 2=40 percent, 3=60 percent, 4=80 percent, 5=100 percent).

Assessed Conditions

TxDOT adopted a minimum condition level of 80 percent for the interstate system, 75 percent for the non-interstate system and 80 percent for the Central Texas Turnpike System based on TxMAP assessments. The results of the condition assessments are presented in the table below.

Year	Interstate Condition (Minimum 80%)	Non-Interstate Condition (Minimum 75%)	Central Texas Turnpike System (Minimum 80%)
2013	80.3%	77.4%	85.1%
2012	82.0%	77.7%	86.2%
2011	83.0%	78.5%	89.9%
2010	83.6%	77.9%	87.9%
2009	81.4%	76.5%	90.5%

Estimated and Actual Costs for Maintenance

The table below provides a comparison between TxDOT's estimate of maintenance expenditures required to maintain the highway system at or above the adopted condition levels and the actual expenditures.

Maintenance	C	ost								
(Amounts in Thousands)										
		2013		2012		2011		2010		2009
INTERSTATE HIGHWAYS										
Estimate	\$	277,770	\$	191,442	\$	604,837	\$	568,456	\$	534,263
Actual	\$	303,959	\$	346,326	\$	361,825	\$	333,253	\$	326,305
OTHER HIGHWAYS										
Estimate	\$ 2	2,628,535	\$ 2	2,224,822	\$ 3	3,282,946	\$ 3	3,005,713	\$ 2	2,687,869
Actual	\$ 2	2,067,091	\$:	1,594,432	\$:	1,517,604	\$	1,423,734	\$	1,519,110
CENTRAL TEXAS										
TURNPIKE SYSTEM										
Estimate	\$	13,988	\$	10,050	\$	11,578	\$	11,371	\$	9,179
Actual	\$	13,109	\$	10,628	\$	11,439	\$	6,972	\$	7,262

Factors Affecting Condition Assessments

TxDOT continues to develop its methods for determining such estimates. As additional experience is acquired in the estimation and reporting processes, TxDOT intends to achieve a greater correlation between the estimated maintenance expenditures needed to maintain the highway system at or above the adopted condition levels and the condition level of the highways. In comparing actual expenditures to estimated expenditures, factors such as increases in traffic, legislative mandates, budgetary constraints and environmental effects (rainfall, drought, freeze, thaw, etc.) are considered as they may have a major impact on needed funds and the condition of Texas roads.

Other Condition Assessments

A separate annual inspection is performed on the Central Texas Turnpike System in accordance with Section 707 of the Indenture Trust. Those inspections are performed by the general engineering consultant (GEC) of the Central Texas Turnpike System. The fiscal 2013 inspection noted that overall the Central Texas Turnpike System was in excellent condition, achieving an overall score of 95 percent. While the GEC inspection uses the same general criteria as TxMAP, both parties have different areas of focus, timing and methodology that may contribute to a difference in scores. The evaluation covers all 65 miles of the system rather than a 20 percent random sample.

Schedules of Funding Progress

The schedules of funding progress for the state's pension plans for the three most recent actuarial valuations are presented in the table below.

Actuarial Valuation Date	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) (b)	Unfunded AAL (b) - (a)	Funded Ratio (a)/(b)	Covered Payroll (c)	UAAL as a Percentage of Covered Payro ((b-a)/c)

Significant Factors Affecting the Comparability of Amounts Reported

Amounts reported in the schedule of funding progress for the following plans varied significantly from the previous year to the current year due to actuarial methods used, and changes in actuarial assumptions or benefit provisions. Significant factors are summarized below and the effects of those factors are incorporated into the 2013 valuations.

Pension Plans

Amounts reported for the ERS, LECOS, and JRS2 plans varied significantly due to the amount of interest on the unfunded liability included in the actuarial accrued liability, significantly different amount of smoothed asset losses from 2008-2010 recognized in fiscal 2013 compared with prior year, and increased contribution rates from the prior valuation.

Actuarial methods and assumptions remained the same except for the retirement rates for the TRS Plan. There were changes to the retirement eligibility for certain members of the pension plan and the assumptions were modified for these employee groups.

OPEB Plans

The University of Texas System (UT) and the Texas A&M University System (A&M) opted to perform actuarial valuations of their respective OPEB plans on a biennial basis rather than on an annual basis starting with fiscal 2012.

The following methods and assumptions were modified since the prior valuation of the UT Plan:

- The period of coverage assumption for dependent children and the tobacco usage assumption have been updated to reflect statutory changes and recent plan experience.
- The Assumed Per Capita Health Benefit Costs and Assumed Expenses for retirees and dependents have been updated to reflect claims and expense experience since the prior valuation. The Assumed Expenses include provision for the Patient-Centered Outcomes Research Institute fee and the Transitional Reinsurance Program fee.

The Health Benefit Cost Trend has been updated to reflect changes in short-term expectations of the annual rate of increase of the Assumed Per Capita Health Benefit Costs.

There were changes in assumptions that account for the lower than expected actuarial accrued liability for the A&M Plan since the prior valuation. These changes include a combination of the following factors:

 Factors that decrease the liability include a smaller active population, revision in the post Medicare trend assumptions, and lower than expected claims/contributions. Factors that increase the liability include the addition of an excise tax due to the Patient Protection and Affordable Care Act, improved mortality assumptions, and a slightly greater retiree population.

Nonmajor Special Revenue Funds

The **Property Tax Relief Fund** is outside the general revenue fund. The proceeds of the fund are from allocations of the computation of motor vehicle sales tax, collection of all tobacco products tax increases and calculated amounts from franchise taxes. The fund was established with the intent of reducing school district property taxes.

The **Texas Transportation Corporations** issue bonds and notes – currently only conduit debt – to finance the cost of projects. The corporations act on behalf of the Texas Department of Transportation (TxDOT) in the promotion and development of transportation facilities by issuing private activity bonds for projects developed under comprehensive development agreements entered into by TxDOT.

The **Water Development Funds** receive proceeds from the sale of Texas Water Development bonds for the purpose of aiding and making funds available to various political subdivisions for projects and other authorized purposes. The funds also receive gifts or grants for the purpose of assisting economically distressed areas. Monies in the funds are invested.

The **System Benefit Fund** receives funds from a nonbypassable fee in an amount not to exceed 65 cents per megawatt hour and interest earned. The funds are used to provide funding for programs to assist low-income electric customers.

The **Available School Fund** receives distributions from the permanent school fund based on total return of investment assets, allocations of motor fuel taxes and appropriations made by the Legislature. The fund is to be used for the support of public schools.

Nonmajor Debt Service Funds

The **Texas College Student Loan Bonds Interest and Sinking Fund** receives deposits from the Texas opportunity plan fund for payment of current interest and principal and establishment of a reserve.

The **Texas Department of Transportation Texas Mobility Fund** receives proceeds from the sale of general obligation bonds and the revenues dictated by statute to provide for the debt service requirements of those bonds. The bond proceeds provide a method of financing for the construction, reconstruction, acquisition and expansion of state highway projects. The proceeds remain in the fund until transferred to the state highway fund.

The **Texas Public Finance Authority G.O. Bond Funds** receive proceeds and accrued interest from the sale of general obligation bonds and provide the debt service requirements for those bonds.

The **Texas Public Finance Authority Commercial Paper Funds** receive deposits of any accrued interest on the sale of notes and pledged revenues necessary to make debt service payments.

The **Texas Department of Transportation State Highway Debt Service Fund** receives proceeds and accrued interest from the sale of revenue bonds and provides the debt service requirements for those bonds.

Nonmajor Capital Projects Funds

The **Texas Public Finance Authority Administration Project Funds** utilize long-term financing for various state construction, repair or renovation projects. Funds are also used to refinance purchases of equipment by various state agencies.

The **Texas Parks and Wildlife Department Project Funds** are used for the acquisition and development of state park sites. Revenues from park entrance fees are used for the repayments of long-term debt incurred.

The **Texas Facilities Commission Project Funds** are used to administer the state's major and minor building construction programs.

The **Texas Department of Criminal Justice Prison Project Funds** are used for construction of regional centers and for repairs and minor construction of correctional facilities.

The **Texas Youth Commission Project Funds** are used to pay for minor construction and repairs of the Texas Youth Commission buildings and facilities.

The **Texas Health Agencies Project Funds** are used to pay for the cost of construction, repair and remodeling for certain mental health facilities and other health related projects.

The **Texas Department of Public Safety Project Funds** are used to finance construction of new Department of Public Safety buildings and crime lab facilities in various state locations.

The **Texas Department of Transportation Project Funds** are used for public road and highway development, construction and improvement projects. The funds are also used to establish, acquire, operate, maintain and dispose of airports and air navigation facilities.

The **Texas Historical Commission Project Funds** are used to provide financial assistance to counties for the repair and renovation of courthouses.

The **Texas Mobility Capital Project Funds** are used to provide a method of financing construction, reconstruction, acquisition and expansion of state highways and other transportation projects.

Nonmajor Permanent Funds

The Permanent Health Fund for Higher Education was established by the Legislature from a portion of the money received in the settlement of The State of Texas v. The American Tobacco Co., et.al. The corpus of the account was designated by the Legislature to be preserved. Distributions of earnings on the account are to be transferred to other accounts and used for health care costs, tobacco education and enforcement.

The National Research University Fund was established by the Legislature to provide a dedicated, independent and equitable source of funding to enable emerging research universities to achieve national prominence as major research universities. The fund consists of appropriations and transfers under the Texas Constitution and amounts provided by law, gifts, grants and interest. The Texas Constitution required that balances in the permanent higher education fund be transferred to the national research university fund on Jan. 1, 2010. Funds are allocated to eligible universities based on an equitable formula.

Nonmajor Enterprise Funds

The **Texas Water Development Board Funds** include water development funds, agricultural water conservation funds and water pollution control revolving funds that receive proceeds from bonds issued by the Texas Water Development Board to provide assistance to political subdivisions.

The **Texas Department of Housing and Community Affairs** issues bonds to assist in financing the purchase of homes or the construction of rental housing for families with low to moderate incomes. Loan payments and rentals provide the revenue for debt service payments.

The **Texas Transportation Commission** receives proceeds from the sale of bonds used to finance a portion of the costs of planning, designing, engineering, developing and constructing the initial phase of the Central Texas Turnpike System.

The Veterans Land Board Loan Program Funds receive proceeds from the sale of bonds used to administer, originate and service loans from land, housing and home improvement for those qualifying veterans.

The **Texas Department of Criminal Justice Institutional Division** accounts for the proceeds of the institutional division's commissary operations and other miscellaneous revenue.

The **Texas Prepaid Tuition Plans** offer programs that allow Texas families to lock in the cost of future college tuition and required fees at current prices.

The **Grand Parkway Transportation Corporation**, a blended component unit of the Texas Department of Transportation, is authorized to assist and act on behalf of the agency in the development, financing, design, construction, reconstruction, expansion, operation and/ or maintenance of the Grand Parkway toll project.

Colleges and Universities – Major Enterprise Fund

There are six university systems and five independent universities in Texas' primary government presented in a single-column as a major fund on the basic financial statements. Schedules were prepared to report the breakdown of the following universities:

University of Texas System
Texas A&M University System
Texas Tech University System

Pension and Other Employee Benefit Trust Funds

The **Teacher Retirement System Trust Account** is for the accumulation of resources for pension benefit payments for qualified employees of public education in Texas.

The **State Employees Retirement System** (S.E.R.S.) **Trust Account** is for the accumulation of resources for pension benefit payments to qualified state employees or beneficiaries.

The Law Enforcement and Custodial Officer
Supplement Retirement Fund provides supplemental retirement and death benefits for members of the Employees Retirement System of Texas who completed 20 or more years of service or became occupationally disabled or died while serving as commissioned law enforcement officers of a state agency.

The Judicial Retirement System – Plan Two Trust Fund accounts for receipt of monies for retirement and death benefits for certain state-paid judges and judicial officers.

The **Fire Fighters' Relief and Retirement Fund** accounts for the accumulation of resources for pension, death and disability benefits for fire fighters who serve without monetary reward.

The **Judicial Retirement System – Plan One Fund** accounts for appropriations received from the state's general revenue fund for annuity and refund payments to eligible judicial employees.

The Retired School Employees Group Insurance
Trust receives contributions and other funds authorized

to be deposited in the fund to pay insurance premiums, to reimburse for claims paid by a non-state entity and to pay administrative expenses. The Teacher Retirement System of Texas, as trustee, administers the fund for public school retirees and their dependents. The public school entities are not considered part of the reporting entity for the state of Texas.

The **State Retiree Health Plan Trust** accounts for the receipt of monies for postemployment health care, life and dental insurance benefits provided under the Group Benefits Program. The Employees Retirement System of Texas, as trustee, administers the fund for retired employees of the state and other non-state entities as specified by the Legislature.

The **Deferred Compensation Trust Fund** receives employee deferrals in accordance with Internal Revenue Code 457, appropriations by the state for the administration of the deferred compensation plan, trust income, and fees. The state of Texas is the only employer participating in the plan.

The **State Employee Cafeteria Plan Trust Fund** receives salary reduction payments and makes disbursements for benefits included in a cafeteria plan, other than Employees Uniform Group Insurance Program coverages. The fund also receives appropriations by the state for the administration of the cafeteria plan.

The **Texa\$aver Administrative Trust Fund** receives deferrals, purchases qualified investments and pays expenses associated with administration of the deferred compensation plan.

Private-Purpose Trust Funds

The Tobacco Settlement Permanent Trust (Political Subdivisions) holds the portion of the money received in the settlement of the State of Texas v. The American Tobacco Co., et. al., designated for the exclusive benefit of other political subdivisions. Other political subdivisions include cities, counties and/or local hospital districts that are responsible for indigent health care. The fund is administered by the Treasury Operations Division of the Texas Comptroller of Public Accounts.

The **Texas Insurance Companies Assets Account**– **Reserve and Custodial Fund** holds assets in trust for claims associated with insurance company liquidations. Most balances are normally held outside the Treasury. The Department of Insurance administers the fund.

The **Catastrophe Reserve Trust Fund** is a state fund created to provide relief to insurance companies within the state in the event of certain catastrophic losses. Certain property insurers authorized to transact property insurance in Texas make payments to the fund.

The Inmate Trust and Employee Service Option Fund accounts for offender commissary and medical accounts along with the Texas Department of Criminal Justice employee commissary, laundry and/or barber contributions.

The **Texas College Savings Plans** receive money contributed by account holders, money acquired from private sources and income from investment of deposits. The plans may be used only to pay costs of program administration and operations, make payments to state, private or independent institutions of higher education and make refunds to account holders.

Other Private-Purpose Trust Funds account for other assets held in a trustee capacity where principal and income benefit individuals, private organizations or other governments.

Agency Funds

The **Texas Public Finance Authority Bond Escrow Account** is used to hold funds for various defeased or refunded bonds.

The **Life**, **Health**, **Accident and Casualty Insurance Companies Trust Account** holds cash or securities deposited with the state by insurance companies as required by law.

The **Texas Workers' Compensation Self-Insurance Fund** is used to deposit certified self-insurer security deposits. These deposits may be applied to the selfinsurer's incurred liabilities for compensation. The City, County, Metropolitan Transit Authority (MTA) and Special Purpose District (SPD) Sales

Tax Trust Account is used to record the receipt of local sales and use tax collected by the Texas Comptroller of Public Accounts for each city, county, metropolitan transit authority and special purpose district authorizing the collection.

Other Agency Funds account for other resources held by the state in an agent capacity for individuals, private organizations or other governments.

Discretely Presented Component Units

A statement of net position and a statement of activities were prepared to report the breakdown of the following discretely presented component units:

Texas Guaranteed Student Loan Corporation

Teacher Retirement System of Texas

State Bar of Texas

Texas State Affordable Housing Corporation

OneStar National Service Commission Inc.

Texas Low-Level Radioactive Waste Disposal Compact Commission

Texas Prepaid Higher Education Tuition Scholarship Foundation Inc.

Texas Match the Promise Foundation

Texas Windstorm Insurance Association

Surplus Lines Stamping Office of Texas

Texas Health Reinsurance System

Texas Health Insurance Pool

Texas Title Insurance Guaranty Association

Texas Life and Health Insurance Guaranty Association

Texas Property and Casualty Insurance Guaranty Association

Fair Access to Insurance Requirements Plan Association

Texas Boll Weevil Eradication Foundation Inc.

Texas Agricultural Finance Authority

Texas Water Resources Finance Authority

Texas Appraiser Licensing and Certification Board

Texas Economic Development Corporation

Texas Small Business Industrial Development Corporation

Texas Disaster Relief Fund

Texas Health Services Authority

Beacon State Fund

State Agency Council

Film Texas Fund

Texas Governor's Mansion Administration

Robert G. Carr and Nona K. Carr Scholarship Foundation

University of North Texas Foundation

Casa Verde Research Center, Sociedad Anonimo (Casa Verde)

Representacion de TAMU en la Republica Mexicana, A.C. (Mexico Center)

National Biosecurity Foundation

Texas 4-H Inc.

State of Texas Statistical Section

This section presents detailed information as a context for understanding what the information in the financial statements, note disclosures, required supplementary information and other supplementary information says about the state's overall financial health.

Contents	Pages
Financial Trends Information	263 – 269
Revenue Capacity Information These schedules contain information intended to help the reader assess the state's most significant revenue source – state tax collections.	270 – 272
Debt Capacity Information	273 – 277
Demographic and Economic Information These schedules provide demographic and economic indicators intended to help the reader understand the socio-economic environment within which the state's financial activities take place.	278 – 280
Operating Information	281 – 283

Sources: Unless otherwise noted, the information in these schedules is derived from the Texas Comprehensive Annual Financial Report databases for the relevant years.

The TAKS (Texas Assessment of Knowledge and Skills) was phased out beginning in 2012 and was replaced by the STAAR (State of Texas Assessments of Academic Readiness). Due to the transition, ratings were suspended in 2012 while a new accountability system was developed. The new STAAR state rating system became effective in 2013.

Other Sources: Various state agencies, state agency reports and official state agency websites. Prior years are subject to revisions.

Complete operating indicators by function for all data presented only available from 2005 – 2013.

^{**} The current year figure is preliminary. The final count will be revised and certified the following year.

^{***} The 2013 degrees conferred will not be available until later in 2014.

^{****} Prior years subject to revisions. Medicaid average monthly caseload is based on data through December 2013. Fiscal 2012 data was finalized March 2013, and fiscal 2013 data will be finalized March 2014. TANF is based on data through October 2013.

^{*****} Includes commercial and recreational licenses, stamps, tags and permits. Does not include items such as hunting lease license sales, collector's stamp sales, hunt drawing sales and other similar items sold through the Point-of-Sale System.
